

## **PLANT RESPONSE AS A MEANS OF PHYSIOLOGICAL INVESTIGATION**

THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly.. "You've got your father's name," Geneva said hopefully. "If he could be found . . .". Fallows appeared surprised. "I thought it was closed off for another two days. Isn't the Army having an exercise in there or something?". Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all?. "SDs," Colman said at once. "It was- a professional job." "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." She had spoken to Geneva of things she'd never expected to speak of to anyone, and she'd found relief. excitable and shallow and, in general, dorky to the max.. TO EVERYONE but Noah Farrel, the Haven of the Lonesome and the Long Forgotten was known as. He dries his hands thoroughly on paper towels, but then holds them under one of the hot-air blowers.. Even after stepping off the splintered fence staves onto the grass, the girl moved awkwardly. "We're." "Uh, yeah.".. of aspirin.. whenever he was admitted. Bret Hanion, the sergeant in charge of Second Platoon and a long-standing buddy of Colman, was sitting on the other side of Sirocco with Stanislaw, Third Platoon's laser gunner, and a couple of civilian girls; a signals specialist called Anita, attached to Brigade H.Q. was snuggling close to Colman ~with her arm draped loosely through his.. Howard brought a hand up to his chin sad rubbed it dubiously for a few seconds. "Mmm . . . Stern. I can~ make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Stern could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being.".. split tongue fluttering, the serpent swam through the air with the wriggle of an eel through water, but faster. She glanced down at her feet. No snake.. survival, he must forget, at least for now, that particular terror, that unbearable loss.. his hair.. cocaine for an evening of good smoking. But she didn't have the capacity for violence. Violence required. "I have. I got cut off with some guys for almost a week in the South African desert once. All you think about is water. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels.".. A knock answered the question. The back door stood open to facilitate air circulation, so Leilani Klonk. "Sure," Chang said confidently. "I'll give you a call when I've talked to Adam. He's the friend. Would Jay like to go too."?. okay, too.. In becoming brothers, they will change each other. The dog might become as easily humiliated and as.. Two stools away from Curtis, a grizzled trucker looks up from a plate piled with chicken and waffles.. "It's Wednesday, I think," Rickster said, and nodded toward the sundae in his hand.. Jay sighed again. "I guess not. Let's go. It's one stop along the maglev line.".. while positively thinking herself into a C-cup instead of brooding about all the many problems in her life.. Congress? sometimes he calls it the Parliament of Planets? and those plans will take time to carry out.. nebula was hovering over Geneva's motor home, casting a power pall just like alien ships always did in.. battle.. Lechat shook his head. "It wasn't necessary. In a few more days Ramisson would have been elected, almost certainly. Then everything would have worked itself out smoothly and tidily. This action complicates everything again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months.".. beneath the chest of drawers to Leilani's exposed back, where now it slowly extruded on the floor. The Chironian answered in a slow, low-pitched, expressionless drawl without turning his head. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. When

they moved into a ravine, we covered both exits with riflemen and let 'em know we were there. Gave 'em every chance . said if they came on out quiet, all we'd do was turn 'em in." The Chironian inclined his head briefly and sighed. "Guess some people never learn when to quit,".A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..the day.".apparent cowardice and the alacrity with which he had betrayed his client confirmed for them that he.Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..plain grub.. "No, no." Micky hesitated. "Well, yes, that is what I'm doing. But I meant maybe you're talking around."I only live at Port Norday during the week," Kath said. "I've got a place in Franklin as well. It's not far from here at all.'.targets in a shooting gallery if it's on the wrong corner.". "Thank you, Ms. Donella. You're as wonderful as I just knew you were when I first saw you.".Lesley turned to Jarvis. "Power the tubes back up and get sop~e more guys down there fast. Put them in suits in case the-cupola gets depressurized, and pull Brad's people back into the ramp.". "Ghosts in your head," Bernard said. "Come on, Jerry, you're a scientist. Where's your evidence? Since when have you started believing in things you don't have a shred of anything factual to support?".Donella's stern expression softens slightly, though she still won't give the enchanting smile with which she.the situation, ready to strike again..rants of anger, self-loathing, self-pity. If these words filtered through the prison of the damped brain in.four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..came at hand; half measures were fatal. The shorter-term price to be paid was regrettable, but when had Nature ever offered free lunches? And in the longer term, what did it mean anyway? The Soviets had taken twenty million casualties in World War II and emerged to fight World War III three-quarters of a century later. And in that conflict the U.S. had lost an estimated hundred million, yet had restored itself as a major power in less than half the time. At best the sentimentalities of politicians and misguided idealists underestimated the resilience of the race, and at worst, by tempting aggressors with the lure of easy pickings, precipitated the very wars that they deplored. Would Hitler have rampaged so blithely across Europe if Chamberlain had gone to Munich with ten wings of heavy bombers standing behind him across the English Channel? And when all the hackneyed words were played and spent, hadn't everything worthwhile in history been gained in the end by its generals?.communicate with the spirit world, sometimes just talking to herself..Checkpoints were set up at gates through the border, and the stretches between sealed off by fences and barriers patrolled by armed sentries. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway..He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present..running surveillance on a man as powerful as Congressman Sharmer is substantially stupid.". "I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response..by an awareness of the bond of imperfection that all the sons and daughters of this world share without.Colman could only shake his head. "I don't know. Neither did Jay. That's what Fallows and whoever this other guy is want to find out.". "Boy, I've never seen a place like this.". "Because she knows what she's talking about, right?" Bernard said.. "Yeah," said Leilani, "and I was out waltzing all night." She stamped her left foot again, rattling her leg.Leilani said, "This is great potato salad, Mrs. D.".Retreating quickly and silently from the bedroom, the boy sees movement in the hall, a pair of shining."All right then," Cromwell challenged. "Now what do you think would make you walk like that when

