Free energy has made the world rich, but the population is stable, even though early detection has wiped out most diseases. Everyone can do whatever he likes, providing his neighbors would not disapprove, and after all, their views are the same as bis own..Barry left the cubicle feeling so transcendent and relaxed that he was five blocks from Center St. before he remembered that he'd neglected to have his license revalidated at Window 28. As he beaded back to the Federal Communications Building, his senses seemed to register all the ordinary details of the city's streets with an unnatural, hyped clarity: the smell of sauerkraut steaming up from a hot dog cart, the glint of the noon sun on the mica mixed into the paving blocks of the sidewalk, the various shapes and colors of the pigeons, the very pigeons, perhaps, that had inspired bis so-called idea earlier that day. But it was true, what he'd said. All the pigeons were the same size."Don't tease me, Bertram. There's a boy here in the hotel. "Today the sustenance that our industries crave is not oil, but minerals. Fifty years from now our understanding of controlled-fusion processes will probably have eliminated that source of shortages too, but in the meantime shorter sighted political considerations are recreating the climate of tension and rivalry that hinged around the oil issue at the close of the last century. Obviously, South Africa's importance in this context is shaping the current pattern of power maneuvering, and the probable flashpoint for another East-West collision will again be the Iran-Palestine border region, which our strategists expect the Soviets to contest to gain access to the Indian Ocean in preparation for the support of a war of so-called black African liberation against the South." .the screen. His back is to you; you know you are safe, and you sit up. A jay passes with a whirl of wings, settles on a branch. With your own eyes now you can see Bruce, only a dot of

blue beyond the gray shake walls of the houses. In the viewer, he is turning toward you, and you duck again. Another voice: "Children, come in and get washed for dinner now.\*\* "Aw, Aunt Ellie!" The changes that the computers had detected were tiny--the merest beginnings of a trend which, if it continued at the present rate, wouldn't approach anything serious for a month or more. With only another three months to go before the ship reached Chiron there was no cause for alarm since the rest of the pump-group had enough design margin to make up the difference even without the backup. But even so, there was little doubt that Merrick would insist on the primary's being stripped down to have its bearings reground, alignment rechecked, and rotor rebalanced again. They had been through that routine twice already in the three months that the main drive had been firing. That meant another week of working in near-zero g and klutzing around in heavy-duty protective suits on the wrong side of the stern radiation shield. "Bloody pump," Fallows muttered sourly.. Everything seemed to be running smoothly at the crew stations beyond the glass partition behind his console, and the other displays confirmed that all else was as it should be. The reserve tank to Number 2 vernier motor had been recharged after a slight course-correction earlier and was checking out at "Ready" again. All the fuel, coolant, primary and standby power, hydraulic, pneumatic, gas, oil, life-support, and instrumentation subsystems servicing the Drive Section were performing well within limits. Way back near the tail, the banks of gigantic fusion reactors were gobbling up the 35 million tons of hydrogen that had been magnetically ram scooped out of space throughout the twenty-year voyage and converting over two tons of its mass into energy every second to produce the awesome, 1.5-mile-diameter blast of radiation and reaction products that would have to burn for six months to slow the 140-million-ton mass of the Mayflower II down from its free-cruise velocity.. "How far in did you live?".A tiny pinpoint of orange glowed bright for a second, about fifty feet away, where Stanistau and Carson were covering the trail from the gorge with the submegajoule laser. Colman scowled to himself. He turned his head a fraction to whisper to Driscoll. "The LCP's showing a cigarette. Tell them to get rid of it." ."Jain!" I scream at the sky until my voice is gone and vertigo destroys my balance. The echoes die. A.And he had had time to think about the problem of whom to save. In the screen, he had swiveled his chair and.That particular morning she was working through a set of torturous-looking exercises that made my muscles protest to watch. I always left ... notes for Mandy." ."I?m Columbine Brown," she said, as though that offered an explanation..He grinned and blitzed me. "Yeah, I guess. Most of the things you read about it are pretty nearly true. It's really a different world back in there, with almost no contact with the outside." .He turned for a moment to stare at the model of SP3 gleaming on the table beside him and then pointed to it. "Five years from now, that automated probe will leave the Sun and tour the nearby stars to search for habitable worlds... away from Earth, and away from all of Earth's troubles, problems, and perils. Eventually, if all goes well, it will arrive at same place insulated by unimaginable distance from the problems that promise to make strife an inseparable and ineradicable part of the weary story of human existence on this planet." Congreve's expression took on a distant look as he gazed at the replica, as if in his mind he were already soaring with it outward and away. "It will be a new place," he said in a faraway voice. "A new, fresh, vibrant world, unscarred by Man's struggle to elevate himself from the beasts, a place that presents what might be the only opportunity for our race to preserve an extension of itself where it would survive, and if necessary begin again, but this time with the lessons of the past to guide it." .Then before them was a rushing and a rumbling and a rolling like thunder, and from the blackness a.Gordon, too, and began saying Matthew. The silent 1924 Thief, with Douglas Fairbanks, looks pretty primitive in places but also has some special effects that can still awe. Alexander Korda's 1940 Thief doubles that in spades (the giant flying genie is just one of many), plus it has monumentally lavish sets. Even the Steve Reeves version seems to have been made with more care and wit than the rest of Mr. Reeves' spaghetti spectaculars, containing some good film magic of its own and a resounding score with one of those epic romantic themes (based, it must be said, on a theme from the Rozsa music for Korda)..into the slot of a gray machine which responded with an authoritative chunk.
