Standing at the counter in the near dark, pouring coffee with the care of a blind woman, Micky said, "So." Love," Geneva declared, and her eyes grew misty with the memory of that long-ago passion. Farther along the corridor, toward the front of the care home, Richard Velnod's door was open. "I think they know that," Cromwell said. "They've spent. Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier-if that term could be applied-epoch in which the familiar laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics. HOSTESS. She's petite, pretty, speaks with a comic drawl, but is as formidable as a prison-camp guard. of the time, or at least when medicated, which was in fact most of the time. Of course, you had to. "Who's Colman?" Lechat inquired. Paralleling each other, these two vehicles move north, toward Curtis. They grind along slowly, sweeping. As his reflection slides away from him and as the interior of the wardrobe is revealed, Curtis sighs with. "What are all the changes around the back end?" Colman asked curiously. "It looks like a whole new drive system." whole army behind me, what can a rabble of ruffians with handguns do to stop me now?" He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood. excited because this is a situation encountered in all the adventure stories that he loves. Throughout the institution, the floors? gray vinyl speckled with peach and turquoise? were immaculate. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence. all your doubt, breathe it out, pluck it from your heart, tear it loose from your mind, throw it away, be rid. In three clinkless steel-assisted steps, Leilani reached the door. Ear to the jamb. Not a sound from the. It was a nice feeling. Bernard nodded. "Okay. We'll see you later then. Maybe you'd better leave that stuff here for now, Jay. If things turn out to be not quite the way you said, it might be a good idea not to go carrying it around." "And exactly what is that supposed to mean?" Sterm demanded. restless spirit guides the organization from which he so reluctantly departed, then two squads of FBI. Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swyley thought you were screwing around with Kalens's wife back on the ship." the motor home is in the shop for an overhaul, and Dr. Doom won't stay in a hotel or motel because he. motives and provided a sight-seeing attraction and historical curiosity that every visitor to the area had to ride on at least once. Veronica, a practicing architect, was there with Casey, Adam, and Barbara. Celia had declined to return to the ship but was watching from the home that she shared with Lechat - on the coast; and Wellesley had taken a trip from his farm in Occidena to see his old ship recommissioned and renamed. few more days, and if the creature was loose in the house, it could be anywhere, and once she came out. down. In this girl, Micky saw the hope of a good, clean life full of purpose? which she couldn't quite yet. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." "It never occurred to me that a congressman would keep a bunch of thugs on the payroll." the advertising copy on boxes of cornflakes, or in the patterns made by flocks of birds in flight. "Ghost Riders in the Sky" is followed by "Cool Water," a song about a thirst-plagued cowboy and his. The bathroom door has drifted half shut behind him, so he can't see the owners. They can't see him. Jay jumped up and ran to a closet for a jacket. He looked at Jean as he pulled it on. "Yes, Mother, I'll be careful." magic or money, not with force or doctors or laws or sweet talk, nobody EVER the boss of me!" "When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." Celia set her glass on the table and found that she needed a moment to reorient her thoughts, even though she had known this was coming. "I'm concerned over this latest threat to evict Chironians from Phoenix. It's not

They descend the gently sloped embankment and. "Well, it sure doesn't pay any money." Colman turned his head toward Hanlon. "What do you say, Bret?" between them.. "The Giant is not slain," the tall, muscular, steely-eyed hero declared to his loyal, wavy-haired aide as they stood in front of an Air Force VTOL on a peak of the San Gabriel Hills above the Los Angeles ash-bowl. "It must sleep a while to mend its wounds now its task is done. But it will rise again, hardened and tempered from the furnace. This will not have been for naught." The figures and the mountain shrank as the view widened to include the setting sun that would see another dawn, and the music swelled to a rousing finale of brass and drums backed by what sounded like a celestial choir.. "Sounds great. I will. How do I get directions--from the net?" Only Aunt Gen, last of the innocents, would call them boyfriends? those predators, pariahs proud of. "Howard Kalens, no doubt about it," Bernard Fallows was saying. "If we've only got two years to knock the place .. into shape, he's lust the kind of man we need. Remember: Only a statistically insignificant. "We'll work out something. Where and when?" Hanlon said. Colman looked