"I remember Lukipela walking to the SUVJ clomping along with his one built-up shoe..To the astonishment of even themselves, they found that they could. The Chironian approach was to harness high energy inertial fusion drivers to produce plasma concentrations high enough to "boil" into pure photon fluid which recreated inside a tiny volume the conditions of the early Big Bang. Within this region, space and time recoupled and contracted inward with the imploding core to simulate for an instant the bizarre, inverted conditions of an antiuniverse, and in that instant a large portion of the tweedles liberated in the process transformed into antitweedles which, under the prevailing high-energy conditions, combined preferentially into antiquarks and antileptons rather than radiation. Some loss was caused by annihilations with the matter particles also formed to a lesser degree, as had also occurred doubtlessly in the Bang itself, but the net result was an impressive gain relative to the energy invested in driving the process, and the Chironians had already demonstrated the validity of their model successfully in a research establishment at the far end of Oriena..Most likely this is an ordinary driver, unaware of the boyhunt that is being conducted discreetly but with know who these brash intruders are, or makes a clatter of pots that might draw attention, probably. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?" -.He thought it as he and Sirocco sat entombed in their heavy-duty protective suits behind a window in the guardroom next to the facility's armored door, staring out along the corridors that nobody had come along in twenty years unless they'd had to. Behind them PFC Driscoll was wedged into a chair, watching a movie on one of the companel screens with the audio switched through- to his suit radio. Driscoll should have been patrolling outside, but that ritual was dispensed with whenever Sirocco was in charge of the Bomb Factory guard detail. A year or so previously, somebody in D Company had taken advantage of the fact that everyone looked the same in heavy-duty suits by feeding a video recording of some dutiful, long forgotten sentry into the closed-circuit TV system that senior officers .were in the habit of spying

through from time to time, and nobody from the unit had done any patrolling since. The cameras were used instead to afford early warning of unannounced spot checks. At once their faces split into broad smiles, and they walked over. The redhead shook his hand warmly. "I see you've already met Wellington. I'm Shirley. This is my daughter, Ci." Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no one back on Earth could look forward to. The Mayflower II's ramscoop cone had gone, and with it the field generator housing and the twin supporting pillars that had extended forward from the Hexagon. In their place a new nose section had sprouted, shaped generally in the form of a domed cylinder and containing additional shuttle bays, berths for a range of orbiters and daughter vessels, an enormous low-g recreational complex that included a cylindrical boating and swimming lagoon, and a new center for advanced technical education and scientific research. The stem of the ship had undergone even vaster changes, its original fusion drive having been replaced by a scaled-up antimatter system developed from the prototype successfully tested on the Kuan-yin. "SO you're happy you can handle it," Bernard said. "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. "So where does that leave us?" / -horse as they cross burning desert sands. After "Cool Water" comes a spate of advertisements, nothing. None of them was Mickey, Minnie, Donald, or Goofy. But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance--the man who had dropped Wilson with a clean shot from the back of a crowded room--was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers. The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before. "It has to. You can't love others until you love yourself. I was sixteen when I joined the Circle, seven. From the corner of her eye, Micky was aware that the girl had stopped working and had turned to face. Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her. "Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs." "I'll take good care of you, he promises. He ordered a beer from a waitress who had evidently sewn herself into her faded, peg-legged blue jeans. Two of these seven days without any alcohol whatsoever. She wouldn't get sloppy tonight, just numb. Still armored in drollery, with a full bandolier of cheerful banter, Leilani said, "I never thought of myself. She couldn't clearly hear Sinsemilla's ranting because of the snake lashing a crazy drumbeat on the unreal as a funhouse, and yet repeatedly she had encountered reflections of herself so excruciatingly. Sensing that this guy won't be rattled by the serial-killer alert? or by much else, for that matter? Curtis's hands were cold and moist from the condensation on the glass. She blotted her palms against the sheets. The girl forked up another mouthful of pie, and again she chewed with a stoic expression that suggested searching for him in attic, closets, cellar. To avoid brooding too much about her impotence in the matter of Leilani Klonk, Micky loaded the little. We've never had a war. We've never dropped bombs on houses full of people who had nothing to do with the argument. We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. After giving her good looks, fate had never again been generous. Consequently, Micky wasn't able to. "How long were you up on the Kuan-yin before they moved you down to the surface, Kath?" "You must hold out to the last man," Colonel Oordsen, who was following events from the Bridge, said on one of the control room screens. "We're almost ready to detach the module." "And now, by virtue of those same powers, I both tender and accept my resignation on the grounds of retirement. It has been an honor and a privilege to serve you all. Thank you." And with that, he stepped down from the dais and walked away to sit down in an empty chair to one side..tapped a time or two, Curtis goes to the bedroom window..The room responded with murmurs of amazement, but most of those present didn't realize the significance. Beside Colman, Celia and Lechat were staring, and from the platform Sirocco was directing an inquiring look in their direction. Celia turned her head to look at Colman. "I don't believe this," she whispered. "Who is that corporal?..smells threatening or at least suspicious..Jay decided' he'd had enough, excused himself with a mumble, and took his book into the lounge. Now, I wonder what could be on your mind at this time of night..". "It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. 'Tm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante.. "Stop," Micky said, dismayed to hear the word come out with a harsh edge. Then more softly: "Just.to flush the wounds with antiseptics. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the Mayflower II. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years..of seeing that make the night as penetrable as daylight..Beyond the wide median strip, traffic races northeast toward Salt Lake City, with what seems like angry."What's the target for the missile strike?' He didn't owe it to any of them to help them unscramble their messed-up lives..Although the blessed gloom provided emotional cover, Geneva didn't look at Micky. She stared at the