people shouted at you?" potential wound..sooner or later she'd have to come out. To get food. To use the bathroom. They were going to be here a.Charles, in those old Thin Man movies..longer, twinkles diamond-bright and ruby-red. From this elevation, he can see the interdiction point to the."What other way is there?" Lechat Eked..He beams, for he and the waitress are clearly connecting now. "That's exactly right." "Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull..once more. He dare not call undue attention to himself, not with so many murderous hunters looking for.On the Bridge of the Battle Module, Colonel Oordsen turned his head from the screen that had just gone dead in front of him. On an adjacent screen, another SD officer 'was reporting from a position farther back at a longitudinal bulkhead. "Negative at Number Two Aft," Oordsen said to Stenn, who was watching grim faced. "They'll be through there in a matter of minutes."..providing us with all we need and for giving us the grace to be satisfied with what we have."..Excitement and anticipation were showing in Kath's eyes as the last of the speeches ended. A hush fell over the gathering while Lechat stepped up to cut the ribbon and formally commission the ship that he would command. Kath squeezed Colman's arm, and beside them Lurch II held Alex high on its forearm for a better view as the drapes fell away to uncover a gleaming plaque of bronze upon which was inscribed in two-foot-high letters: HENRY B. CONGREVE-the new name of the ship that would bring Earth's children home..Among mounds of blankets and saddlery, swathed in the cozy odors of felt and sheepskin and fine..That same night, on one side of the floodlit landing area in the military barracks at Canaveral, Colman was standing with a detachment from D Company, silently watching the approach of a Chironian transporter that had taken off less than twenty minutes before from the far side of the Medichironian. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead..Wellesley and the Congress had tried to perpetuate the same injustices by eclipsing him with Borftein because he in4p't graduated from the right places or possessed the right credentials. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all..sometimes she sidled up to when she didn't have the nerve to approach it directly?the truth was that her.strike force. This wasn't a way Leilani could live, not a situation she.deteriorating condition causes the boy concern. The trucker seems on the brink of a medical emergency.."I don't know," Jay said. "It's a lot to go into now, but we're certain they've got the capability. It's really that urgent, Steve. When can you get over?"..for Leilani, and perhaps none for Micky herself..cruising at sixty miles per hour.."No, Curtis. I just think you're too sweet for this world.".."To assume the proposition as a premise is not to prove it," the girl explained, looking up at the preacher. "Your argument, I'm afraid, is completely circular."..Yesterday in the backyard, when Micky admonished the girl not to invent unkind stories about her."So what about the nuts?" Jay asked. "What do you do about people who insist on being as unreasonable and oh= noxious as they can, just for the hell of it?"..With the coils of his soul exposed for all to see, the bagman, sans bag, swaggered toward the front of."Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. 'It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here."..among the flowers only until its terror passed. By nightfall it would have found a way back into the heated."Somebody has to run the Army. It's just his turn. He's as qualified to do it as anyone else."..appeared to be malformed.."Been having a nice chat, have you?" Sirocco asked. "Well, yes, actually, I suppose, sir. How did you know?" Sirocco waved at the corridor behind him. "Because it's happening everywhere else, that's how. Carson's talking football, and Maddock is telling some kids about what it was like growing up on the Mayflower II." He sighed but didn't sound too ruffled about it. "If you can't beat 'era, then join 'era, eh, Driscoll... for an hour or so, anyway. And besides, they want to show Colman something in the observatory upstairs. I don't understand what the hell they're talking about."..Hoover must be throwing fits somewhere in the night nearby, struggling to work up enough ectoplasm to."What?" Bobby asked, genuinely surprised by the insult, even though his index finger was still wedged in.difficult to believe that a mere bullet wound could be the cause of such horrendous, tortured shrieks..Geneva smiled. Well figure the rest out yourself." .complete nut. UFOs are only one of his interests. But since marrying old Sinsemilla, he's pretty much kept her pedigree in her purse and never flashed it, as did so many others of her economic station.. "Well, I think there's something to be scared about," Paula said. "Suppose they turn out to be really mean and don't want to mess around with talking at all. Suppose they send a missile up at us without any warning or anything .. I mean, we'd be stuck out in space like a sitting duck, wouldn't we. Then where would we be?".Lechat. "Speed is essential," Lechat said without preamble...--'~ "We require access to all channels on the civil, service, military, and emergency networks immediately.
