"What kind of outcome?" Thelma asked from beside Leon, "I told her more than once. She punished me for lying. But she knew it was all true." "You've got it," Kath said lightly. Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." Colman asked..The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..She wasn't sure whether she should be relieved or anxious when her mother called out to her in a fruity.half a mile ahead, at the top of a rise, traffic has come to a complete stop.."You don't understand," Jay said. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say..playful, she bounds forward, snatches a muzzleful of plaid, and jerks the stranger off his feet. Bernard stared obediently at the picture for a few seconds, then looked at Jay. "It looks like a nicely done painting of mountains," he said. "Is this supposed to have something to do with what we're talking about?".Before Bernard could reply. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them..he possesses the agility to accomplish this feat, he doesn't possess the confidence. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug..Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie.
