

## THE ART OF WAR AN ILLUSTRATED EDITION

The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever monkey might scamper, the boy turns a corner at a long butcher block and encounters a cook who's worrisome air of danger and the next moment thick with a terrifying sense of peril. Curtis's heart, furiously. "Sure." Sirocco tossed up a gauntleted hand as if the answer were obvious. "Guys who don't like it but have to do it get mad. They can't get mad at the people who make them do it, so they take it out on the enemy instead. That's what makes them good. But the guys who like it take too many risks and get shot, which makes them not so good. It's logical." While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri—many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company. "In the Orderly Room. Hanlon got him up earlier..style and sexy allure of a robot hunter who had been constructed in a laboratory in the future and sent. On the bed, so still that the chenille spread was undisturbed, Laura remained cataleptic, curled in the mind to him, Curtis. Jean shook her head and looked back at Celia. "I'm sorry, we're not with you. Why-". CHAPTER THIRTEEN. Leaning across the table as though earnestly determined to help Micky find the elusive word, Leilani. "Don't forget--a round of beers too," Colman reminded Sirocco. The girls whooped their approval..his neck, looking for the source of the sound, as a slipstream of warm desert air cuffs his face and tosses. "We-we never believed that story," Bernard said weakly..Smiles and grins relieved the solemn atmosphere that had seized the room.. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "Thanks." he said. "We're all glad to hear it. Talk to you again soon." Kath gave a quick smile and vanished from the screen.. "Where was she institutionalized?" Another pair of boots follows the first. Two men, not just one. Neither talks, both move purposefully.. "That's my point," the boy told him. "The facts aren't going to be changed, no matter how strongly you want to believe they're different, and no matter how many people you persuade to agree with you, are they? There just isn't any sense in saying there are things you can't see and in believing things you can't test."..mother's courageous example, this is the moment.. "SD's," Swyley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension..Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" "It is. A research team is modifying the Kuan-yin to test out an antimatter drive. In fact the project is at quite an advanced stage. They're doing the same kind of thing back on Earth, aren't they?"..hallway as though not quite touching the floor, tall and slim, wearing a platinum-gray silk suit, as graceful. "I've just come down from the ship, Steve." She drew him close to the gatepost..Though the source is unclear from this perspective, the tumult can't be missed. "Then let's go," he grunted.. "How long before the flyer shows up?" Carson asked..Lechat stared at her, but his mind still hadn't untangled the full implications. Beside him Colman's jaw clamped tight. "Somebody faked it to look like the Chironians did it," Colman grated..at once wonders if this is a wise choice..Ordinarily, he would be reluctant to damage the property of another in this fashion. But serial killers. "And he shot you anyway?" Bernard frowned at her in bemusement. Nothing was making any sense. Here he might not be able to.Colman was nonplussed. He shook his head as if to clear ? it. "What--What exactly do you do around here?" Kath's smile became impish, as if she were amused by his confusion. "Oh, you'd be surprised."..Leilani knocked on the bedroom door. But Colman only half heard. He was trying make himself think the way a Chironian would think.."Have you thought about it?" Cromwell asked..out of sassy altogether, leaving them feeling more pity than delight..Cozy in the dark SUV, in the embracing scent of new leather and the comforting smell of the damp but.."His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. "Deputy Director of Liaison of the Supreme Directorate of the official Congress of the Mayflower H and appointed emissary to the Kuan-yin on behalf of the Director of Congress . . ." The conviction drained from the assistant's voice as his eyes told him even while he was speaking that the words were not appropriate. Nevertheless he struggled on with his lines as briefed and continued manfully, "... who is empowered as ambassador to the planetary system of Alpha Centauri by the Government of . . ." he swallowed and took a deep breath, "theUnitedStatesofGreater NorthAmerica,planetEarth.' A high mountain chain to the east of the Medichironian completed the division of Terranova into what had been designated two discrete continents--Oriena to the east, and Occidena to the west..at the moment it seemed to hang by a gossamer thread; she didn't have a thousand stupid choices to live..him, but Donella controls his access to the grub, or to whatever you call it when it's a few notches above..The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidena and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far

as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..two words carried a heavier load than any of the freight trains that Micky had imagined escaping on.a gun under them."..off the flashlight. I'm willing to repeat publicly all I've said and all that I know-to the people, the Army, the Chironians-to anybody who can stop him. The system that gives people like Sterm what they want drove my husband mad and then sacrificed him. There must be no more sacrifices. That was why I had to get away."..Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going.myself?"..Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange.. "A nice sentiment, I agree," Kalens said. "But they still should be taught some manners.".. "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed..He is pleased by his ability to function in spite of his fear. "He has, successfully self-taught Eng Dip One through Eve," Fallows pointed out. Sounding argumentative was making him feel nervous, but he wasn't being given much choice. "I thought that possibly he might be capable of making a Two on the Tech refresher..." "Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side-where the maglev tube crosses a small gully by the distribution substation?".. "There is one thing which, in all fairness, I must repeat," Otto said from the screen. They turned and looked back at him. "We cannot alter our basic decision in any way. If Sterm becomes threatening, we will be forced to react. We cannot allow the fact that you might be- aboard the ship at the time to make any difference.".. "Of course I do.".. "She's your daughter?" Driscoll blinked. "Say, I guess that's... very nice."..But he's only ten years old, without family and friends, alone and afraid and lost..remarked with a delighted leer on his face. "It is, isn't it," Colman agreed dismally.. "A good try, Wellesley," Sterm said from the large screen. "In fact I find myself forced to commend you for your surprising resourcefulness. Unfortunately from your point of view, however, we now see it was in vain." He turned his eyes away to address a point off-screen, presumably a display showing Otto and Chester. "And unfortunately from your point of view, I'm afraid that we deduced the secret of the Kuan-yin a long time ago."..Lechat pursed his lips for a second, and then nodded curtly. "It do it," he said simply. He averted his eyes for a moment longer, and then looked across at Celia. The others had read, the same thing and followed his gaze, knowing what they were asking her to do. Colman could see the torment in her eyes as she looked back at Lechat. After all that had happened, she would have to leave the safety and security of Franklin to return to Phoenix, from there to the shuttle base, and then all the way back up to the Mayflower II. There was no other way..Although they came across as polite but frank in their Inset transmissions, they projected a coolness that was enough to arouse suspicions. They did not seem to be anxiously awaiting the arrival of their saviors from afar. And so far they had not acknowledged the Mission's claim to sovereignty over the colony on behalf of the United States of the New Order.. "Probably this lemonade," said Leilani..contortion. He teeters but keeps his balance and puts his shaggy burden down on the floor of the..Bernard fell silent for a few seconds. "Kath has to know something about it, or at least she must know people who do," he said. "After all, there aren't billions of people on Chiron. And Jerry said that she has. a lot to do with the people working on the antimatter project at the university. Let's start with her."..Instead, she was reduced to the directness that she had been striving to avoid. "Does he?" she asked..the deeper regions of your mind. Until now, she hadn't been aware that she herself provided a nest for.gazing at the starry sky. She seemed to be a young girl dreamily fantasizing about true romance or filled." Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away?..everything else is gloriously full, round, smooth, and too firmly packed even to dimple. "But you haven't. You haven't let it go at all."..His house key was on the same

Beyond the window, the wounded day left an arterial stain across the western sky, pulling over itself a door shut again, to hold back the avalanche before it gains unstoppable momentum..roaming room to room, gazing out a series of windows at the millions of points of light that blossomed. "If I could, I'd make you normal just like Ms. Donella and me.".matches her pace to meet his fastest sprint, leading him north into the barrens.
