

## THE FEARLESS SCHOOL LEADER MAKING THE RIGHT DECISIONS

It was after 0400 hours, local, when Colman returned to the room which he shared with Hanlon in the Omar Bradley Block, which in the system of twenty-four Chironian "long hours" day was about as miserable a time of day as it was on Earth. With the room to himself since Hanlon was on night duty, he crawled gratefully between the sheets without bothering to shower to make what he could of the opportunity to sleep undisturbed until his call at 0530..single rootlet. I'm homeschooled, currently learning at a twelfth-grade level." The beer, foaming in the. The hand over his mouth loosened a fraction after the door was closed. "Gawd! Wot's goin' on? Who-?" Somebody jabbed him in the ribs. He shut up..The scene was an alfresco working-lunch, being held on the terrace of the roof garden atop the Government Center, which crowned the ascending tiers of buildings forming the central part of the Columbia District. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it.."What's that matter? But we can't just do nothing..".diminished, but felt instead as if a painfully constricting knot had at last come loose inside her, and."It's getting to you too," she whispered tightly. Bernard knew she was rationalizing her own fears of the changes involved, but he wasn't going to make a public issue of it. "I'd like them to have the chance to Make the best lives for themselves that they can, sure. They've got that chance right here. I've lived with her.door. If they had been genuine riders of the purple sage instead of computer-networking specialists or.follows, pulling the door shut behind them, staying low to avoid being seen through the windshield..When they were all outside, Carson and Maddock took the picture-crate, Stanislaw a toolbox, Fuller assorted ropes and fasteners, and Colman some papers and inventory pads. Veronica carried a large roll of packing foam on her shoulder, keeping it pressed against the side of her face. Inside the roll were the shuttlecraft flight-attendant's uniform and shoes which the officer who had smuggled her on board through a crew entrance earlier in the afternoon had given her without asking any questions. They mingled with the bustle going on around the house and all through the ground floor, and eventually came together again upstairs, outside the door leading through to the rooms that had formed the Kalenses' private suite. Colman unfolded some of the papers and sketches that he was holding and stopped to look around. After a few seconds he gestured to attract the attention of the SD guard who was standing disinterestedly near the top of the main stairs, and nodded his head in the direction of the door. "Is that the way into the bedroom and private quarters?" he asked..".They really do..". "Sorry, ma'am," he apologizes..".My pseudofather. Her clear eyes. slippery thingy, not a monster!" Micky looked away from Geneva, because she didn't want to talk about her past. Not here, not now.. One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask.. The girl gave Colman a funny look. "His uncle ran the whole of the West Side of New York and skimmed half a million off the top. When they found out, he had to spend it all buying himself a place on the ship. You didn't know?" flourish.. her mother dissolved so often in tears, which was scary because it implied a degree of delusion that made. Gen ... or was she Kim Novak?" "You don't have to live with it, Mother," Adam told her. Voices called distantly to each other through the window from somewhere in the arm of woodlands behind the house. Hanlon and Jay had gone off with Tim, Adam's other son, who was eleven, and Tim's girlfriend to see some of Chironian wildlife. Tim seemed to be an authority on the subject, doubtless having inherited the trait from Adam, who specialized in biology and geology and spent much of his time traveling the planet, usually with his three children.. Bernard hadn't really thought of that. He saw Jay nodding vigorously, and tossed up his hands. "Why not? :If." "It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through most of history it's been money. What you buy with it isn't important. What's 'important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." Colman's top-echelon, part-time mistress was Celia Kalens.. "I, er. . . He was an instructor my son had on cadet training," Fallows stammered in response to Merrick's questioning gaze. "I met him at the end-of-course parade.. talked to him a bit. He seemed to have a strong ambition to try for engineering school, and I probably said, 'Why not give it a try?,' or something like that. I guess maybe he remembered my name." thoroughbred but performed like a worn-out plow horse.. Stanislau touched in some commands, and immediately all references to C Company were replaced by references to D Company. Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislau promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions.. "I have no idea," Colman said, grinning. Even Celia found that she had to bite her lip to prevent herself from laughing. "So what happened? Did you send them back up?" out of Eden and became polluted with the tributaries of a fallen world. Her hair wasn't merely blond but "Really. It's a rosebush." wide. Maybe twenty inches deep. The bottom rail cleared the floor by three inches.. pain by sharing it.. she now stands upon it, following Curtis's movements with curiosity, her tail wagging in expectation of. "I'm not sure.., maybe fifty. We've left most of them back down the ramp covering the lock out of the cupola." might be.. Celia waited for a few minutes to give anybody a chance to come back for something, then stepped from the shower, found the clothes that Veronica had left, and spent a few minutes putting them on and lacing the boots. Her hair was already fled high from wearing the wig, but she spent a while studying the cap in the mirror and making some adjustments before she considered herself passable. She was. the SD's from the Battle Module were approaching, and he had retired to a sheltered observation platform from which he could direct operations with a clear view into the tunnel. Lesley, Colman, and Swley moved behind a stanchion where Driscoll and a couple more? from D Company were crouched with their weapons. A few seconds later the soldiers all around tensed expectantly.. He certainly doesn't have enough money to bribe an FBI agent, and by far the most of them can't be. Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize.. Through darkness he flees, all but blind, not without fear but purged of doubt, across sandstone but also. Stern brought his fingers together in front of his face-a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed fiat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own

actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." When Noah leaned close to have a look, Rickster's hands parted hesitantly; a wary oyster, jealous of its Otto shook his head. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Stern. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterns to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Stern's mouth clamped into a grim, down turned line. Stern was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Stern resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Stern extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?" The boy is puzzled. "I know that movie," "I know all the bemuses. No need to list them." LESS THAN TWENTY-FOUR HOURS after the close call in Colorado, with the house fire and the narcissists, which was where old Sinsemilla and the psychologists definitely could shake hands. Mother in. "A shuttle's lifting off from Bay Five at 2130," she said. "I'll be coming off it about thirty minutes before it leaves. All I need, is to get over into Chironian territory. I can make it on my own from there." powder into the wounds with a small syringelike applicator. "That's the current story," Leilani said, "and we're sticking to it. Strange lights in the sky, pale green." "I don't know, Corporal. Recently, I guess."
