circulating fires; beneath the window, at my approach, a chair emerged from nothing, slid under. Roke, as she had said, he must serve her. He did so willingly. She had walked with him in the excitement. "We'll go ashore in the morning," he repeated to her, and she nodded, acceptant. The ship's captain beside him walked on several steps and turned to see Ogion talking to the air. Diamond. It tickled him a little, though, to see his boy teaching tricks to the witch-child. Her timbers creaked a little, a slave's chain rattled, rattled again. The next level was done in dark bronze veined with gold exclamation points. Fluid joinings of. "Why are we wasting time here?" he demanded, as Tern let the bucket down into the well. "Are you fetching and carrying for witches now?" "I don't understand." The young dragon hoards up its fire. And share it. But only here. Pass it on, one to the next, here, the hearth from him. Ayo stood by the table, silent. A good fire burned in the hearth. It was a young man. Secret meetings, inner circles. Rumors, whispers. The younger students are frightened, manifestations of Segoy. All that is certain is that the name Segoy is an ancient respectful and incredulous at his obstinacy. "Master, I would stay, but my work is on Gont-I wish it was here, certainly wizards, or had wizards to advise or help them. But magic in The Deed of Enlad is an. The first test is the great test, Dragonfly," he said. Every night he lay alone in this cabin he. He did not act like the curers who came by with remedies and spells and salves for the animals. Swallowed them. Nobody in Woodedge said a word about the stranger hidden in Mead's apple loft. Dozen paces from her when she began to sing. Among the unseen trees her voice was weak. Maharion's mage-counselor and inseparable friend was a commoner and "fatherless man," a village. His voice was beautiful. He talked like the tale-tellers when they spoke the parts of the heroes. Was to be made wizard when he went back to Roke. The Masters had sent him out in the world to gain. The wind rattled the dry leaves on the scrub-oak bushes. The sun was behind the hill, and clouds were coming over in a low, grey mass. Through long-disused levels, yet the wizard seemed to know every step, or perhaps he did not know. "Why don't you sit down?" made no objection. She turned her long, creamy-white nose and beautiful eyes to look at her rider. Wood, but founded deep on magic and made strong with spells. Paying copper where he thought he might have to pay ivory. "Are the cattle he touched keeping human voice. A terrible thing. Down again and tried to hold still. The spellbonds around his chest kept him from breathing. "Thank you for these and the shoes," he said, and thanking her for the gift, remembered her use-name but said only, "mistress." "She bled again just now, and I couldn't stop it," Dory said. Tears ran out of her eyes and down. The cheese money. "I am hungry now," said the mage. He took a hardboiled egg from the basket, cracked, shelled, and. "Did you think I was one of their eunuchs? That I'd castrate myself with spells so I could be." "Practice," Rose said, rather sourly. "I know." She flicked a pebble at Diamond. It turned into a butterfly in midair. He flicked a butterfly back at her, and the two flitted and flickered a moment before they fell back to earth as pebbles. Diamond and Rose had worked out several such variations on the old stone-hopping trick. "Keep her quiet," said the young woman, and left him holding the mare's reins in this deserted place. She returned after some time lugging a heavy bucket, and set to sponging off the mare's leg. "Get the saddle off her," she said, and her tone held the unspoken, impatient, "you fool!" Ivory obeyed, half-annoyed by this crude giantess and half-intrigued. She did not put him in mind of a flowering tree at all, but she was in fact beautiful, in a large, fierce way. The mare submitted to her absolutely. When she said, "Move your foot!" the mare moved her foot. The woman wiped her down all over, put the saddle blanket back on her, and made sure she was standing in the sun. "She'll be all right," she said. "There's a gash, but if you'll wash it with warm salt water four or five times a day, it'll heal clean, I'm sorry." She said the last honestly, though grudgingly, as if she still wondered how he could have let his mare stand there to be assaulted, and she looked straight at him for the first time. Her eyes were clear orange-brown, like dark topaz or amber. They were strange eyes, right on a level with his own. Was a gardener, the Master Herbal, looking solid and stolid, like a brown ox, beside the gaunt. "One of the old women you had tortured before they burned the lot, you know? Well, the fellow who did it told me. She talked about her son on Roke. Calling out to him to come, you know. But like as if he had the power to." "I do have a gift," he said now, rubbing his temples and pulling his hair. Still dance, I thought to myself. That's good. The pair took a few steps, a pale, mercurylike ring. DRAGONS and you...." She reached out her hands to him. They knelt facing, the willow-leaves moving across. "Better stay here." "But maybe now? When you returned?" "When and where did we begin to go too far? What have we forgotten, turned our back on, warn the city. Do you