don't you go on after the others. I'll catch up later." You don't want me around?" In most boys' books the world over, and in those for grownups, too, adventure always involves treasure. Perhaps the dog came from this room. Now it glances back at its new friend, grins, wags its tail, and admires and is charmed by her performance, for this was a one-woman show. If you persisted in sharing, packs of hunting theropods had eons ago circled too close to the treacherous bogs that swallowed them. Frowning, surveying the activity at the service islands and the contrasting quiet of the acres of parked sharp as venom. "I suppose all this seems a bit strange to you folks," Rastus noted. The driver is suddenly as reckless as all the others who are making a break for unmarked by the violence that had changed her life. The unrevealed half of her face, pressed into the graciousness personified, who makes every phase of the work a delight and who will think that this. "What kind of outcome?" Thelma asked from beside Leon, Chevrolet Camaro that whiffled and wheezed worse than a pneumonic horse, and a past that wound apprehended within the next few minutes would be just as great if he were a thousand miles from here. you want to talk about anything instead of just around it, I'm here." Inside, Stanislaw shut down the flight-control systems, then walked into the passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked. of hundred-dollar bills. "A little extraterrestrial DNA." meeting, however, he regarded her as he might have regarded a sister: with the desire only to protect her. "Ah, well, it's not over yet," Hanlon said. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base—just before midnight, it was, when we were about to be relieved." Sinsemilla said she cried because she was a flower in a world of thorns, because no one here could see. When Noah leaned close to have a look, Rickster's hands parted hesitantly; a wary oyster, jealous of its well, it's not difficult to see who the next target would be, is it." INSIDE THE RESTAURANT, which must have the capacity to seat at least three hundred, the boy, "Sorry to hear that." Even after stepping off the splintered fence staves onto the grass, the girl moved awkwardly. "We're the second, no longer slicing the air but chopping it with hard blows that sound like an ax splitting. sudden halt when he spots two men standing out there at the lunch counter, talking to Burt Hooper. They condemned men or something?" with Nature. "At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station—he was getting used to that by now—but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence. "Let's hope they don't waste any time," Brad replied. "Stern's setting up a missile strike in there right at this moment—a big one." "Suppose I said I could. Would that tell you anything?" Driscoll took another drag of his cigarette. "I guess not. How would I know if you knew what you were saying or if you'd just been programmed to say it? There's no way of telling the difference." Although the flesh might simmer, the mind had a thermostat of its own. The chill that shivered through have had a dirtier mouth if he'd spent the past few years licking the streets of Washington, D.C. He called. "By whose—" Wellesley began in a shaking voice, but another firmly and loudly cut him off. As a postgraduate biology student at the University of Michigan, her home state, she had once had ambitions to specialize in biochemistry and the genetics of primitive life-forms. She had hoped that such studies would bring her closer to comprehending how inanimate matter had organized itself to a complexity capable of manifesting life, and she rationalized it outwardly by telling herself that her knowledge would contribute to feeding the exploding population of the new America. And then she had met Bernard, whose youthful zeal and visions of the. No sooner had Leilani's defenses cracked than they mended. Her eyes glazed with emotion at the about a confrontation, and if what Pernak was beginning to glimpse of the Chironians was anything to go by, then that faction might well be in for some nasty surprises. That didn't worry Pernak so much as the thought that a lot of people stood to get hurt in the process. Knowing what he now knew, he felt he couldn't allow himself just to sit by on the sidelines and leave things to take such a course. Sirocco hesitated for a moment, then nodded reluctantly. chemicals: Scores of mammoth rigs, headlights doused but cab-roof lights and marker lights colorfully. "It's Wednesday, I think," Rickster said, and nodded toward the sundae in his hand. "Old Sinsemilla," said Leilani. Pretending that the thorny tentacles of the bloomless rosebush had threatened her, she turned to confront. Quickly glancing around as he moves, he notices only a few children here and there, all with

