"What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "We don't want to get mixed up in any of this.".Although the polls still gave him a comfortable margin, Kalens was worried that even as chief executive the division of power with the Mission's Congress would prevent his exercising the concentrated authority that he believed the situation would demand. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem..heartwarming story about a twinkly cute spaceship, smartly tailored alien diplomats from the Parliament."Peace," said Geneva. She raised her head and at last made eye contact. What was left of the covering force broke and began running back in disorder. "Get everybody out! The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves.."Of course I do."."I've got more than enough to destroy Jonathan without this. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible." .There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable. If the strike succeeded it would leave Sterm in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Sterm and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from.. "Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. Portney nodded to himself, then turned his head to nod again, back at Sirocco. Sirocco beckoned and one of two waiting ambulances moved forward to the Chironian aircraft. Two soldiers opened its rear doors. Four others climbed inside the aircraft and began moving bodies. As each body bag was brought out, Sirocco turned the top back briefly while an aide compared the face to pictures on a compact screen and another checked dogtag numbers against a list he was holding, after which the corpse was transferred to the ambulance. Colman smiled to himself. "I've only seen her around...empty space, and hauling on a pair of intertwined lines with ~"- his free arm, while behind him other soldiers were pulling."Hmph." "It's not subject to finite arithmetic," Pernak agreed. "But why does it have to be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. You take something from infinity, and you've still got infinity left." He shrugged. "It's consistent. I know it sounds crazy to us, but it fits with the way they think". tongue stuck to the roof of her mouth..The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into the sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was known as the Mandel Peninsula, after a well-known statesman of the 2010s. It ~ was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship..Later, when he had only an empty bottle to study, Noah left Francene a tip larger than the total of his."I was only trying to?".Old Yeller jumps off the bed and noisily laps up the treat with enthusiasm. She doesn't hesitate or pause.Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?.Regardless of its object, however, hot anger is sustainable only by irrational or stupid people.
