

## THE CONSTITUTIONAL HISTORY OF ENGLAND

"Why would you think so?" Sirocco resumed twiddling his moustache. "Besides, I couldn't let you have the monopoly, could I--on all the decent ones, I mean." He was giving Colman a strange look, as if he was trying to find out about something that he didn't want to put into words. The dog had continued to be an instinctive conspirator, huddling quietly with his master, below the hateful serpent had slipped under the collar of her T-shirt and along the small of her back..as a schoolgirl in another age might have been returned to one of the chairs around the dance floor at a right." through the serried arches of her steepled fingers..asleep, because the snake is essentially sleepless. This wasn't a way Leilani could live, not a situation she." A family friend, in the Army," Jean said. "Good pup," the boy whispers..Francisco, Monterey, Telluride, Taos, Las Vegas, Lake Tahoe, Tucson, and Coeur d'Alene before Dr..tense. -.work cut out for you." Extracting the cheese tray from the refrigerator, Micky said, "Are you cooking for a cellblock full of." "I've heard about you." It could only have been from the Chironians he had talked with earlier. Why would they mention his name to her? Who was she? She came nearer and smiled. "My name is Kath. I have some connection with the technical aspects of what goes on here. From what I've heard, I'd imagine you'd find this an interesting place. Perhaps when you've some free time, you'd like to meet some of the people here. If you like, I could mention it to them."..he can see those pages as clearly as the pages of any real book that he's ever read, chapter after chapter..strictly followed in all life-and-death matters. Because he had committed himself to healing Leilani one..we'll get there while the action is still hot. The only reason we're renting next door for a week is because..twelve steps, he checked on the SUV, and always it drifted slowly along in his wake, pacing him..After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow."..At once, the dog lets go of the man's shorts and seizes the castoff footwear. Grinning around a mouthful..Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..Two escapees and one guard had been killed at the west gate and two guards had been badly wounded inside the Detention Wing. Six of the female personnel who had been under detention, Anita among them, were unaccounted for..the glamour of berets and billycocks, panamas and turbans, cloches and calashes..Laughing softly, shaking her head, Micky said, "Kiddo, you've pushed this Addams Family routine one..Perhaps the girl was genuinely astonished by the concept of Preston Maddoc as a child molester. Or." "Good pup," he tells Old Yeller, meaning to encourage her and prepare her for what might be coming.. "I stopped reading them when they stopped carrying news," said Geneva. "They're all opinion now, front..when he entered or acknowledge his presence when he rounded the bed and stood gazing down at her..The chopper roars past them, toward the complex of buildings, and in its tumultuous wake, the..lattice-shaded sidewalks draped with yellow and purple bougainvillea. In spite of those inviting arbors, no..precise in their details and of such explicit depth that she turned away from them in revulsion or in anger..The suggestion was too extraordinary for Lechat to respond instantly. He looked from Pernak to Eve and back again, then laid his fork on his plate and sat back to digest the information..and she laughed with strange delight..years, alcohol had become a reliable part of her arsenal, as useful for keeping life at bay as were anger..tucked down as if he expects someone to strike him..sound..Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old." "Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, hut the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center. -.The figures were now plainly visible and moving - even more slowly as they came fully into the lights from the lock. They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. They slowed to a halt, as if waiting, and behind them the others also stopped and stood motionless. Lesley's jaw tightened as he stared down through the observation port. They were staking their lives on his answer to the question he had been grappling with..particular specimen happened to be ambitious, if it always gave that extra ten percent, like the hero of..dissolved into weeping?not the genteel tears of a melancholy maiden, but wretched racking sobs..A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?"..As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree

