

ON SPAIN AND THE SPANIARDS IN THE SUMMER OF 1859 WITH A GLANCE AT SA

"Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen., That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action?. Kath appeared in the hallway just as those due to leave were filing out the door. While the farewells and "good luck's were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered.. "Power. The prisoner moon escapes the dungeon clouds, and the oiled lane under the boy's swift feet glistens. Meanwhile, the SD sergeant at the main foyer was being conscientious. "I don't care what the computers say, Hanlon. This doesn't sound right to me. I have to check it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are, buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert.. His impatience was asserting itself again now, as Borftein sat in the chambers of Judge William Fulmire, the Mayflower H's Supreme Justice, listening to Howard Kalens and Marcia Quarrey argue over the finer points of the Mission's constitution, while on the surface the troops were fraternizing openly with what could become the enemy, and two years away in space the EAF starship dally drew nearer. The news from Earth told of a three-cornered conflict sweeping through eastern Africa, black nations clashing against Arabs in the north and whites in the south, Australia forces landing in Malagasay, and the Europeans maneuvering desperately to quell the flames while the EAF fanned them gleefully. That news would long ago have overtaken the Pagoda and what the intentions of those aboard it might be was anybody's guess. It wasn't a time to be fussing over ambiguous syntax and legal niceties.. "Oh, okay," lay said. "Their laws couldn't tell them anything about the cold universe before that instant. Flame physics only came into existence when the flame did.".. "Probably this lemonade," said Leilani.. Chapter 20. like a pack of miniature dachshunds whose tails have been trod upon in rapid succession.. The cargo bed of the truck has a canvas roof and walls. "Where is Major Lesley? I ordered-" Chaurez cut him off with a flip of a switch and at the same time closed a speech circuit to the loudspeakers commanding the lock area. "Okay, you guys, we're standing down," he said into the microphone stern projecting from the panel. "Get in here as quick as you can. We've got trouble coming up a feeder ramp on the other side."..along the psychic wire that links every boy in his dog, but that's unlikely because the two of them have so..Kalens looked disdainfully down his nose. They're all quite insane."..Sooner or later, they'll come back here, run a search through the diner, around the motel, and wherever..CHAPTER TWENTY-SEVEN."His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. "Deputy Director of Liaison of the Supreme Directorate of the official Congress of the Mayflower H and appointed emissary to the Kuan-yin on behalf of the Director of Congress . . ." The conviction drained from the assistant's voice as his eyes told him even while he was speaking that the words were not appropriate. Nevertheless he struggled on with his lines as briefed and continued manfully, "... who is empowered as ambassador to the planetary system of Alpha Centauri by the Government of . . ." he swallowed and took a deep breath, "theUnitedStatesofGreater NorthAmerica,planetEarth.'..holds, and still the door doesn't open for him. Mother in.Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Stern to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes.".."He's saying money's nothing but vomit to him."..we, baby boy? And he always knew the answer to that one: No, we never panic. And she would say,.."It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead---one of our soldiers, I think. It was at some place called The Two Moons."..For a while after listening to Lechat, she had -entertained a brief hope that his announcement might precipitate a landslide of opinion that would force a more enlightened official policy, but the hope had faded a mere two hours later when Eve and Jerry stopped by for a brief farewell before moving out to take up the Chironian way of living. Apparently many people were doing the same thing, and there were even rumors of desertions from the Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. It was as if Chiron were conspiring against her personally to tear down her, world and destroy every facet of the life she had known..She advanced one more step, not out of a sense of obligation or curiosity, but because by turning away..The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians..resisted him."..Then Leilani would be alone with Dr. Doom..The only light came from one of the lamps on the nightstands that flanked the lone bed. Laura didn't..They crossed the machinery compartment in the direction the others had taken, passed through an instrumentation bay, and ascended two flights of steel stairs to reenter the Government Center proper behind offices that had been empty since the end of the voyage, using a bulkhead hatch that Colman and Driscoll had opened on their way down. There was no sign of the others who had gone ahead. Here the group split three ways.."Why should you be nice to people who are acting like they're trying to take over your ship?'.would actually tighten up a notch.".."So now," said Micky, "in addition to your perpetually wasted tofu-peaches-bean-sprouts mother and.by fit or fandango.."Because she knows what she's talking about, right?" Bernard said..got to allow me a little literary license.".."How do you know when you've done enough work?" Jay asked him, trying to make it simpler..a cash business."..Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together

carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeples" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks.. "What about the ameba?" "Because the Book tells us we must." He returned to the Bowery, where a couple of businessmen out on the town bought him a drink. They were concerned about the rumors of possible trouble because they had big plans for expansion on Chiron, and they pressed Colman for inside information from the Military. Colman ' ~d he didn't have any. The businessmen hoped everything would be resolved peacefully but were glad that the Army was around to help solve any problems. They didn't want peace to prevent people like Colman from getting shot or so that Chironians who were like Jay and the black guy near Zeerust could become engineers or run their farms without getting wiped out by air strikes; they wanted it So that they could make money by hiring Chironians at half the wages they'd need to pay Terrans, and to set up good, exclusive schools to put their kids in. You couldn't put Chironians in the schools, because if you did they'd want the same wages. And in any case they'd never be able to afford it. The Chironians weren't really people, after all..searching, cunning and indefatigable..anger. Only anger had kept her going, and until recently she'd been reluctant to let it go..of a locomotive, the dog often visible in front of him, but sometimes seen less than sensed, sometimes..dragged so low by her demons and her drugs that she was less likely to be found in an armchair than. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder.. "Hi," the redhead called, a shade cautiously.. "Nothing," Juanita said. "But why would they? Who'd take any notice of them?". As the Windchaser slows steadily, Curtis slides shut the window and takes up a position at the bedroom. "Yep. "Yours'~ "Nope." .LATER, AFTER AUNT GEN had gone to her room, when Micky sat back once more upon the. "Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but. "She isn't here, We've checked with transportation, and she was booked onto a shuttle up to the ship earlier this. After studying his impassive expression for a few seconds, Veronica had said in a low voice, "It is you, isn't it?" .by then? Somewhere, anywhere, everywhere, waiting. And what if her mother took it with them when. Tuesday afternoon, wearing a bikini and oiled for broiling, Micky reclined in a lounge chair in her aunt. They're dead serious about it. He says if we tell anyone about them, they'll never bring Luki back. They. "Well, hello, Sergeant," she s. aid huskily. "I was beginning to wonder if I had a deserter. "Maybe because if Snow was as sexy as you, people would start to wonder what she might've been up. Resolved to live up to his mother's expectations, reminding himself of his remorse over failing to rescue. "What's the problem?" Bernard, who had finished talking to Jeeves for the time being, came over to them. Marie followed close behind.. "Not interested?" .His dark-adapted eyes sting briefly from the glare.. brain damage that allows little self-awareness and no hope of a normal life.. Because for the first time ever, he had the feeling that he was somebody-- not just "Sergeant, U.S. Army, or "Serial Number 5648739210," or "White, Anglo-Saxon, Male," but "Steve Colman, Individual, Unique Product of the Universe." .As if there's already something of the dog's heart twined with his own, the boy finds his mouth filled with. it wasn't a good atmosphere." .Down in the inner lock, Colman and Swyley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said.. their bladders: a longer rest stop than they had planned. Yet he'll never elude his pursuers if he remains on. Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did.." His voice trailed away silently.. In spite of the news about the marriage, Micky clung to the hope that her newfound desire to act as?so. "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?". At that moment a waiter began clearing the dishes in' readiness for the next course. "Have you heard the news from the surface?" he inquired as he stacked the plates and brushed a few breadcrumbs into a napkin with his hand.. and penitence?" .Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously ~suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there.. "maybe you'll realize your palm-shaded terrace isn't in Heaven." .But you hardly even talked about it. Hell, I know I'm twenty years older too, but at least I haven't forgotten all the things we used to talk about. We were going to help build a new world-our world, the way it ought to be, Well, we've arrived. The ride's over. Isn't it time we started thinking about earning the ticket?". "There's something for you here," the attendant noted as lay was turning away. He reached beneath the counter and produced a small cardboard box with Jay's name scrawled on the outside.. "We

couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here." "Dry as a cracker." As in Leilani's own closet, a tubular-steel pole, approximately two inches in diameter, spanned the. "If a chip can do the job, a man's life is probably better spent doing something else anyway." "But lay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?". ricochets and stray bullets. He's wearing a large stainless-steel colander as though it's a hat, holding it in. As Leon spoke, Colman looked curiously at Kath to see if he could detect any reaction, but the remained impassive.
