Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses

to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..her nook was a private place. But the snake won't allow even a pretense of privacy. After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible."."Sure. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on. . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the. risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure."..In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg

Anita stopped to fish for something in. her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship;..he'd lost her. They must have been jumped from behind, but we don't know because they haven't come around yet. They look as if they'll be okay though. The others didn't know a thing about it."..Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..Fulmire gestured over the books and documents spread across his desk.
