Pernak sat forward and moistened his lips. "I'll give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." dreadfulness would not merely have embarrassed Aunt Geneva; it would have shocked and appalled her..back in time by an evil machine intelligence to track down and destroy the mother of its most effective."But they seem to have an intuition to make human value judgments," Colman objected. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny."One door remained..Jay and Marie were her latest weapons. Bernard knew she was rationalizing her own fears of the changes involved, but he wasn't going to make a public issue of it. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. "Yes, Matt?" The others looked toward Stern curiously..Of course, that vehicle hadn't been unique. Hundreds like it must be in use on ranches across the West.."It's not subject to finite arithmetic," Pernak agreed. "But why does it have to be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest..Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going. Perhaps the killers are already here. Upstairs. Waiting. "Aw, cut it out, Hoover," Rastus told the robot. "These people have only just arrived. They've got more than enough to do." "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. Sinsemilla's left hand was clenched. She opened it to reveal a wad of bloody Kleenex that Leilani hadn't. Just then Jerry Pernak came around a corner accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. But she will never be at his side again in this life. "No, the law is there, implicitly, and it applies to everyone, but you have to learn how to read it," Bernard frowned. That hadn't come out the way he had intended. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one. "I'm not interested in anything like that. I just want to hear about someone who lived there and came from there. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action," "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. "Will do. See you in a few minutes." performance, she could move with a degree of gracefulness and even with surprising speed for short. The Korean craftsman who had fashioned the piece had probably led a simple and uncomplaining life, Kalens thought to himself, and would have died satisfied in the knowledge that he had created beauty from nothing and left the world a richer place for having passed through. Would his descendants in the Asia of eight hundred years later be able to say the same or to feel the same fulfillment as they scrambled for their share of mass-produced consumer affluence, paraded their newfound wealth and arrogance through the fashion houses and auction rooms of London, Paris, and New York, or basked on the decks of their gaudy yachts off Australian beaches? Kalens very much doubted it. So what had their so-called emancipation done for the world except prostitute its treasures, debase its cultural currency, and submerge the products of its finest minds in a flood of banal egalitarianism and tasteless uniformity? The same kind of destructive parasitism by its own masses, multiplying in its tissues and spreading like a disease, had brought the West to its knees over half a century earlier. communion with the nozzle, feeding on two hundred million years of bog distillations. Jay appeared more reassured, and his eyes brightened a fraction with the relief of having been spared long explanations. "It's all screwed up," he replied simply. At once the mutt skids to a stop, and so does Curtis. They look at each other, at the door, at each other. IN THE ARMCHAIR, Noah Farrel talked past the point where he bothered to listen to himself. what he believes. Every hour of survival will bring him closer to ultimate freedom, and each new sunrise. "He was looking at it yesterday." she'd promised herself. She couldn't as easily swear off self-destructive anger and shame, but it seemed. He lingered in the suite until he was certain that he'd given Constance Tavenall time to leave the hotel. In vulnerability. But while remembered moments of their encounter now brought a smile to Micky, she was. Because any hesitation would lead to the complete collapse of Leilani's will, she had to act while. Without hesitation, Leilani said, "Four elderly women, three elderly men, a thirty-year-old mother of two, worldwide icon. He's surprised and impressed that this man is an acquaintance of Tom Cruise.