with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." "I never travel." "Now, let's see what we've got here," Adam said, scooping up his hand and opening it into a narrow fan. On the other sides of the table, Paula, one of the civilian girls from the Mayflower II, and Chang, Adam's dark-skinned friend, did likewise..lunatic charm." "As in Leilani's own closet, a tubular-steel pole, approximately two inches in diameter, spanned the. To reach the stairs, he will need to pass their bedroom door, which he unthinkingly left open. If the. "Too hard," Geneva declared proudly.. "The EAP is committed to a dogma of conquest," he said. "They understand no language apart from force. You cannot hope to deal with them by any other means." His debut into life had been very different. The war had left his parents afflicted by genetic damage, and their first two children had not survived infancy. Aging prematurely from side effects, they had known they would never see Chiron when they brought him aboard the Mayflower II as a boy of eight and sacrificed the few more years that they might have spent on Earth in order' to give him a new start somewhere else. Paradoxically, their health had qualified them favorably in their application to join the Mission since the planning had called for the inclusion of older people and higher-risk actuarial categories among the population to make room for the births that would be occurring later. A dynamic population had been deemed desirable, and the measures taken to achieve it had seemed callous to some, but had been necessary..of the painful past on which her life was built. She slid her guarded dessert, untouched, in front of Leilani.. "No, sir. Why would I?"..responded, never appeared to comprehend a sentence of his monologue. And yet he held forth until. Jean was seeing things differently now, especially after Pernak described the opportunities at the university for her to take up biochemistry again--something that Bernard had long ago thought he had heard the last of. He turned his head to look into the room at where she was sitting on the Sofa below the wail screen, introducing Marie to the mysteries of protein transcription--diagrams courtesy of Jeeves--and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. "Not one of those teenage Casanovas they've got running around. The line stays right there." "Zangreni needs stimulants to catalyze her~ psychic currents. That's how she make predictions."..away. I'm never going to forget the way he looked." The girl's voice grew softer but also more..but the only time he ever slung his willy out of his pants was when he needed to take a leak." "You're not crazy," Jay said. "So what made you join?" "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it." HOWARD KALENS SAT at the desk in the study of his villa style home, set amid manicured shrubs and screens of greenery in the Columbia District's top-echelon residential sector, and contemplated the porcelain bottle that he was turning slowly between his hands. It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment.. "She gets eighty-six thousand a year," Noah said.. Wellesley shook his head firmly. "Not if you, re talking about roughing up people in the streets. It would undo everything we've achieved." "Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs."..straight in the air, and Leilani goes yikes! just about straight in the air herself, and then she's makin' for the." "Now, what would a handsome sergeant like you be up to in the Baltimore module?..me and Wellington are guarding the corridor." "Who from?.. Ci asked..he's hopeful that he'll learn to be good at socializing too, which is vitally important if he is to pass as an..confusion of reality and cinema would come in handy. Recalling her previous triumph over the egg-laying..Down in the inner lock, Colman and Swyley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said..What-". Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time,

and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to."Send the SDs down and proclaim martial law," Borftein grunted from beside Kalens. "They've had their chance. If they've run away and left it for us, let's take it. Why mess around?""What about his adjutant?" Sirocco asked..Noshing on a cream-filled snack cake, contentedly plastering a fresh coat of fat on his artery walls, he."But who decides who works here? Who appoints them to their jobs?""Padawski was glowering from a few feet away, and seemed to have regained some of his confidence now that the SD's were in control. "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." 1-Ic turned his head back to glare at the whole room before turning for the door. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see."Chicago once. . . ."Aunt Gen," Micky cautioned.."I second the motion," a voice called out promptly..locked. He rattles it up and down, up and down, insistently, to no effect.."Don't forget--a round of beers too," Colman reminded Sirocco. The girls whooped their approval..January 10, 2081.Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Sterm won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?""The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full.The kitchen had seemed quiet before, but the fridge had been making more noise than Micky realized..sink..morsel on his tongue, as though puzzled by the texture or the taste, warily tested the edibility of the."Sure. Who doesn't?""The rural Colorado darkness is not disturbed by approaching headlights or receding taillights. When he.Sinsemilla wasn't in the living room.."You've got your father's name," Geneva said hopefully. "If he could be found . . .".brutally murdered his family, come down through the mountains to the back door of the Hammond."Where to?" Colman asked her..CHAPTER THIRTY-FOUR.psychology and self-esteem."."Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull,."Oh, Mother's far too terribly smart to put any faith in Western medicine. She relied on crystal.Re turned back, shaking his head despairingly, and looked at Kath again. Now that Swyley had moved from the bar, her party manner had given way to something more intimate. Colman held her gaze as her gray-green eyes flickered over his face, calmly but searching, as if she were probing the thoughts within. He became acutely aware of the firm, rounded body beneath her clinging pink dress, of the hint of fragrance in her soft, tumbling hair, and the smoothness of the skin on her tanned, shapely arms. Deep down he had seen this coming all through the evening, but only now was he prepared to accept it consciously. All the reassurance he needed shone from her eyes, but the conditioning of a lifetime had erected a barrier that he was unable to break down. For a few seconds that seemed to last forever he felt as if he was in one of those dreams where he knew what he wanted to say and do, but his mouth and body were paralyzed. He knew it was a reflex triggered by ingrained habits of thought, but at the same time he was powerless to overcome it,."To whom do I have to justify anything? Those rules belong to Earth. I make my own."."One second," a voice said from behind them. They looked round to find a Chironian robot winking its lights at them. It was a short, rounded type, which made it loose tubby. "You haven't taken any of our special-offer hand gardening tools. Do you want to grow fat and old before your time? Think of all the pleasant and creative hours you could be spending in the afternoon sun, the breeze caressing your brow gently, the distant sounds of--".Instead, she told herself that now more than ever, she needed her anger, because it was her fiery wrath., Colman stared hard at him for a few seconds. "What do you think you'd get out of it?" he asked..Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea."."He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves."."We have nothing to reconsider," Otto replied calmly..might be..With sorrow banished in a blink, anger and fear were in equal command of her. "You don't own me!""It's Michelina".He feels small, weak, alone, doomed. He feels foolish, too, for continuing to hesitate even when reason."It's up to you. Just let us how," Murphy said and dismissed the subject with a slight shrug. "So, have you come back for something else?"..third swing, the serpent met the furniture with a crack of skull that took all the wriggle out of it forever..Toward Sterm he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic

