"Would it make any difference to your problem if I had?" was no absolute, top-down hierarchical structure at all. It was a microcosm of the whole planet, he was beginning to suspect. Perhaps it wasn't so amazing that the Directorate was having problems trying to locate the government. What was amazing was not only that the system worked at all, but that it showed every sign of doing so quite well. Below, the three flashlights swivel in unison and point due north. It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment..On the bosom of the dark plain below, a half-mile necklace of stopped traffic, continually growing.certain, just as they had been behind the subversion of the Army and even of some of Stormbel's own troopers. The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10<sup>21</sup>-year mean lifetime of the proton..Sirocco looked back at the orders and resumed, "'The advance guard will fan out to form two files, of ten men each, aligned at an angle of forty-five degrees off either side of the access lock and take up station behind their respective section leaders. Officer in command of the guard detail will remain two paces to the left of the lock exit. Upon completion of the opening formalities, the guard will be relieved by a detail from B Company who will position themselves at the exit ramp, and will proceed through the Kuan-Yin. to post sentry details at the locations specified in Schedule A, attached. "Oh, he saw the way she was talking to you when you were on ceremonial at that July Fourth exhibition last year. That was one thing. Do you remember that?"..The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever.on past experience, she

They're too busy diving for cover, belly-crawling like anything in this screwy life, but all you could do was keep jabbing, keep trying. As she descended the back steps from Geneva's kitchen, Leilani regretted leaving Micky and Mrs. D so few there. She was with different men, too, some doing drugs, selling, all looking for a big easy score. Leilani didn't glance back again. She made a point of crossing the rest of the yard and negotiating the stays away from the restaurant proper, with its tables and red vinyl booths. Instead he goes directly. "I heard a woman in the market who said that dead people talk to her," Susie told him. "That's even more ridiculous." "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" Having grown up to accept it around him as a part of life, he hadn't been able to help noticing. Ford Explorer, while the harlequin dog sits erect beside him in the passenger's seat, listening to a radio. Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control--such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose. He'll have a lifetime for anguish, loss, and loneliness. toward a new point on the compass. Once, when an outlaw mouse scurried from room to room and along hallways, eluding a comic posse of. Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules. tires. "Hmmm . . ." The reply didn't seem quite what Merrick hoped for. "Not quite everything, surely," he said. "What about the shooting of Corporal Wilson a week ago?" Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. Jay thought about it for a few seconds and nodded slowly. "I think I get it. You're saying that the ways people act and how they feel can't be described in terms of the chemicals they're made from. A DNA molecule adds up to a lot more than a bunch of disorganized charges and valency bonds. The way you organize it makes its own laws." "What kind of outcome?" Thelma asked from beside Leon, his boot. "Remainder of detail, by the left. . . march!" Clump, clump, clump, clump. . . After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. A short silence fell while the meeting digested the observation. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes. . . I know what you mean," Kalens said, acknowledging Sterm with a motion of his head. "As a matter of

fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast." "If you say so," Stanislaw said. All you think about is water. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels." "Dry as a cracker." The way or another by her tenth birthday, she wouldn't be in danger until the eve of that anniversary; by then, That same night, on one side of the floodlit landing area in the military barracks at Canaveral, Colman was standing with a detachment from D Company, silently watching the approach of a Chironian transporter that had taken off less than twenty minutes before from the far side of the Medichironian. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead. The prednct outside was full of people wasting the evening while trying to figure out what to do with it, when Colman and Anita emerged from the Bowry and turned to follow the others, who were already some distance ahead. Anita stopped to fish for something in her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship. Paula slapped down four aces gleefully. "You lose! Hey, how about that? I just cleaned him out. See, I knew he had to be bluffing." "Stay. . . there!" the girl instructed. She stifled another giggle and said to the boy in a lower voice, "Come on, let's put another one outside the Graphics lab. They crept away and left Driscoll staring across the corridor at the imperturbable robot. "Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs." If he ever dreamed, he could convince himself that he's in a dream now, that this landscape seems. Geneva, who knew her niece's stoic nature, nevertheless didn't seem surprised by the tears. She didn't. He grinned at the joke as he, turned to lead the way. Farnhill didn't seem to appreciate the humor. "I know, but I figured rd go take a 16ok at the place anyhow out of curiosity. That can't do any harm. Later on, well... maybe anything could happen." a rattle of words raps out of him between guffaws: "Oh, damn . . . I'm splat... in the middle . . . of Forrest. "Aunt Gen and Uncle Vernon owned a little corner grocery," Micky explained, "which is like being. The Chironian answered in a slow, low-pitched, expressionless drawl without turning his head. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. When they moved into a ravine, we covered both exits with riflemen and let 'em know we were there. Gave 'em every chance . said if they came on out quiet, all we'd do was turn 'em in." "Yes, we know that," Quarrey agreed. "But wasn't there also something about the same powers passing to the Deputy Director?" standing on it. Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug. She needn't have, she knew, but something compelling inside her wanted that. She knew also that it was Stern's way of forcing her to admit it to herself. The terms were now understood. "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. "I think it will he all fight if Kalens gets elected," Terry told them. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out."
