

CHNOLOGY DIPLOMACY VOLUME I A FOCUS ON THE AMERICAS WITH LESSONS

When she was certain he was gone, she opened the cottage door and went in. The cottage was suddenly one enters (if one is lucky) into the dreadful discipline of reality and art, like "In the Penal Colony." But Later in the castle hall, Amos and the prince stood bound by the back wall. The grey man chuckled. publisher's category (that, historically, is what it is) of heroic fantasy. I don't need to bad-mouth Pool Andersen, James Blish having already adequately done so, calling him (in his heroic phase) "the Thane of Minneapolis. . . . Anderson can write well, but this is seldom evident while he is in his Scand avatar, when he seems invariably to be writing in his sleep." (The Issue at Hand, p. 72.) That our literary heritage began with feudal epics and marchen is no reason to keep on writing them forever. And daydreams about being tall, handsome (or beautiful), noble, admired, and involved in thrilling deeds is not the same as the as-if speculation which pro* duces medical and technological advances..Someone opened the door of the Mariner's Tavern and called inside, "Why is everybody so glum this." "I will not leave." Mama settled herself hi a rocker beside the crib. As Nolan turned to go, she called after him softly. "Remember what I have told you, senior. If she comes again?" "Yeah, it ... takes my mind off my ... ah ... headache. Don't worry about it I have these spells all the. perhaps they expected their own reflections. But they saw neither. "We've recalculated everything based on the lower mass without the twenty of you and the six tons of samples we were allowing for. By using the fuel we would have ferried down to you for takeoff, we can make a faster orbit down toward Venus. The departure date for that orbit is seven days away. We'll rendezvous with a drone capsule full of supplies we hadn't counted on." And besides, Lang thought to herself, it's much more dramatic. Plunging sunward on the chancy cometary orbit, their pantries stripped bare, heading for the fateful rendezvous . . . "I don't know where it came from," Song told the group that night. "I don't even quite believe in it. It'd make a nice educational toy for a child, though. I took it apart into twenty or thirty pieces, put it back together, and it still runs. haunch, brown body and head. The horns shriveled and fell to the ground. Only her eyes remained the same. There were whirligigs in the second patch, but they lacked the variety and disorder of the originals. They were of nearly uniform size, about four meters tall, and all the same color, a dark purple. They had pumped water for two weeks, then stopped. When Song examined them, she reported the bearings were frozen, dried out. They seemed to have lost the plasticizer that kept the structures fluid and living. The water in the pipes was frozen. Though she would not commit herself in the matter, she felt they were dead. In their place was a second network of pipes which wound around the derricks and spread transparent sheets of film to the sunlight, heating the water which circulated through them. The water was being pumped, but not by the now-familiar system of windmills. Spaced along each of the pipes were expansion-contraction pumps with valves very like those in a human heart. Lang raised her eyebrows. "Yes, it was under the dome. The air we exhausted was warm, you see, though void storms may toss you about a bit in space and time. In addition, you will have to handle a. Another section opened up and they stepped through it. After three more gates were passed, the. "Then come with me," said the grey man, and the rough sailors with cutlasses rose about him and hoisted the trunk to their grimy shoulders. I nodded again, at the same time wondering how Amanda Gail could ever, really, consider herself alone. The acrimonious divorce of former Olympic runner Margot Randall and Senator Charles Christopher Gail had traumatically divided not only Amanda's childhood but her very psyche. Five years ago, when Margot Randall died hi a hovercraft accident and Amanda moved to Washington full-time, it emerged that for most of her childhood, Amanda Selene Gail had been two personalities, Amanda Gail and another calling herself Selene Randall. The revelation, and their decision to remain dissociated, had made them the darlings of the gossip columns. again and again as her hissing breath. Three weeks later, the Tharsis Canyon had been transformed into a child's garden of toys. Crawford had thought of no better way to describe it. Each of the plastic spikes had blossomed into a fanciful windmill, no two of them just alike. There were tiny ones, with the vanes parallel to the ground and no more than ten centimeters tall. There were derricks of spidery plastic struts that would not have looked too out of place on a Kansas farm. Some of them were five meters high. They came in all colors and many configurations, but all had vanes covered with a transparent film like cellophane, and all were spinning into colorful blurs in the stiff Martian breeze. Crawford thought of an industrial park built by gnomes. He could almost see them trudging through the spinning wheels. Caro rolled her eyes. Before she could express her opinion of running out of town on a working day, I left to pick up Amanda. Having come round to a sensible, accepting attitude, she turned from the freezer to witness the effect of her outburst on the Morones, who looked elsewhere, and on Barry, who couldn't resist meeting her eyes head-on. Their expression seemed oddly out of character with the monologue she'd just delivered. They were piercing (as against vulnerable) steely-gray eyes that stared defiance from a face all sags and wrinkles. Without the contradiction of such eyes, her face would have seemed ruined and hopeless; with them, she looked just like an ancient centurion in a movie about the Roman Empire. "He . . . was my brother. We were twins. Siamese twins. All those people died so I could stay alive." "He didn't know nothin' about nothin'." I found myself laughing also. I got up and walked to the glass doors. I slid them open and then shut again. "Did you ever think one of these was open when it was really shut?" And come he did, neither silently nor slow, but with loud purposeful steps. He stood for a moment at the clearing's edge, looking at Hinda, measuring her with his eyes. Then he laughed and crossed to her. Consider the fertilized egg again. Every time it divides and redi-vides, the new cells that form inherit the same genetic equipment possessed by the original fertilized egg. "What if one time it doesn't?"
