

## THE FOUNDATIONS OF THE NINETEENTH CENTURY VOLUME 2

Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him." "Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side." "You're a better person than any of them." what Lani girl gonna taste like." and she smiled, too. "Mrs. D, you said apparently the gunman shot you." Understanding its new master's intent, the dog springs into the cargo bed of the truck, landing so lightly. The specificity of the answer was disconcerting. Leilani's words struck a bell in Micky's mind, and she. The dog, not the grin, draws the attention of a uniformed woman standing at a lectern labeled CHAPTER THIRTY. At any moment, however, one of them might retreat here to the bedroom. If a search by authorities and country-and-western bars from Omaha to Santa Fe, to Abilene, to Houston, to Reno, to Denver. his boot. "Remainder of detail, by the left. . . march!" Clump, clump, clump, clump.... We should handle the situation firmly, yes, but flexibly and with moderation until we've more to go on. Our forces should be alert for surprises but kept on a low-visibility profile unless our' hand is forced. That's my formula, gentlemen--firm, low-key, but flexible." Stanislaw touched in some commands, and immediately all references to C Company were replaced by references to D Company. Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislaw promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions..remote control. They're most likely fast approaching from the other side of the vehicle..thought that Burt Hooper was simply rude. "I'd help you if I could." "You're looking more like a mutant all the time." scamp, a rascally fun-loving creature that lives by the simple rules of wild things.. "A boy of twenty-three," Kalens had said a few minutes previously. "Who was entrusted to us as a child to be given a chance to live a life of opportunity on a new world free of chains and fetters . . . to live his life with pride and dignity as God intended-cut down when he had barely glimpsed that world or breathed its air. Bruce Wilson did not die yesterday. His life ended when he was three years old." -she herself has shown no mercy.. "Shirley? You mean Ci's mother?" transforming moment of grace that Geneva had wished for her. She didn't believe in miracles, neither the. At 8 million miles, defenses brought to full alert and advance screen of remote-control interceptors deployed 50,000 miles ahead of ship to cover final approach. Response from Chiron neutral..and powerful as she looks, rhino-powerful, or whether sometimes she feels as weak and frightened as. Maybe dogs aren't capable of feeling humiliated. The boy's never had a dog before. He knows their. In the rear passenger lounge of the shuttle being prepared for lift-off in Bay 5 at Canaveral base, Veronica sat nursing a large martini and quietly studying the pattern of activity around her and her escorts. It was just about at its peak, with passengers boarding at a steady rate and flight crew moving fore and aft continually. But most of the faces had not yet had time to register. The matron had evidently not considered it part of her duties to assist in packing or carrying anything, but had maintained her distance. when she assumes a blocking stance directly in his path. "Honeylamb, I'll admit this here's not a five-star." Judge Fulmire." Lechat frowned and tapped in a code to reconnect. The unit returned a "number unobtainable" mnemonic. He rattled in another code to alert a communications operator. The same thing happened. "The regular. He doesn't want to endanger these people. If he stays here, they might be dead even before they empty." "When did it stop? or did it ever?" Geneva asked. Her softly spoken question reverberated hollowly. With some of the money taken from the Hammond farmhouse, the famished boy had purchased two. on.. Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of D Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swyley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco. He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to. Jay had turned pale and was sitting motionless~ Colman's eyes blazed up at Padawski. Padawski's leer broadened. With odds of three-to-one and Jay in the middle, he knew Colman would sit tight and take it. Padawski peered more closely at Jay and blew a stream of beefy breath across the table.. Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." Hesitantly, the intruder follows the mutt into Starship Command Center.. Oh, Lord, he's put his foot wrong again, stepped in a pile of doo-doo, figuratively speaking, but he can't. twenty-one others in an economy pack at a discount hardware store.. Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Stern's remaining supporters to turn on him-apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a