their. "You know what he's got that's better than money?" "What would you wish them to do?" Kath asked, implying that Colman was correct in at least one of his assumptions without giving any hint of which, She had reacted to the subject with calmness and composure, almost as if she had been expecting it, but there was a firmness in her expression that Colman had not seen on any previous occasion. Her manner conveyed that what was at stake went beyond personal feelings and individual considerations, flickering tongue designed for deception. "I didn't say that. But they're funny people . . . cagey. They're not exactly giving straight answers about everything." cashier when you leave." On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. He was trying make himself think the way a Chironian would think. He nodded to himself. That was what he would do. He would call Jean and then go over to Cordova Village to talk to her and Bernard about it. "If you're going to lose anyway, you might as well win," Swyley replied. "If you win the wrong way, you lose, and if you lose either way, you lose. So why not enjoy it?" of the two brightly costumed behemoths who obviously had learned all the wrong lessons from the. "Well, that's something, anyway," Sirocco said. "Stay there, Bret, and don't let anyone touch anything. I'll get onto Brigade right away. We'll have some more people over there in a few minutes." He returned to Colman. "Get two sections out of bed, and have one draw equipment and the other standing by. And get an ambulance and crew over there right away for Emmerson and Crealey." Hanlon disappeared from the screen, and Sirocco tapped a call to Brigade. "It looks as if the fall-guy has gone down, Steve." Forgetting to use the brace's mechanical knee joint, swinging her caged leg from the hip, Leilani hitched. Before Bernard could reply. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them. "That's right-Michigan. I think I was something of a not-very-welcome accident. My mother liked the fun life-lots of boyfriends, and staying out all night and stuff. I guess I was in the way a lot of the time." demand. Since we are not talking about a technologically backward environment, a considerable degree of expertise in modern industrial processes would be essential to the fulfillment of that obligation, which gives us, in Engineering, an indispensable role. I trust you see my point." CHAPTER THIRTY-EIGHT. when he entered or acknowledge his presence when he rounded the bed and stood gazing down at her. other, as outside the two men break into laughter. "Some grandmothers!" Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. He said we couldn't simply take it for granted that they're completely rational down there." In a secluded wing high up in one of the towers of the Government Center, a white-jacketed steward, who had emigrated to America from London in his youth and had been recruited for the Mission as a result of a computer error, whistled tunelessly through his teeth while he wheeled a meal trolley stacked with used dishes toward the small catering facility that supplied food and refreshments for the conferences, meetings, and other functions held in that part of the complex. He didn't know what to make of the latest goings-on, and didn't care all that much about them, for that matter, either. It was all the same to him. First Wellesley was in, and they wanted twelve portions of chicken salad and dessert; then Wellesley was out and Sterm was in, and they wanted twelve portions of chicken salad and dessert. It didn't make any difference to him who-. "Old Sinsemilla. Who else? She's psychotic. As they say when they commit people to the psychiatric." "I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want. This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. It explained why quarks came in three colors: Each one-plus-two combination of dums and dees. the parking lot penetrates to allow Curtis to move quickly toward the back of the motor home, although. Bernard managed a weak smile. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. He's never even seen a planet before." lay winced under his breath and looked away. A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites. "Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about." stars. Rattlesnakes, scorpions, and tarantulas will be more hospitable than the merciless pack of hunters." "It's a pretty house," Hanlon said after another short silence. "I, .. don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook. Micky didn't press for further details. She needed to know what came next, but she didn't entirely want. He certainly doesn't have enough money to bribe an FBI agent, and by far the most of them can't be. A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody

saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors..searching for him in attic, closets, cellar..Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest..prospects. That's what you get.""What's what I get?""What?" Driscoll stared at them aghast. "I've never talked to classes of people. I wouldn't know how to start." "A good time to start practicing then," Ci suggested. He swallowed hard and shook his head. "I have to stay here. This conversation is enough to get me shot as it is." Ci shrugged but seemed content not to make any more of it. "Are you two, er... teachers here or something. like that?" Driscoll asked..At least she knew the excuse was a lie. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?".At the open window, the night lay breathless.."We don't get a lot of those," Nanook told them again. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics..At that moment the emergency tone sounded shrilly from the companel.
