"It sounds very specialized," McKillian said thoughtfully. "Maybe we should be looking for the niche it occupies. The way you describe it, it couldn't function without help from a symbiote. Maybe it fertilizes the plants, like bees, and the plants either donate or are robbed of the power to wind the spring. Did you look for some mechanism the bug could use to steal energy from the rotating gears in the whirligigs?" Looking for a French poodle named Gwendolyn?? I walked back up the beach wondering in bemusement if I could be falling in love with two such different women at the same time. If so, how fortunate they were the same woman..meaning we did not at first suppose to be there. We think we have understood our words, then learn that."Do you want the child, Lucy?" If there was any trouble and she couldn't get to the phone, she would take down the note, or if she had time, write another..only get flabby, I'd go mad." She bounced out of the chair and came over to lace her fingers together."I just want to point out that instead of an expedition, we are now a colony. Not in the usual sense of planning to stay here forever, but all our planning will have to be geared to that fiction. What we're faced with is not a simple matter of stretching supplies until rescue comes. Stopgap measures are not likely to do us much good. Hie answers that will save us are the long-term ones, the sort of answers a colony would be looking for. About two years from now we're going to have to be in a position to survive with some sort of lifestyle that could support us forever. We'll have to fit into this environment..guided daydreams. Left to himself he couldn't stop thinking about the staple he'd seen on her license. It was like the seemingly insignificant clue in a detective story from which the solution to the whole mystery gradually unfolds.