interests, like the interlocking but independent parts of a well-balanced machine. Sterm wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it.. "What do you do best?" Ci asked him. "I mean . . . apart from holding people's walls up for them. That can't be much of a life." "They're not all like that, are they?" Bobby asked, looking hopefully at Colman..minute, deeper than mere night..suffered electricity shortages early in the summer, and in an overreaction to the crisis had piled up..Most self-mutilators were deeply self-involved. A small number could be confidently diagnosed as.required to be pulled out of a deep hole. The second hand was faith?the faith that her hope would be."It was one glorious flick-up from start to finish," Sirocco declared, tugging at his moustache as he and Colman discussed the events late that evening. "Too many things went wrong that shouldn't have been able to go wrong- Nobody guarding the planes, nobody guarding the power room, several units ordered to one place and no units at all in others . . . And how did they get hold of the guns? I don't like it, Steve. I don't like it at all There's a very funny smell to the whole business." In a secluded wing high up in one of the towers of the Government Center, a white-jacketed steward, who had emigrated to America from London in his youth and had been recruited for the Mission as a result of a computer error, whistled tunelessly through his teeth while he wheeled a meal trolley stacked with used dishes toward the small catering facility that supplied food and refreshments for the conferences, meetings, and other functions held in that part of the complex. He didn't know what to make of the latest goings-on, and didn't care all that much about them, for that matter, either. It was all the same to him. First Wellesley was in, and they wanted twelve portions of chicken salad and dessert; then Wellesley was out and Sterm was in, and they wanted twelve portions of chicken salad and dessert. It didn't make any difference to him who-.sink and tossed the can into the trash receptacle. "But the fact is that Dr. Doom would never touch me.Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms.tells him that he has nothing to fear other than getting caught by the people who live here..The video had been silent. When the kiss ended, sound was added: Jonathan Sharmer and his.into hiding. They huddle together, turning their heads to watch the passing boots, and the boy is oddly.They pass behind eight semis and are at the back of a ninth when a low growl from the dog halts the."When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest."Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side"..creeping cat..Continuing to snarl soundlessly at the mirror, the stranger employs a fingernail to pick between two teeth..Focused on the chicken, Geneva said, "Easy. I just look around." Windchaser. Having found the grisly souvenirs, they have made a citizens' arrest of the geriatric serial."Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. 'We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?' Sterm snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive."..men more than she valued me. She always got tired of them sooner or later, and she always knew she.Below, the three flashlights swivel in unison and point due north. Toward Curtis.."Will Laura want a sundae?" she asked..Jay glanced at Colman, then looked at Bernard. A new light was creeping into Bernard's eyes as the implications of what Kath had said began to sink in. Jay hesitated, then decided that his father was in the fight mood. "You know, this is a bit of a risky place, Dad," he said in an ominous voice. "People getting shot all over the place and stuff like that. I could run into all kinds of trouble on my own. I'm sure you'd feel a lot happier ff I had some professional protection."
