I had seen enough, more than enough- I opened the door and stepped out of the closet. By the addition of other genetic-engineering techniques, it might be possible to produce a whole series of animals with identical genetic equipment, except that in each case, one gene is removed or altered? a different gene in each individual perhaps. The science of genetics would then advance in seven-league strides... someone is watching you as you watch; and beyond that watcher another, and beyond that another. . . . "Who are you?" asked Hinda. "What are you? And why do you seek the deer?" Her voice was abrupt, though polite.. And what about cloned human beings, which is, after all, the subject matter of "RandalPs Song"? The grey man turned and raised grey eyebrows. "There is my friend, my nearest and dearest." He pointed to the trunk. From it came a low, muggy sound: Ulmphf.. "Do you have a vacancy?" Besides, I have been too busy.. ". The two of them had managed to salvage most of the dome. Working with patching kits and lasers to cut the tough material, they had constructed a much smaller dome. They erected it on an outcropping of bare rock, rearranged the exhaust to prevent more condensation on the underside, and added more safety features. They now slept in a pressurized building inside the dome, and one of them stayed awake on watch at all times. In drills, they had come from a deep sleep to full pressure-integrity in thirty seconds. They were not going to get caught again.. "No insult intended, Mary," Weinstein said gently. "But, yes, we have. It's the opinion of the people Earthside that you couldn't do it. He whistled his animals to him and left the clearing as swiftly as he had come.. I helped her to her feet and into her cape. With a hand under her elbow, I guided her out of the Beta Cygnus, leaving the dancer staring open-mouthed after us.. Barry turned the book over in his hands, examining the cover and the photo alternately, but would no more have thought of looking inside than of lifting Madeline's skirts to peek at her underclothes. "If I remember you right, the second piece is on the top of a windy mountain so high the North Wind lives in a cave there.. ". "Third," said Lea, "what are they going to do to you?" Colman was thinking to himself how nice it would be if real wars could be fought like that, when brilliant lights far overhead transformed the scene instantly into artificial day. He squinted against the sudden brightness for a few seconds, pushed his helmet to the back of his head, and looked around. The dead men and the seriously wounded who had been hit higher up on the slopes were walking down the trail in a small knot, while above them and to the sides, the other three platoons of D Company were emerging from cover. More activity was evident farther away along the gorge in both direc-. tions as other defending and attacking units came out into the open. Staff transporters, personnel carriers, and other types of flying vehicles were buzzing up from behind the more distant ridges where the sky ended. Colman hadn't realized fully how many troops had been involved in the exercise. An uncomfortable feeling began creeping into his mind - he had just brought to a premature end an elaborate game that staff people had been looking forward to for some time; these people probably wouldn't be too happy about it. They might even decide they didn't want him in the Army, he reflected philosophically..Sure enough they found themselves on the edge of a round, silvery pool.