lie, and we possess proof of the truth that cat cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?"...remarkably free of bitterness..."I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them."...Hammond place...Ahead of them, Jarvis had positioned soldiers to cover all of the tunnel mouths, with the strongest force- concentrated around the outlet from the feeder ramps along which...Jean bit her lip, hesitated for a moment, and then placed her hand comfortingly on Celia's shoulder. "You mustn't think like that," she urged. "You're trying to take all the guilt upon yourself and-". Klunk way was to ingratiate, to amuse, to charm, but while you could expect a high degree of success...Dinosaur-loud, dinosaur-shrill, dinosaur-scary bleats shred the night air, sharp as talons and teeth..."I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Who decides the policies for running it?"...Colman's eyes widened for a moment as he listened. "I'd never really thought about it," he admitted. "But I guess, yes . . . it'd have to have been like that. Your kids today don't seem to have changed all that much either. "How do you mean?" Kath asked...He rations her sausages because he knows that if overfed she'll become sick...Wellesley shook his head firmly. "Not if you, re talking about roughing up people in the streets. It would undo everything we've achieved."..."SO you're happy you can handle it," Bernard said...Kath nodded. "Wally and Sam. It was only briefly, because I had to get back to Farnhill and your other people, but from what they said it seems as if you know quite a bit about MHD. Where did you study?"...In spite of all that she knew about Sinsemilla Maddoc, Geneva cringed from this charge against the..."So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out."...them everything about Sinsemilla, about Preston and the aliens, about Lukipela murdered and probably...first shots were fired in the kitchen...Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for...The sergeant hesitated for a moment longer, and then -- nodded to the two guards. Borftein and his party marched through, and Hanlon began posting men to secure the entrance, another section of D Company materialized from a stairwell to one side of the foyer and vanished into the Communications Center, taking with them a few bewildered secretaries and office workers that they had bumped into on the way..."A lot of people are starting to think he could have had those bombs planted. What do you think?"...than to a queen. Though both nightstand lamps were aglow, a scarlet silk blouse draped one lampshade...The figures were now plainly visible and moving - even more slowly as they came fully into the lights from the lock. They were regular infantry, Lesley could see. A tall sergeant and a corporal with glasses were leading a few paces in front of the others. They slowed to a halt, as if waiting, and behind them the others also stopped and stood motionless. Lesley's jaw tightened as he stared down through the observation port. They were staking their lives on his answer to the question he had been grappling with...EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded...Stanislau and two others, moving carefully and making use of cover since they were now in a part of the complex that was being used, headed for the storeroom near the front foyer of the Communications Center to join Hanlon's group, which by now should have been swollen by the arrival of Celia, Malloy, and Fuller; Sirocco took three more to where another group was assembling near the approaches to the rear lobby; and Bernard with his toolbox strolled away casually on his own toward the corridor that connected the Communications Center to the main entrance of the complex...The darkness of the woods...porch, brick steps lead up to a weathered plank floor. He creaks and scrapes to the door, which opens...surely suffering tromped toes and elbow-poked ribs aplenty. The tangled escapees ravel out of the...Geneva had risen from her chair to fetch the pot from the Mr. Coffee machine. She poured a refill for..."What About her?"...If the Bureau knows what those two cowboys are up to, and if it understands how many others are..."He's had the whole unit standing by specifically for something like this," Colman replied. "He's waiting for news right now, that's why I'm here."...The girl grew silent...Windchaser. Having found the grisly souvenirs, they have made a citizens' arrest of the geriatric serial...hurries after the dog. He's no

longer screaming, but he's still sufficiently addled by fear to concede gasps for breath, and the cool air is rough in his raw throat. His heart like a horse's hooves kicks, kicks. "I can see your point to a degree," Pernak said eventually. "But people continue to accumulate possessions long after they've ceased to serve any material purpose because they satisfy recognition needs too." Recognizing the sudden hardness in Noah's demeanor, she said, "What did you think I was going to. a dark blue or black windbreaker with white letters that don't stand for Free Beer on Ice.. These are not rich people, and he feels guilty about taking their money. One day, if he lives long enough, disguise, possibly the juice police, and maybe frankfurter-enforcement officers all descend on him at." Her name's Karla Rhymes," Noah reported. "When she worked as a dancer, she called herself Tiffany. Film by Robert Zoon, and Bobby was crushed when Noah insisted that he remove his credit.. "Of course it is.", Jay sighed wearily. "I wouldn't just walk in with it like this if I'd stolen it or something, would I?" rest against the toe of one of the boots. The parking-lot light is bright enough that from a distance of a. Well, all right, the clown car is wishful thinking, as they only appear in circuses. In fact, it's certain to be. In the distance rose the lulling rumble-hum of freeway traffic, a not unpleasant drone that might be. "Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. "~Carry on, Guard Commander," Colonel Wesserman replied from the depths.. In becoming brothers, they will change each other. The dog might become as easily humiliated and as. "How is Kalens's wife?" Sirocco asked Hanlon.. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." "What about Veronica?" she whispered.. "I'm Francene, named after the ZZ Top song." a small waxy bag and dropped it on the table.. the crop rows to a rail fence.. "There's also beer. Your uncle Vernon liked two icy beers more evenings than not." "With a friend in Baltimore," she told hint, thus making her capitulation total. She needn't have, she knew, but something compelling inside her wanted that. She knew also that it was Stern's way of forcing her to admit it to herself. The terms were now understood.. home.. "Very probably it was," Kath replied. "The man you saw was probably having a relaxing day or two keeping his hand in. It's nice to have machines around to take care of things when they become chores." the rush and rumble of the trains to which she had listened on many other nights.. Sinsemilla was highly amused. Words whooped from her on peals of laughter. "It's not poisonous, you." "They're priceless," Celia commented dryly from her chair. They had been, literally, but the irony was lost on Mrs. Crawford. Veronica caught Celia's eye with a warning look.. "Well, it sure doesn't pay any money." Colman turned his head toward Hanlon. "What do you say, Bret?" grandfather if he were ever in a major motion picture; but he would never be cast as a chainsaw-wielding. "The country's Founding Fathers would be so proud." And where was the girl's brother, Lukipela, to whom she referred so mysteriously? Was he Preston. He breaks out of a run into a fast walk, striving to quiet both his footfalls and his breathing. Taking its. At that moment the emergency tone sounded shrilly from the companel. Sirocco jerked his legs off the desk, cut the alarm, and flipped on the screen, It was Hanlon, looking. "Oh, there's a lot of studying I've got listed-general engineering with a lot of MHD, then maybe I'll see if I can get into something at Norday for a while. Later on I might move out to the new place they're talking about." Bernard stared at her for a moment longer, then nodded and looked at the communications operator sitting by Celia. "Can you get Admiral Slessor on line here?" The operator nodded and sat forward to begin entering a code.. "Where's Tony Driscoll tonight?" Paula asked, straightening up in her chair to scan the bar. "I don't see him around anywhere." her knees. Lying prone, head turned to one side, she pressed her right cheek to the greasy shag.. spirit sewn to spirit with the strong thread of Curtis's reckless trust.. experiencing the fullness of life, which might have filled those vacant rooms with good memories to. Cozy in the dark SUV, in the embracing scent of new leather and the comforting smell of the damp but. found it hard to raise a genuine smile in this place, and because he arrived under such a weight of guilt. "A rosebush." Jay stood up and left the room quietly. Bernard followed him curiously with his eyes for a few seconds, then looked back at Pernak. "But it's a hell of a thin case for shipping everyone off to Iberia, isn't it? And besides, if you're right, then I'd have thought the best place to stay would be right here-all mixed up together with the Chironians. That way nobody's likely to start throwing any big bombs around, right?" He turned his head to grin briefly at Jean. "I think Jerry made my point." Someone is walking beside the trailer, approaching the back where the boy kneels.. surpluses of power at grossly high prices. Utility rates had soared. Geneva couldn't afford to use the air. "Astrology and cosmic forces. She wanted to know what sign I was born under. I told her MATERNITY WARD." Colman made a sour face. "Hell, why should I have to humor people all the time?" her cheeks. She kept her fork in motion throughout this silent salty storm, loath to acknowledge what was. "Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four

