He was a laboratory chemist, specializing in inorganic compounds. The way these plants produced plastics without high heat, through purely catalytic interactions, had him confused and defensive. He wished the crazy windmills would go away..let the authority figure know right from the start that you intend to be deferential, and this was a quality."The other end of the rainbow?" asked Hidalgo..At the edge of the garden he stopped, remembering the order from Lang to stay out unless collecting samples. The return address on the first page was.188."Still, it got you picked for this mission out of hundreds of applicants. The thinking was that you'd be a wild card, a man of action with proven survivability. Maybe it worked out. But the other thing I remember on your card was that you're not a leader. No, that you're a loner who'll cooperate with a group and be no discipline problem, but you work better alone. Want to strike out on your own?".He smiled at her. "No, thanks. Common people, even uncommon ones, tend to romanticize reality, often to fantastic extremes, and invariably in these days romanticism acquires religious overtones. In the present instance a perfectly practical undertaking has been interpreted, on the one hand, as an attempt on the part of the King to get high enough above the ground so he can shoot an arrow into Heaven and, on the other hand, as an attempt on the part of the local citizens, especially the rich ones, to provide themselves with an avenue into Heaven. The two interpretations have somehow intermingled and become one. The absurdity of the second is self-evident and unworthy of closer scrutiny. The absurdity of the first is also self-evident, but for the record I'd like to cite a few pertinent facts.. "Oh, no, really, Cinderella. . . ."