over at Veronica.. Everybody looked at Colman again, this time with a new interest. A different mood was taking bold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them.. "You'd like Constance Tavenall," he said. "If you'd had a chance to grow up, I think you'd have been a." My birthday was February twenty-eighth. That was Ash Wednesday this year. Do you believe in fasting. As their speed continues to fall precipitously to fifty, then below forty, under thirty, as the brakes are. Having risen from her knees as Sinsemilla whirled upright, Micky sidled toward the fence, reluctant to. Forgetting to use the brace's mechanical knee joint, swinging her caged leg from the hip, Leilani hitched. "You look as if you might know something about it," Lesley said to Colman. "If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation.. "I bet he's giving himself a hand job right now, watching us." In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. He didn't think he. "I haven't had dessert yet," the girl said, and she retreated out of sight.. "One week, and already you're a master of hugely befuddling conversation. Oh, I'd love to hear what a. Her back is to him, but as he approaches her, he can see that she's approximately the age of the man.. Jean looked at him with a worried face. "Jay's come back with all these things, and he's trying to say he got them all for nothing. He's claiming that anyone can just help themselves. I've never heard such nonsense." "It's this whole business of not paying for anything," Stanislaw said at last. "We come in here and drink, we go into restaurants and eat, we walk out of stores with all kinds of stuff, and none of it costs anything." He sat back, looked from side to side for moral support, got plenty, and shook his head helplessly. "It seemed too good to be true at first, but that soon wears off. It's not funny anymore, chief. It's getting to all of u~". In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg or anywhere else you have to. I want every one of those men picked up. Peterson, tell Admiral Slessor to have every available shuttle brought up to

Now they are gone into the night, either unaware that they have passed within feet of him? or alert to his. "He wouldn't get away with it, surely," Lay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?" THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly. Although the boy is mortified by this discovery, he's also still unable to get a grip on the tossing reins of. away," and with vodka she tried but failed to rinse the taste of that admission from her mouth. He's losing his appetite for the hot dogs, but he. She had been drunk only once since moving in with Geneva a week ago. In fact she'd gotten through. Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others. information than all five human senses combined, so he doesn't nudge her out of the way. Nanook sighed heavily. "We have had one or two things like that from time to time," he confessed. "But it never lasts. In the end a bigger bunch gets itself together and gets rid of them. It comes to the same thing--they end up getting shot anyhow." Jay was beginning to see the connection. "Measures up with respect to what?" he asked. "What's the standard?" kissing cousin to the Grim Reaper, try reading the news. He hasn't been on the front pages for a while, with any analytic passion? why he felt obliged to slander himself. He's sincere in his intention to pay for what he takes, but nevertheless he feels like a criminal. Minnie Mouse or at least maybe Snow White, but I was too busty." through their adversaries. Thank God, then, for his sister-becoming. Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" "Let's do that," Pernak agreed. "I'll take the things." "They can go on the maglev on their own," Murphy informed them. "The handler at the village terminal will route them through. You pick them up by the elevator in your basement. What's your number there?" "Maybe," Leilani continued, "you think that would be interesting conversation, even if sort of gross, but tip?" Nanook shifted his eyes and shook his head again. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here." blue eyes. "Now don't you wish you could see me as a mutant?" In the week following Lechat's brief term as Director, the laser link from Earth had brought news of the holocaust engulfing the whole planet. Then the signals had ceased, and for five years there had been nothing. No doubt many pockets of humanity had managed to survive, but mankind's first attempt to establish an advanced civilization had ended in failure - or almost in failure, for it had served its purpose; it had lifted humankind from its primitive, animal beginnings to a level where human, not animal, values could evolve, and it had hurled a seed of itself outward to take root, grow, and blossom at a distant star. And then it had died, as it had to. CHAPTER TWENTY. "Yes," Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways." between the half-closed drapes tantalized with the prospect of an image suitable for the front page of the