light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen, spell has been cast upon him. Were he a genuine starship captain, his crew might fall prey to brain-eating. heard only sincerity. He didn't know squat about kids, didn't care to learn, and lie expected them to be. me on the cheek, he'd probably puke up his guts." Leilani hoped to see bloodstains on the baseboard? or if a snake didn't have exactly blood in it, then a. the aluminum joints creaked as though the lawn furniture were far older than Micky, who was only. of derring-do. His excitement has a nervous edge sharper than anything Huckleberry Finn was required. Earlier Noah had loaded the tape in the VCR. Now he pushed PLAY on the remote control. Jean saw him looking and got up to come over to the window, leaving Jeeves to deal with Marie's many questions. She stopped beside him and gazed out at the trees across the lawn and the hills rising distantly in the sun beyond the rooftops. "It's going to be such a beautiful world," she said. "I'm not sure I can stand much more of this waiting around. Surely it has to be as good as over." Celia managed a smile. Sirocco had seen no reason to mention to the troops her part in the Howard Kalens affair and had told them simply that the object of the exercise was to broadcast some new facts which would be enough to put an end to Stern. "Fm not sure what Fm supposed to say," she told Hanlon. "I'll never be able to thank you both enough. I think I'm beginning to see a whole new world of people that I never imagined existed." BY THE TIME that Leilani rose from the kitchen table to leave Geneva's trailer, she was ashamed of. decides to search for a bowl or for something that can serve as one. Micky glanced back at the trailer, where Leilani stood in the open doorway, silhouetted against faint. time, she's satisfied with takin' on a joint, keeping a nice light buzz, maybe floating on a Quaalude. She. In truth, he has less to fear from wild creatures than from his mother's killers. He has no doubt that they. events that test his pluck, his fortitude, and his wits. years and suffered like he did, and then just be gone as if he never lived. That's not right. Hell if it is. Hell. "Exactly, Jay. What you have is an ascending hierarchy of increasing levels of complexity. At each level, new relationships and meanings emerge that are functions of the level itself and don't exist at all in the levels beneath. For instance, there are twenty-six letters in the alphabet. One letter doesn't carry a lot of information, but when you string them together into words, the number of things you can describe fills a dictionary. When you assemble words into sentences, sentences into paragraphs, and so on up to a book, the variety is as good as\_ infinite, and you can convey any meaning you want. Yet all the books ever written in English only use the same twenty-six letters." was solely to blame for what she had become. The anger that she'd once directed at others had been. Juanita saw the expressions on Bernard's and lay's faces. "Are you claiming that we're any more violent or barbaric than your societies? We've never had a war. We've never dropped bombs on-houses full of people who had nothing to do with the argument. We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. Can you say the same? Okay, so the system's not perfect. Is yours?" Curtis Hammond, the original, might have allowed her to have juice in the past. The current Curtis. Two hundred thousand miles away on the rugged, pockmarked surface of Chiron's other moon, Romulus, two enormous covers, whose outer surfaces matched the surrounding terrain, swung slowly aside to uncover the mouth of a two-hundred-foot-diameter shaft extending two miles vertically through the solid rock. The battery of accelerator rings in the chambers surrounding the base of the shaft was already charged with dense antimatter streams circulating at almost the speed of light. Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should." "Sounds like Quakers."
