"Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach." undulant glow across her face, brightening her eyes but failing to dispel the shadow of confusion in which. "I still don't like it," Borftein grumbled to Kalens after the meeting was over. "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was-himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running..toward a new point on the compass..The others exchanged puzzled looks. "Like what?" Nanook asked.. "Yes, I know he's a bit of a barbarian, but unfortunately his support is important. And if there is trouble later, it will be essential to know we can count on him to do his job until he can be replaced." During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. Their methods had merit, but produced Borfteins as a by-product.. "Well, I know he shot me, of course, but I have no memory of it. I remember him shooting Vernon, and.Geneva shifted position on the edge of the bed and took Micky into her arms. "Ci teaches English mainly, but mostly down on the surface. That is, when she's not working with electronics or installing plant wiring underground somewhere. I'm not all that technical. I grow olives and vines out on the Peninsula, and design interiors. That's what brought me up here--Clem wants the crew quarters and mess deck refitted and decorated. But yes, I teach tailoring sometimes, but not a lot." "Our own people have a right to expect the protection of a properly constituted legal system, and this planet falls even to possess one," Kalens argued. "I would have thought that the ethics of your profession would require you to cooperate with any measures calculated to establish one. The purpose of this provision is precisely that."..To Fallows, Merrick always seemed to have been designed along the lines of a medieval Gothic cathedral. His long, narrow frame gave the same feeling of austere perpendicularity as aloof columns of gaunt, gray stone, and his sloping shoulders, downturned facial lines, diagonal eyebrows, and receding hairline angling upward in the middle to accentuate his pointed head, formed a 'composition of arches soaring piously toward the heavens and away from the mundane world of mortal affairs. And like a petrified frontage staring down through expressionless windows as it screened the sanctum within, his face seemed to form part of a shell interposed to keep outsiders at a respectful distance from whoever dwelt inside. Sometimes Fallows wondered if there really was anybody inside or if perhaps over the years the shell had assumed an autonomous existence and continued to function while whoever had once been in there had withered and died without anyone's noticing..But no Borftein was present to save the situation at the side entrance. "I don't know anything about it," the SD Officer of the Day said from the screen in reply to the call the guard there had put through. "Those orders are incorrect. Detain those men." The guard on duty at the desk produced a pistol and trained it on Maddock, who was standing where he had been stopped ten feet back with Harding and Merringer. In the same instant the two SD's standing farther back covered them with automatic rifles..Pressing END on his phone, Noah frowned. "Character job?" "That was unfortunate, but it was beyond our control," Leon said. "I hope you do not believe that we were responsible." Bernard shook his head..Sooner or later, they'll come back here, run a search through the diner, around the motel, and wherever."What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires..Micky finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she.Sighing, Micky got up to retrieve a second beer from the refrigerator.. It was a communication from Leighton Merrick, the Assistant Deputy Director of Engineering in the Mayflower II, routed for comment via Headquarters and Brigade. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the request for transfer filed by Staff Sergeant Colman. Would the Military please notify his current disposition? "Looks like they're running out of Indians," Sirocco remarked. "What do you want me to say?" "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Sterm makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." hunger, and though the flood of saliva is bitter, it fails to diminish his appetite.. Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange.. These are not rich people, and he feels guilty about taking their money. One day, if he lives long enough, got my orders." "So have I." "That's different." "How?" years, alcohol had become a reliable part of her arsenal, as useful for keeping life at bay as were anger. Seated, bowing her head, Geneva offered a succinct but heart felt prayer: "Thank you, God, for." "What kind of outcome?" Thelma asked from beside Leon,. And so it was resolved that the first extension of the New Order would be proclaimed officially on the planet of Chiron, and Howard Kalens would be its minister. He had gained the first toehold of his empire. "It's the beginning," he told Celia later that night. "Ten years from now it will have become the capital of a whole world. With a. Her thin cold complaints melted into a moan of abject misery, and the moan quickly. that movies are life, Bobby said, "You're not the hero. My part's the male lead. You're in the Sandra. mysteries." Merrick drew a long breath, and his expression became grave. "Mmm Walters. That brings me to the other thing I have to tell you," he said in a heavy voice. "Officer Walters is no longer with us. He and his family disappeared from Cordova Village two days ago and have not been 'heard of since. He failed to report for duty yesterday. We must assume that he has absconded. He shook his head sadly. "Disappointing, Fallows, most disappointing. I credited him with more character." "Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the

inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents.. "We had to try," Wellesley insisted from beside Lechat. "We could not risk informing you that such people had seized control of those weapons. The decision was mine and nobody else's." Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . 'inhuman,' I guess you'd call it-cold, that kind of thing." Colman was becoming irritated again. No one on the ship had met a Chironian yet, but everyone was already an expert. All anybody had seen were edited transmissions from the planet, accompanied by the commentators' canned interpretations. Why couldn't people realize when they were being told what to think? He remembered the stories he'd heard in Cape Town about how the blacks in the Bush raped white women and then hacked them to pieces with axes. The black guy that their patrol had interrogated in the village near Zeerust hadn't seemed the kind of person to do things like that. He was just a guy who wanted to be left alone to run his farm, except by that time there hadn't been much left of it. He'd begged the Americans not to nail his kids to the wall--because that was what his own people had told him Americans did. He said that was why he had fired at the patrol and wounded that skinny Texan five paces ahead of Hanlon. That was why the white South African lieutenant had blown his brains out. But the civilians in Cape Town knew it all because their TV's had told them what to think..been in years..In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and 'therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along..you are." "Not me, not bat-blind Geneva." The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Aren't they paying captains well these days?". Stern's face darkened, and his mouth twisted into an ugly grimace. His suave veneer seemed to peel away as his eyes widened, and far an instant, even from where he was sitting, Bernard found himself looking directly into the depths of a mind that was completely insane.
