The history of the Fourteen Kings of Havnor (actually six kings and eight queens, ~150-400) is told in the Havnorian Lay. Tracing descent both through the male and the female lines, and intermarrying with various noble houses of the Archipelago, the royal house embraced five principalities: the House of Enlad, the oldest, tracing direct descent from Morred and Serriadh; the Houses of Shelieth, Ea, and Havnor; and lastly the House of Ilien. Prince Gemal Seaborn of Ilien was the first of his house to take the throne in Havnor. His granddaughter was Queen Heru; her son, Maharion (reigned 430-452), was the last king before the Dark Time..on the banks of the Amia, when everybody else was sleeping. But, as there are ascetics among humans, some dragons are greedy for shining things, gold, jewels; one was Yevaud, who sometimes came among people in human form, and who made the rich Isle of Pendor into a dragon nursery, until driven back into the west by Ged. But the marauding dragons of the Lay and the songs seem to have been moved not so much by greed as by anger, a sense of having been cheated, betrayed.."Di," she said, and he looked up. She began to gasp for breath. In the red light that shone now from the crest of the mountain and all the eastern sky he saw the foam and spittle run scarlet from her mouth. Sometimes she clutched at him, but she did not speak again. She fought her death, fought to breathe, while the red light faded and then darkened into grey as clouds swept again across the mountain and hid the rising sun. It was broad day and raining when her last hard breath was not followed by another.."Maybe things are, for women. Azver the Patterner stood with his left hand holding his right hand, which her touch had burnt. He looked down at the men who stood silent at the foot of the hill, staring after the dragon. "Well, my friends," he said, "what now?" Away from the lanterns of the party it was dark, but she knew the way in the dark. He was there. The winter passed by, and the cold early spring, and with the warm late spring came a letter from his mother, brought by a carter. Diamond read it and took it to Master Hemlock, saying, "My mother wonders if I might spend a month at home this summer." "Thorion was the best of us all - a brave heart, a noble mind." The Herbal spoke almost in anger. "Probably not," the wizard said, and then, appearing to notice Diamond, put down his pen and said, "Young man, I must ask you if you wish to continue studying with me." "Wait here a little, if you please, Irian," the Doorkeeper said, and went into the room, leaving the door wide open behind him. She could see bookshelves and books, a table piled with more books and inkpots and writings, two or three boys seated at the table, and the grey-haired, stocky man the Doorkeeper spoke to. She saw the man's face change, saw his eyes shift to her in a brief, startled gaze, saw him question the Doorkeeper, low-voiced, intense. balm's just pig fat, I'd swear. "Look at all the stuff you can do," she said. "You couldn't do any of it if you didn't have a." "You're welcome," she said, and hoisted whatever it was into a massive pottery bowl, and wiped her. Very few people ever spoke to Gelluk unless he compelled them to. The spells by which he silenced, weakened, and controlled all who approached him were so habitual to him that he gave them no thought. He was used to being listened to, not to listening. Serene in his strength and obsessed with his ideas, he had no thought beyond them. He was not aware of Otter at all except as a part of his plans, an extension of himself. "Yes, yes, you will," he said, and smiled again. Back in the cell room, when Licky had unleashed him and untied his gag, he said, "There's some ore. Patterner put it, "bigger inside than outside".
