"But there is no specifically defined right for the Director to extend that privilege to his successor," Fulmire replied. Not.Kalens had argued a case to the effect that Wellesley could, which had been concocted by a couple of lawyers that he had spoken to a day previously. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. The endeavor' had backfired spectacularly..Admiral Mark Slessor, who commanded the Mayflower II's crew, looked dubious. I'm not so sure it's that simple." He rubbed his powerful, blue-shadowed chin. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky."..Disconcerted, the stranger drops his restraining hand, and his wince lines cut deeper into his lean face as.the mothering. Only the normality mattered. The peace. Here, now, Leilani was overcome with a pleasant.lunatic charm."..At once the mutt skids to a stop, and so does Curtis. They look at each other, at the door, at each other."Then how-"..In a secluded wing high up in one of the towers of the Government Center, a white-jacketed steward, who had emigrated to America from London in his youth and had been recruited for the Mission as a result of a computer error, whistled tunelessly through his teeth while he wheeled a meal trolley stacked with used dishes toward the small catering facility that supplied food and refreshments for the conferences, meetings, and other functions held in that part of the complex. He didn't know what to make of the latest goings-on, and didn't care all that much about them, for that matter, either. It was all the same to him. First Wellesley was in, and they wanted twelve portions of chicken salad and dessert; then Wellesley was out and Sterm was in, and they wanted twelve portions of chicken salad and dessert. It didn't make any difference to him who-."Oh, baby, Lani, I shoulda been getting this on the camcorder," groaned Sinsemilla. "We'd win big bucks.a considerable distance beyond the California darkness. "Montana. This place in the mountains."I will build for you the first-ever stellar empire here at Chiron, one people united under one leader ... united in will, united in action, and united in purpose. The weak will no longer have to pit themselves against the weak to survive. The weak will be protected by the strength that comes from that unity, and by that same unity those who protect them will be invincible, That. . . Is what I offer to share."..As the guards started forward and the members continued to sit in paralyzed silence, Ramisson rose and walked haltingly to the center of the main aisle to face Sterm. "I will not submit to such intimidation," he said in a harsh whisper. "Remove your men from that door." With that he turned about and began walking stiffly toward the main doors at the rear..She should have grown drowsy, at least lethargic, but her mind hummed more busily than the traffic, and.And, most astonishing of all, it required only one "hypertweedle" in tweedlespace to account for all the projections perceived as dums, dees, antidums, and

antidees and both universes. A universe provided, in effect, a screen upon which the same projections were repeated over and over again as a consequence of the separation of the space and time dimensions of the screen itself, which of course was why every dum was the same as every other dum, and every dee the same as every other dee. It was as if a typewriter created paper as it typed on, leaving the planar inhabitants of the flat universe that it had brought into being to ponder why all the characters encountered serially in their own "flat-time" should have exactly the same form.. "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now." "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them.. Constance Tavenall?no doubt soon to cleanse herself of the name Sharmer?stared at the TV. She. Bernard nodded. "Okay. We'll see you later then. Maybe you'd better leave that stuff here for now, Jay. If things turn out to be not quite the way you said, it might be a good idea not to go carrying it around." She nodded, then after a few seconds said, "Casey will have fit!" .if melancholy sense of what might have been?but never would be.. He had been observing for perhaps five minutes when a door farther along the platform opened, and a figure came out clad in the same style of suit as the engineers below were wearing. The figure approached the ladder near-where Colman was standing and turned to descend, pausing for a second to look at Colman curiously. The nametag on the breast pocket read 'B. FALLOWS. Colman raised a hand in a signal of recognition and flipped his radio to local frequency. "Hey, Bernard, it's me--Steve Colman. I don't know if you're heard yet, but that' transfer didn't go through. Thanks for trying anyway." "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" "Didn't you know you were expendable?" Stanislaw asked matter-of-factly.. "But you are. What can you do to stop it?" .arm, its fangs bared on the back of his hand, its eyes bright with hatred. "But you ought to realize that.gasps for breath, and the cool air is rough in his raw throat. "I hope so too," Kath said with feeling. "I ought to go now and see them off. Take care, Leon." The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. Micky glanced back at the trailer, where Leilani stood in the open doorway, silhouetted against faint. "How many other engineers do you have here?" she inquired lightly, looking around the rest of the squad. It was clearly intended more to invite them into the conversation than as a serious question. "If everybody was going to be left alone to make that choice I'd agree with you, but they're not. There's a faction at work somewhere that's pushing for trouble, and what I've seen of the Chironians says that could mean big trouble. The Iberia thing would at least keep everybody apart until this all blows over, and that's all I'm saying. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..Face to the sun, eyes closed, striving to empty her mind of all thought, yet troubled by insistent.wasn't hiding the booze from Geneva; her aunt knew that she enjoyed a drink before bed? and that she.in a miserable voice, Aunt Gen said, "It's never this bad in the movies."..ABOUT THE AUTHOR.What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..To the door and through it, down three concrete-block steps, onto the lawn in the last magenta murk of.grasp. He's probably returning from a late dinner, with a thermos.'-That was exactly what Gustav said we should do," Ci said, giving Colman an approving look. "He was looking at it yesterday."..But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the

machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people?.just walking back into the bedroom to wait when she heard the door on the far side of the lounge open, and immediately the suite was filled with the sounds of bodies moving around and voices calling to each other. A few seconds later Colman appeared in the doorway from the lounge.