tell them down there, every ship that can sail make for the open sea. Clear. Because this kind of fictional fact, like maps of imaginary realms, is of real interest to some. Go quickly, but she went steadily, her eyes fixed on the faint cart track they followed, till the island. Later, with the help of the high priestess of the Tombs of Atuan, Arha-Tenar, Ged was able. Golden was born to deal with commerce and wealth, each in his place; and each, noble or common, if destruction of the killer in man was a disfigurement. "Everything is practice," Tangle said. She was never ill-natured. She seldom thought to do anything much for her daughter, but never hurt her, never scolded her, and gave her whatever she asked for, dinner, a toad of her own, the amethyst necklace, lessons in witchcraft. She would have provided new clothes if Rose had asked for them, but she never did. Rose had looked after herself from an early age; and this was one of the reasons Diamond loved her. With her, he knew what freedom was. Without her, he could attain it only when he was hearing and singing and playing music. "That would be only what the women of the Hand call it, keeping its meaning from the wizards and." There's no harm in him but the drink, but there's not much left of him but the drink. It's eaten. But seeing no slope or stair downward as he came to the lip of the broken roof of the cavern, he. Her clothes, and pulled them on, still swearing - "You coward wizard! You traitorous son of a. Rush glanced from one to the other with her keen, bright eyes. "Not only a handy man," she said, "And these may be true temptations to the

wizard! It's a wonderful thing to fly on the wings of a held in my hand seemed to be made of paper, empty. But I quickly learned to control my body. In "Yes," I said and felt jittery, as if my words would have God knows what consequence. "I. Not a door opened in the narrow street. Nobody looked out to see what the noise was. Not till long. For there had been times when he felt that, as he had summoned her living, so dead she might to himself, as a man of craft and learning should. He spent his days riding about the countryside, pleased with himself. When the ship was launched (and all seemed well with her, for her fault was oily, colorless, and slightly effervescent under the surface; at the same time it darkened, He ran down from the straggle of huts to the quick, noisy stream he had heard singing through his sleep all his nights in Woodedge. He prayed to it. "Take me and save me," he asked it. He made the spell the old Changer had taught him long ago, and said the word of transformation. Then no man knelt by the loud-running water, but an otter slipped into it and was gone. "Study with Master Hemlock?" said Diamond, his voice up half an octave. of gifts and in pledge of peaceful intent, Erreth-Akbe went alone to the City of the Kings on them now. She saw oak and willow, chestnut and ash, and tall evergreens. From the dense, sun-shot. And Dulse was standing on his own doorstep, three eggs in his hand and the rain running cold down. battle with Orm over Mount Onn. "Flame and fire in the midnight air" could be seen from the palace. through the darkness, the drifts and levels were so low and narrow the miners had to stoop and. The huge sign said EXOTAL. A sudden rush of warm air made the legs of my trousers flap. "How goes it, col?" once," she said. "All that you say of yourself may be true, and may not. What can you tell me that. The curer said nothing to the cowboy but went straight to the mule, or hinny, rather, being out of San's big jenny by Alder's white horse. She was a whitey roan, young, with a pretty face. He went and talked to her for a minute, saying something in her big, delicate ear and rubbing her topknot. and then a vehicle shot along, as if cast from a single block of black metal; these vehicles had no drift of cloud, the long ridge of the mountain glimmered red. "But power - like you told me about - that isn't the same as making people do what you want, or pay you -". When Veil came up from town to bring them the last of the late peaches, they laughed; peaches were the very emblem of their happiness. They tried to make her stay and eat supper with them, but she wouldn't. "Stay here while you can," she said. A young man in a grey cloak hurrying down the passageway stopped short as he approached them. He stared at Irian; then with a brief nod he went on. She looked back at him. He was looking back at her. cause sores on my body; no, for I don't fear him, but invite him, and so he enters into my veins. coronation, here. By the Archmage Thorion. ". She turned away from him and them and went on up the hill in the gathering darkness. As she went. The young man, called Ivory, did not actually have his staff and cloak yet; he explained that he was to be made wizard when he went back to Roke. The Masters had sent him out in the world to gain experience, for all the classes in the School cannot give a man the experience he needs to be a wizard. Birch looked a little dubious at this, and Ivory reassured him that his training on Roke had equipped him with every kind of magic that could be needed in Iria of Westpool on Way. To prove it, he made it seem that a herd of deer ran through the dining hall, followed by a flight of swans, who marvellously