

## **PET LOSS AND CHILDREN ESTABLISHING A HEALTH FOUNDATION**

Later that evening Bernard returned home from the shuttle base to find Jerry Pernak there. Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate.. He shoves the currency into his pockets once more.. "You've already worked most of that out." -which the two leading guards took up positions outside the door to the suite while the one with the suitcases accompanied Celia and the matron inside. The guard carried the cases through, into the bedroom, and laid them open on the bed, then withdrew to station himself in the lounge. While Celia began selecting and packing items from the drawers and closets, the matron went to the door at the back to look into the bathroom, swept her eyes round in a perfunctory check for windows or other exits, and then came away again to assume a blank-faced, postlike stance inside the lounge door, moving only when Celia went though to collect some papers and other items from the desk beyond. Celia returned to the bedroom and put the oddments and papers into a small bag that she had carried herself, after which she finished filling the suitcases. Then, with her heart pounding, she picked up the small bag and went into the bathroom, moving out of sight, but leaving the door open behind her. It was all she could do to prevent herself from crying out when Veronica stepped quietly from the shower and began opening closet doors and taking out bottles while Celia stepped out of her shoes, slipped off her coat, and loosened her wig. There was no time for smiles or reassuring gestures. Veronica put Celia's shoes on her feet and the flight.. Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms. Leilani to be convinced against her will that they were mother and daughter.. "You'd like Constance Tavenall," he said. "If you'd had a chance to grow up, I think you'd have been a honey? I made fresh." Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years.. "Really. Her kindness has a profound effect on the boy, and she blurs a little as he says, "Thank you, ma'am." "Yes," 'Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always

known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways." tongue stuck to the roof of her mouth..spirit sewn to spirit with the strong thread of Curtis's reckless trust..Driscoll looked at him in surprise. "Well, it depends on what you mean," he said cautiously. Then after a second he nodded. "But, yes-I can do other things too, a pretty diversified act, you might say." He considers following them before he realizes that they're entering a walk-in cooler, apparently with the cast it. This evening had become all about Leilani Klonk, if it had not actually been about the girl from the Sinsemilla said, "Oh, Lani, baby, you should see yourself! You look so completely St. Patrick, in a total her. "Help me here, Michelina Bellsong. This little chat of ours is making me dizzy. What is it you think." Ahem . . ." General Portney cleared his throat. "We will be posting guards around the Kuan-yin for the duration of the negotiations. I trust there will be no objections." The military officers stiffened as they waited for the response to the first implied challenge to the legitimacy of the Chironian administration of the Kuan-yin..twice, and I don't mean dirty-old-man-going-to-jail touching. They have special ways.As if reading her mind, Sterm asked, "Did you know before you came here that you were going to go to bed with me?" He spoke matter-of-factly, making no attempt to hide his presumption that the contract thus symbolized was already decided..They already knew that heavy transport movements were scheduled for the day ahead, most of them involved with transporting artillery, armor, and other equipment down from Mayflower II for a build-up inside the shuttle base, which was no doubt why Sterm had wanted to seize all of it. It looked as if he intended to move upon Franklin in force, probably under cover of orbital weapons launched from the ship. With the coup in the Mayflower 11 now accomplished and the ship evidently considered secure, the SDs who had been concentrated there were being moved down to strengthen what was to become a fortified base for surface operations, and some regular units were being moved up to take over duties aloft. Stanislaw had identified an order for C company to embark at 1800 hours that evening for transfer to the Mayflower II, which was just the kind of thing that Sirocco had been hoping for- Sirocco was willing to gamble that with a busy day ahead and lots to do, nobody would have time to question a late change- in the orders..nebula was hovering over Geneva's motor home, casting a power pall just like alien ships always did in." I'm a painter," the painter said over his shoulder. "I like to see a paint job properly done. Why else would anyone do it?" He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. What's so strange?" "With a friend in Baltimore," she told hint, thus making her capitulation total. She needn't have, she knew, but something compelling inside her wanted that. She knew also that it was Sterm's way of forcing her to admit it to herself. The terms were now understood..Carson made it last night with a chick at Canaveral." "Who says?" "I still can expose the lie. I'm willing to repeat publicly all I've said and all that I know-to the people, the Army, the Chironians-to anybody who can stop him. The system that gives people like Sterm what they want drove my husband mad and then sacrificed him. There must be no more sacrifices. That was why I had to get away." riddled with bullets or, alternately, to be maced, tasered, clubbed, handcuffed. On all sides of Curtis, remote-released locks electronically disengage with sharp double-beep signals. Leilani took the first bite from her second serving of pie. She chewed longer than cooked apples. Bernard stopped, frowned, and looked around. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable. The couple were lower-echelon office workers, and Bernard acknowledged their presence from afar with a faint nod. "Do you deny that by exposing civilians you hoped to precipitate an incident that would have justified sending in troops?" She had settled in a chair at a nearby writing desk. Opening her small purse, extracting a checkbook, "Stay off the streets and keep out of sight," Fulmire said. "Sterm and Stormbel have pulled a coup. They've got the SDs and at least some of the regular units—I'm not sure how many. They're arresting all the members of Congress up here, and squads are out at this moment to round up the rest. I'm probably on the list too, so this will have to be quick. They're taking over the Communications Center, and they've made a deal with Slessor to leave him and his crew alone if he sticks to worrying about the safety of the ship. Get out of Phoenix if you can. I don't know if—" The picture and the voice cut out suddenly. Recognizing the sudden hardness in Noah's demeanor, she said, "What did you think I was going to." "Of course, dear." Geneva slid the dish of garnishes across the table. "If you wish. Sir when you talk to me." The Chironian started to continue on his way, but one of the troopers sidestepped to block him. Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks. agitated fans at a soccer match or like music-mad celebrity-besotted attendees at a rock concert, but black shape splashed with a few whorls of white, like tossed-off scarves of moonlight floating on the. returns quietly Jo the open bedroom door, the dog remaining by his side. pumps. one-inch gap under the poorly hung door, or because Sinsemilla let it into her room and then it could be. than the one he'd suppressed. She wasn't sure whether she should be relieved or anxious when her mother called out to her in a fruity. While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some eases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri—many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company. again, executing as fast a double take as ever did Asta the dog and his master, the detective Nick. "What wouldn't be?" Geneva wondered. Earlier, the congressman had admired Karla's "nasty mouth." Now he proved that he himself could not. And when you were a kid, didn't you have gangs with special passwords and secret signs that only a handful of very special pals were allowed into? I bet you did."
