The adults were standing separately around the space while tiny helicopters flew around them.,RUSS's I Changed? When?."What did you find this time, Harry? A nest of international spies or an invasion from Mars?" I guess Harry Spinner wasn't much use to anyone, not even himself, but I liked him. He'd helped me in a couple of cases, nosing around in places only the Harry Spinners of the world can nose around hi unnoticed. I was beginning to get the idea he was trying to play Doctor Watson to my Sherlock Holmes..of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have..Sometimes the repetition of what we have just said will suggest a new meaning or possibilities of meaning we did not at first suppose to be there. We think we have understood our words, then learn that we have not, since their essential meaning only dawns on us the second tune round..All in all, I didn't find anything. Except for the books and the deck of cards, there was nothing of."Alas," said Amos, "he was blown away in the wind." He climbed up the ladder and handed the grey. It seemed self-evident to him that nobody in his right mind would want to get killed, or to be sent to places he'd never heard of by people he'd never met in order to kill other people he didn't know. Therefore nobody in his right mind would be in the Army. But since the Army was full of people whom it had judged to be acceptably sane and normal, it seemed to follow that the Army's ideas of what was normal had to be very strange. Now, to transfer into something like Engineering seemed on the face of it to be a perfectly natural, reasonable, constructive, and desirable thing to want to do. And that seemed enough to guarantee that the Army would find the request unreasonable and him unsuitable..The sailor fingered his key awhile, then said, "That is kind of you, I suppose."."On what did you base your analysis of the situational display, Sergeant?" Sirocco asked, speaking in a clipped, high-pitched voice mimicking the formal tones of Colonel Wesserman, who was General Portney's aide. He injected a note of suspicion and accusation into the voice. "Was Corporal Swyley instrumental in the formulation of your tactical evaluation?" The question was bound to arise; the image analysis routines run at Brigade would have yielded nothing to justify the attack.."Not a one in twenty miles."..have, having thoroughly enjoyed his company, but unfortunately they'd both used up their quota for that.by DAMON KNIGHT.A: Friends Come in Boxes.world as her highest mythic priority. The Intermediaries move to block his path. With an inarticulate screech, he ploughs through them, swatting them aside with the backs of his hands, kicking them out of his way with his heavy-booted feet. The Intermediaries break easily, and it occurs to me then that they are probably as disposable a commodity among the Sreen as tissue paper is among human beings. One Intermediary is left limping along after the captain. Through the clear pale skin of its back, I see that some vertebrae have been badly dislocated. The thing nevertheless succeeds in overtaking the captain and wrapping its appendages around his calf, bleating all the while, "No, no, you must abide by the edict, even as every other inferior species has, you must abide. . . ." The captain is having trouble disentangling himself, and so I go to him. Together, we tear the Intermediary loose. The captain flings it aside, and it

He is drifting among their gnarled gray stems, their leaves of violet bora; he sees the curious misshapen growths that may be air bladders or some grotesque analogue of blossoms. Now, at the edge of the screen, something black and spindling leaps. He follows it instantly, finds it, brings it hugely magnified into the center of the screen: a thing like a hairy beetle, its body covered with thick black hairs or spines; it stands on six jointed legs, waving its antennae, its mouth parts busy. They all looked uneasily at the whirligigs. "But I think they're not here yet I think we're going to see, over the next few years, increasing complexity in these plants and animals as they build up a biome here and get ready for the builders. Think about it. When summer comes, the conditions will be very different. The atmosphere will be almost as dense as ours, with about the same partial pressure of oxygen. By then, thousands of years from now, these early forms will have vanished. These things are adapted for low pressure, no oxygen, scarce water. The later ones will be adapted to an environment much tike ours. And that's when we'll see the makers, when the stage is properly set." She sounded almost religious when she said it..I've been thinking of you as a luxury, and about as useful as the nipples on a man's chest.