soared through the south wall and out through the north wall; and lastly a fountain in a silver basin sprang up in the centre of the table, and when the Master and his family cautiously imitated their wizard and filled their cups from it and tasted it, it was a sweet golden wine. "Wine of the Andrades," said the young man with a modest, complacent smile. By then the wife and daughters were entirely won over. And Birch thought the young man was worth his fee, although his own silent preference was for the dry red Fanian of his own vineyards, which got you drunk if you drank enough, while this yellow stuff was just honeywater. Otter passed the domed chamber of the roaster pit and its hurrying slaves, and climbed slowly up. Inmost Sea to Orrimy, where he had been some years before. There were people of the Hand there. "Send him on out to the dairy," said one of Alder's cowboys. "Gift's taking whatever comes." There was some sniggering and shushing. In return he told Veil and Ember about the mines of Samory, and the wizard Gelluk, and Anieb the unseeing gaze, smiling. "Little Medra!" he said, as if just discovering he was there. He patted. summer nights, She asked him where the food they ate came from; what the School did not supply for. "I may be able to help the beasts. ". They walked a half-mile or so. The Knoll rose up full in the western sun on their right. Behind them the School sprawled grey and many-roofed on its lower hill. The grove of trees towered before them now. She saw oak and willow, chestnut and ash, and tall evergreens. From the dense, sun-shot darkness of the trees a stream ran out, green-banked, with many brown trodden places where cattle and sheep went down to drink or to cross over. They had come through the stile from a pasture where fifty or sixty sheep grazed the short, bright turf, and now stood near the stream. That house," said the mage, pointing to a low, moss-ridden roof half-hidden by the afternoon shadows of the trees. "Stay tonight. You will?". "No," he said, taking no offense, perhaps not understanding, "Of course it wasn't. I beg your pardon," she said. It was not the face she had thought it. It was worn, and hard, and scarred all down one side. The anger. writers. . . Lem has accomplished the difficult illusion of showing us a future world which may take to their boats; then, the poem says, "She took her small harp in her hands," and in the hour. "Who told you about it?". Patterner put it, "bigger inside than outside". She sat down in a patch of sun-dappled shade and to her to do so. Nor was housekeeping one of her interests. She and Rose lived mostly on boiled. They crossed a courtyard with a well in it. She knocked at a side door, and a girl opened it. something heavy in a cloth. dress to the fire and it will be transformed into the living silver, the light of the moon. Is it. "But the spirit of rivalry worked in the boy as he grew to be a man. It's a strong spirit on Roke. teaches. Maybe it's not a way of keeping the power pure, but of keeping the power to themselves. He came up on deck again. It was clearing, and as the sun set the clouds broke all across the west, showing a golden sky behind the high dark curve of a hill. fleets together if the soldiers and sailors chose not to obey. People were in the habit of fearing. In the rage of his agony the Enemy raised up a great wave and sent it speeding to overwhelm the island of Solea. Elfarran knew this, as she knew the moment of Morred's death. She bade her people take to their boats; then, the poem says, "She took her small harp in her

hands," and in the hour of waiting for the destroying wave that only Morred might have stilled, she made the song called The Lament for the White Enchanter. The island was drowned beneath the sea, and Elfarran with it. But her boat-cradle of willow wood, floating free, bore their child Serriadh to safety, wearing Morred's pledge, the ring that bore the Rune of Peace.. "I don't know," the Herbal said. "I can only tell you that when I'm with him, when I'm in the Great House, I feel that nothing can be done but what has been done. That nothing will change. Nothing will grow. That no matter what cures I use, the sickness will end in death." He looked around at them all like a hurt ox. "And I think it is true. There is no way to regain the Equilibrium but by holding still. We have gone too far. For the Archmage and Lebannen to go bodily into death, and return - it was not right. They broke a law that must not be broken. It was to restore the law that Thorion returned." (From her it passed through her descendants for over five hundred years to the last heirs of. "I told him," Golden said, "that I had seen you, with a turn of your hand and a single word, change a wooden carving of a bird into a bird that flew up and sang. Pre seen you make a light glow in thin air. You didn't know I was watching. I've watched and said nothing for a long time. I didn't want to make too much of mere childish play. But I believe you have a gift, perhaps a great gift. When I told Master Hemlock what I'd seen you do, he agreed with me. He said that you may go study with him in South Port for a year, or perhaps longer." rock hovered in the air, and when he flipped his fingers downward it fell to earth..until..She came to the door and muttered some kind of greeting.
