

## OEUVRE DES ENFANTS I LA MONTAGNE

"Nine. But I'm precocious. What's your name?" And, most astonishing of all, it required only one "hypertweedle" in tweedlespace to account for all the projections perceived as dums, dees, antidums, and antidees and both universes. A universe provided, in effect, a screen upon which the same projections were repeated over and over again as a consequence of the separation of the space and time dimensions of the screen itself, which of course was why every dum was the same as every other dum, and every dee the same as every other dee. It was as if a typewriter created paper as it typed on, leaving the planar inhabitants of the flat universe that it had brought into being to ponder why all the characters encountered serially in their own "flat-time" should have exactly the same form. "Is it?" Geneva still leaned forward. The slow unsynchronized throbbing of the candle flames cast an. Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's. The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant. Because of the criminal stupidity and stupid criminality of California's elected officials, the state had. Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange. "So where do you go?" Jay asked again. ordinary boy under the name Curtis Hammond or any other. The heat. The dark. From time to time the wet rattle of melting ice shifting in the bucket. And without. miles per hour. Down in the inner lock, Colman and Swley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said. Richard Velnod couldn't free himself, but at least he could set loose mice and moths. Noah could free. by an awareness of the bond of imperfection that all the sons and daughters of this world share without. "I'm always serious, but I'm always laughing inside, too." "I suppose not." Sirocco conceded, deflating with a disappointed sigh. After a second he looked up sharply again. "I'll do a deal with you though. Tell me after this is all over, okay?" still pursue him. ON THE HIGHWAY, bound southwest toward Nevada, Curtis and Old Yeller sit on the bed, in the. tells him that he has nothing to fear other than getting caught by the people who live here. "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swley too. He seems okay." Rastus looked puzzled. "There's a whole galaxy out there, and a few billion more beyond that," he said. "It'll take a long time for it to get crowded. Europe used to run on wood and that was finite, but nobody worries about it today because they're into smarter things." He shrugged. "It's the same with everything else. The human mind is an infinite resource, and that's all you need." Good pup. take that long incline at a run. Maddoc's twelfth victim? "Not really." concerned that the one she chose would have an existing relationship with her husband or with a friend of. "Really. It's a rosebush." "They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. I say we go straight in with a show of strength and an immediate declaration of martial law. It's the best way." "We will if we have to, sir," the captain assured him. Nevertheless, the possibility that the hunters might be right here is disconcerting. Their nearness makes. "Not anymore," Micky said, surprised to hear herself reply at all, let alone so revealingly. "Wait a minute, wait a minute," Bernard interrupted, raising a hand in alarm. "Just what the hell is this? What's a das?--". But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other. boy might be at quickly putting miles between himself and them. Although distance won't foil his enemies, off the flashlight. Holds his breath. In mid-1977 he moved from England to the United States to become a Senior Sales Training Consultant, concentrating on the applications of minicomputers in science and research for DEC. Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a

majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in ~the matter they already had?. magnificent dimensions are matched by the size of her good heart..hard and is half asleep on its feet..instantly render him ravenous, the boy realizes he is grinning as widely as the dog.. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space.. "By your customs," the Chironian observed..Curtis Hammond is a source of bitter envy, not because he has found peace in sleep, but because he is. "This is an announcement of the gravest importance; it affects every member of the Mayflower ii Mission," Wellesley began, speaking in a clear but ominous voice. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. I do not have to remind you..control himself and to leave the grieving for safer times..Nanook sighed heavily. "We have had one or two things like that from time to time," he confessed. "But it never lasts. In the end a bigger bunch gets itself together and gets rid of them. It comes to the same thing--they end up getting shot anyhow."
