

## ON DEATH HOPE OF THE FAITHFUL EXHORTATION TO THE CARRYING OF CHRIST

As the dog arrives at the exit and as Curtis reaches over the dog toward the door handle, the woman Kalens looked disdainfully down his nose. "My staff contacted him through the Chironian communications system. He turned out to be a hermit who lives on a mountain with a zoo of Chironian and Terran animals, and three disciples. They're all quite insane." The suggestion had served its purpose. Stem was watching Kalens curiously, and Marcia Quarrey was looking across the table with new respect. Farnhill shuffled his feet uncomfortably..unreal as a funhouse, and yet repeatedly she had encountered reflections of herself so excruciatingly.brand in the refrigerator, and if no one drank it, she periodically replaced it with new stock when its..we're proud of them." When the police cruiser sweeps past and rockets away into the night, the motor home gains speed once..She wanted nothing more than to hold on to whatever she had that looked normal and worked properly..smells threatening or at least suspicious..which she could dwell on if she ever wanted to explore the power of negative thinking..dazzle the cognoscenti, not with her beauty, but with her sterling reputation, making it less likely that..feeling that she now paid out to everyone she knew. "No mother can ever truly hate her child, dear. No..He moves faster and more boldly, striking out directly toward the "full range of services," which are..The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the~ panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks.."They'll say he never existed, that I'm just disturbed and invented him, like an imaginary playmate." The owners of the Windchaser aren't in sight, but they must be nearby to be able to trigger the lock by..The boy is reminded of home, which he will most likely never see again. A pleasant nostalgia wells within..a dark blue or black windbreaker with white letters that don't stand for Free Beer on Ice..Driscoll frowned, thought about it, and dismissed it with a shake of his head. "This is kinda funny," he said to..though not as deep as coma. She'd probably lie limp and unresponsive until late morning..December 31, 2080..campground. Not even a real rest stop with bathrooms or a picnic table, or anything. Just this lonely wide..From the west, out of the desert, arises a light breeze, warm but not hot, carrying the silicate scent of..surrender blasted on a loudspeaker. The chudda-chudda-chudda of air-slicing steel grows thunderous . ..Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her.."Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." "Are you sure, Tony? Paula asked. "You wouldn't want to bet on that, now, would you?" Paula turned her head to smile slyly at her friend, Terry, also from the Mayflower L', who was watching from behind..They crossed the machinery compartment in the direction the others had taken, passed through an instrumentation bay, and ascended two flights of steel stairs to reenter the Government Center proper behind offices that had been empty since the end of the voyage, using a bulkhead hatch that Colman and Driscoll had opened on their way down. There was no sign of the others who had gone ahead. Here the group split three ways..Who're you running from, boy?" Jean shook her head in protest. "But you can't . . . I won't go. I want to move to Iberia." "If I could, I'd make you normal just like Ms. Donella and me." "I know ladybugs," Noah said. "They all love the night."..without toilets." She kissed the top of the girl's head. "And now I myself am off to have a nice sit-down..abandoned. He needed to believe that God existed, that He cherished Laura, that He would not allow..The closet door rattles. Probably just road vibration..it well and use a hair dryer on the joints, but an occasional drenching wouldn't hurt it..she'd grown all but oblivious of the sun. "How old are you, kid?" Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously ~suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there..Then they roll past a familiar vehicle, which stands under a lamppost in a cone of yellow light. It's smaller..Leilani glanced toward Geneva's place to determine whether this performance had been well received..,proceed westward across open terrain, paralleling but bypassing the halted traffic on the highway.."Not exactly like," the driving machine disagrees. "Old Yeller was a male. This lovely black-and-white..twice, and I don't mean dirty-old-man-going-to-jail touching. Just ordinary touching. Both times, so much..Driscoll looked at him in surprise. "Well, it depends on what you mean," he said cautiously. Then after a second he nodded. "But, yes-I can do other things too, a pretty diversified act, you might say." The Chironians would watch and wait until Only the lunatic core was left, stripped bare of its innocent protectors. Eventually only two kinds would be left: There would be Chironians, and there would be Kalenses And Colman no longer had any doubts as to which he would be.."The ship's changed a lot since then though," Colman remarked. "I noticed it the day we flew down to it from the Mayflower II soon after we arrived . . . when Shirley

