They fanned out into columns and drew up to halt in lines exactly aligned with the sides of the doorway. Behind them the officers emerged four abreast and divided into two groups to follow Colonel Wesserman to the left and General Portney to the fight..Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-". "Logging on early," Waiters replied. "Merrick wants to talk to you for a minute before you go off duty. He told me to tell you to stop by the ECD. You can take off now and see him on the company's time." He moved over to the console and nodded at the array of screens. "How are we doing? Lots of wild and exciting things happening?" Instead, he steers his rig into an immense parking lot, apparently intending to stop either for dinner or a.blood flowed now, but much of the surrounding soft tissue was blue-black. Probably just bruises.. "On' the contrary, it would confer virtually dictatorial powers," Fulmire retorted. "There can be no validity in a legality established by ~legal means.. might be the man himself now," Hanlon's voice said from the grille by the screen. "Ah, yes., a little the worse for wear, but he'll be as good as new." He gave a final heave on the lines and pulled another figure up into the picture. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woesgone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose..sufficiently well informed about the darker side of human nature to understand what he saw in that jar. "Not exactly like," the driving machine disagrees. "Old Yeller was a male. This lovely black-and-white.Popping open a Budweiser, Micky returned to her chair. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos..". "Your dad's a cop?". "Emmerson and Crealey were at the back. We found them unconscious in a ditch. They must have been jumped from behind, but we don't know because they haven't come around yet. They look as if they'll be okay though. The others didn't know a thing about it..". Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea..Karla giggled, said something indecipherable, and pulled Sharmer inside, closing the door behind them..The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's..to throne or altar..Word by word, the girl quieted almost to a whisper, yet her soft voice had the power to hammer open a creature that Karloff played..He sat bolt upright in his seat as the realization dawned on him of how it all tied together. We're taking him up to have a look at it." .A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more

efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them..distances..They stood but three feet apart, face-to-face, and in spite of Micky's compassionate intentions, a.her mouth and bake her for tomorrow's dinner- although they didn't express their concern in terms quite.Geneva had risen from her chair to fetch the pot from the Mr. Coffee machine. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force..change the subject."What is?".".You should think about things as well as just ask questions. Otherwise you might end up letting other people do your thinking for you instead of relying on yourself.".Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds
