He kept the illusion spell about his boat. In the brilliant clarity of midsummer, with a north wind blowing, he saw, high and far above the blue strait and the vaguer blue-brown of the land, the long ridges and the weightless dome of Mount Onn..Elfarran. Beautiful with.students learning how to do tricks of illusion from the sorcerer Hega of O; Master Hand, they.When it came to teaching what he knew, he was tireless, generous, and exacting. For the first time, Medra was given a vision of magic not as a set of strange gifts and reasonless acts, but as an art and a craft, which could be known truly with long study and used rightly after long practice, though even then it would never lose its strangeness. Highdrake's mastery of spells and sorcery was not much greater than his pupil's, but he had clear in his mind the idea of something very much greater, the wholeness of knowledge. And that made him a mage..like diamonds..THE ISLAND OF SEMEL lies north and west across the Pelnish Sea from Havnor, south and west of the Enlades. Though it is one of the great isles of the Earthsea Archipelago, there aren't many stories from Semel. Enlad has its glorious history, and Havnor its wealth, and Paln its ill repute, but Semel has only cattle and sheep, forests and little towns, and the great silent volcano called Andanden standing over all..Of them all it was the Herbal, the healer, who was the first to move. Bread and onions were what they gave him, with a slop of rancid oil on the bread. Hungry as he was every night, when he sat in that room with the spellbonds upon him he could hardly swallow the food. It tasted of metal, of ash. The nights were long and terrible, for the spells pressed on him, weighed on him, waked him over and over terrified, gasping for breath, and

never able to think coherently. It was utterly dark, for he could not make the werelight shine in that room. The day came unspeakably welcome, even though it meant he would have his hands tied behind him and his mouth gagged and a leash buckled round his neck..work undone, to be a vagrant musician, a harper twanging and singing and grinning for pennies --.announcement about takeoff, signals of some sort, the warning to fasten seat belts, but nothing.Archipelago, perhaps to aid in retaining the Old Speech. The master yawned and cursed and began to shout commands. The crewmen got up slowly and slowly began to rake the awkward sail in, and the oar-master, after asking several questions of the master and Medra, began to roar at the slaves and stride among them rousing them right and left with his knotted rope. The sail was half down, the sweeps half manned, Medra's staying spell half spoken, when the witchwind struck..aboard her. My hands wouldn't do it. So I did what I could. I made her go her own way. She had stopped trying to reach him, months ago, but her heart was.praying to itself. I do not know how long I watched. I had never seen anything remotely like it..Men and women of the Hand had joined together on Roke a hundred or more years ago, forming a league of mages. Proud and secure in their powers, they had sought to teach others to band together in secret against the war makers and slave takers until they could rise openly against them. Women had always been leaders in the league, said Ember, and women, in the guise of salve sellers and net makers and such, had gone from Roke to other lands around the Inmost Sea, weaving a wide, fine net of resistance. Even now there were strands and knots of that net left. Medra had come on one of those traces first in Anieb's village, and had followed them since. But they had not led him here. Since the raid, Roke Island had isolated itself wholly, sealed itself inside powerful spells of protection woven and reweaved by the wise women of the island, and had no commerce with any other people. "We can't save them," Ember said. "We couldn't save ourselves."..away from Master Hemlock, he began to think about Darkrose, and went on thinking about her and.name written in the dust by the falling rain. Ged could force the dragon Yevaud to obey him.,So Diamond, instead of learning spells and illusions and transformations and all such gaudy tricks, as Hemlock called them, sat in a narrow room at the back of the wizard's narrow house on a narrow back street of the old city, memorizing long, long lists of words, words of power in the Language of the Making. Plants and parts of plants and animals and parts of animals and islands and parts of islands, parts of ships, parts of the human body. The words never made sense, never made sentences, only lists. Long, long lists..that such a thing was possible. She fell silent, and still I heard her voice; suddenly light footsteps.and flew..The spoken name of a True Rune may be the word it signifies in the Old Speech, or it may be one of the connotations of the rune translated into Hardic. The names of commonly used runes such as PIRR (used to protect from fire, wind, and madness), SIFL ("speed well"), SIMN ("work well") are used without ceremony by ordinary people speaking Hardic; but practitioners of magic speak even such well-known, often used names with caution, since they are in fact words in the Old Speech, and may influence events in unintended or unexpected ways.."What else can you do, Diamond?" he asked..right, then, though the word "change" rang and rang in his head.."He's ten times the use and company to me my brother is," she said. "Yes, but not completely. Maybe a little. But surely you didn't think that I . . ."..Early never disregarded any triviality Hound mentioned, because so many of them had proved not to be trivial. He disliked the old man for that, and because he was unshakable. He never praised Hound, and used him as seldom as possible, but Hound was too useful not to use.."She's Irian of Westpool's mare. You're the wizard, then?" "I'd say," she said, her voice thin and reedy, speaking to the curer, "that if Alder's beeves stay." "I've been thinking about it," she said, hurried and earnest. "Couldn't I just tell them who I am? With you there to vouch for me - to say even if I am a woman, I have some gift - and I'd promise to take the vow and make the spell of celibacy, and live apart if they wanted me to -".Ayo and Mead were much alike, and Otter saw in them what Anieb might have been: a short, slight, quick woman, with a round face and clear eyes, and a mass of dark hair, not straight like most people's hair but curly, frizzy. Many people in the west of Havnor had hair like that..who mistook the signs and piped up, "Speed the work!"..falcon, mistress, and to see the earth below you with a falcon's eye. There seemed to be more of them. In front of me: pressed, and into my palm fell a colored, translucent tube, slightly warm. I shook it, held it up to. Veil, with her gentle voice and smile, was implacable. She told Medra that though she had consented to his remaining on Roke, it was to keep watch on him. "You broke through our defenses once," she said. "All that you say of yourself may be true, and may not. What can you tell me that would make me trust you?" then at her again. The wizard who called himself Gelluk and the pirate who called himself King Losen had worked together for years, each supporting and increasing the other's power, each in the belief that the other was his servant. file:///D:/Documents%20and%20Settings/harry/...0%20LeGuin%20-%20Tales%20From%20Earthsea.txt (89 of 111) [2/5/2004 12:33:31 AM]. of the loveliest regions of hill and field and meadow in all Earthsea, was a battleground of feuds. they are true laws, founded not on what we want, but on what is.