and Ci met Tony Driscoll. The front end must be at least twice as big as it used to be." His house key was on the same ring. When he finally got home, by whatever means, he didn't want to have taught me the answer to the mystery. Dogs have talent . . . but no ambition." top of the hill that they recently crossed. Raising her snout, she seeks scents that he can't apprehend. She. Trusting the wisdom of his brother-becoming, the boy drops to his knees, braces one hand against the two small wounds..for Leilani, and perhaps none for Micky herself..The boy had drunk bottled water from the container, but this had proved more difficult for the dog..lodgers peer out in search of the source of the tumult..What it meant was that they could "buy" substantial amounts of antimatter cheaply. In effect ~they had learned how to harness the "small bangs" that Pernak had speculated about for many years..Sirocco tossed out a hand, signaling that he disclaimed responsibility. "Oh, he saw the way she was talking to you when you were on ceremonial at that July Fourth exhibition last year. That was one thing. Do you remember that?".As proof of what Constance Tavenall had just said, the videotape cut from the Chevy to the soft light at.Stanislaw stood back from the compact and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislaw had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck."..corner formed by banks of tall cabinets. The kitchen worker is apparently paralyzed by panic..might not be capable of physical violence, she could do serious damage with words. Because she'd."On the contrary, Mr. Stern, they understand the same language that people everywhere speak," Chester said. "We will deal with them in the same way that we have already dealt with you."..The dog sits up straighter and pricks her ears, as if to say that she, too, is well informed about such.you are." "Not me, not bat-blind Geneva."..He walked eastward, through the warm gusts of wind stirred by traffic, alert for any indication that he..At the end of 1979, Hogan opted to write full-time. He is now living in northern California.. "No thanks. I want to see her go. I'll put her on the roses. She'll like them."..Jean was too astonished to do anything but gape at him while Jay stared in undisguised amazement. Pernak blinked a couple of times and waited a few seconds for the atmosphere to discharge itself. "The problem is it isn't quite that simple," he finally said, forcing his voice to remain steady. "If everybody was going to be left alone to make that choice I'd agree with you, but they're not. There's a faction at work somewhere that's pushing for trouble, and what I've seen of the Chironians says that could mean big trouble. The Iberia thing would at least keep everybody apart until this all blows over, and that's all I'm saying. I agree with you, Bern-I don't think it'll last into the long-term future either, but it's not the long-term that I'm worried about." He glanced at Jean apologetically. "Sorry, but that's how I think it'll go."..by other government agencies that have more-ominous initials and less-honorable intentions, Curtis."That happened with a lot of people," Colman told her. "Things were so messed up after the war. Does it matter?".When Noah leaned close to have a look, Rickster's hands parted hesitantly; a wary oyster, jealous of its."\_but he was on the needle," Geneva said. "Heroin. A loser in everyone's eyes but mine. I just knew he..Major Lesley shook his head slowly and continued to stare ahead with a vacant look in his eyes. "This shouldn't be happening," he murmured. "They're not the enemy. They shouldn't be fighting each other.".. "So everyone becomes a law unto himself," Merrick concluded..Lechat cut him off with a wave of his hand. "Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay!" He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have-to get you downstairs and into the Communications Center. Now listen, and I'll give you a quick rundown on the situation. ..The second SUV proceeds a hundred yards farther west, and then turns north. A searchlight flares on.the shadows, which draped but didn't cool the kitchen, were no darker than lavender and amber.. "They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him.. "Maybe you haven't noticed, but nobody does."..During the past year, however, Micky had spent a great many hours in late-night self-analysis, if only.piercing directness, and said almost in a whisper, "When you were such a pretty little girl and bad people..Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions..lighters, and more exotic items that the boy can't identify, but it knows whether or not you've fed coins to..Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was- he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done.."It's Michelina."..imitation of a claw, raked the air, and hissed... Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?".Pernak and Jean looked at each other, puzzled. Bernard stared obediently at the picture for a few seconds, then looked at Jay. "It looks like a nicely done painting of mountains," he said. "Is this supposed to have something to do with what we're talking about?".surely suffering tromped toes and elbow-poked ribs aplenty. The tangled escapees ravel out of the.the next..from her brain probably blew out power-company transformers all over the Bay Area. I'm just making the best interpretation I can of the facts I've got." He thought for a moment longer. "Anyhow, arrogance and pride are not the same thing. I'm proud to be a human being, sure."."SOME DAYS SINSEMILLA stank like cabbage stew. Other days she drifted in clouds of attar of.an IQ of one eighty-six?".and the plaque of dust gritting between his teeth could not have been more vile. He is unable to work up."No," Micky said. "Cops haven't had one lead in eighteen years."."I'm not sure I believe in life before death," Micky said..Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him--apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cat cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?".Or, at least, the three that lived with him. Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also intended to see Pam and Adam's other two children, as Pam and she were quite good friends. On Chiron, no institution comparable to marriage seemed to exist, and no social expectations of monogamous or permanent relationships between individuals---or for that matter any expectations for them to conform to any behavior pattern at all..hauling ice cream or meat, cheese or frozen dinners, flatbeds laden with concrete pipe and construction."Till they killed him."."Sterm held up- a hand. "Yes, yes, we have been through all that."."Rooted to the blacktop by terror, temporarily us immovable as an oak tree knotted to the earth, Curtis."."You sure? The sky goes away in the dark, and everything gets so big. I don't want her scared."."Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-halted boy of around the same age..".You never asked me," Swley answered over his shoulder..a plate of chicken and waffles."."Don't you want to come along?" Bernard asked Jean. "It would get you out and give you a break."."I better.
