"It always goes away.". Someone opened the door of the Mariner's Tavern and called inside, "Why is everybody so glum this evening when there's a beautiful rainbow looped across the world?". \*\*It is the year 2783. Suddenly the galaxy is invaded by a horde of alien beings, the Zorphs. They enslave all planets in their path. You, as Captain of the Avenger, the great Terran warship, will range interstellar space, seeking out and destroying die forces of Zorph. This is but a bare outline of the ultimate in computer games . . . Everyone else in the tavern came running outside too. Sure enough it was Amos, and sure enough a rainbow looped above them to the far horizons.. "Ah," said Lea, "the second question is easy to answer, but the first is not so simple. I asked as I lit the cigarette. The lighter felt cool and expensive in my hand.. "Yes?" She had a breathless voice. Her eyes quickly traveled the length of my body. That happened often enough to keep me feeling good, but this time it gave me a queasy sensation, like I was being measured for a mummy case. I showed her my ID, and asked if I could speak to her about one of the tenants.. Darlene passed a hand before her eyes. "I guess I?m just overtired," she said. She kisses me with lips and tongue, working down across my belly.. Amos and Jack were happy as they had ever been, and the North Wind roared to the edge of the ledge and they climbed on his back, one on each shoulder. They held themselves tight by his long, thick hair, and the Wind's great wings filled the cave with such a roaring that the' fires, had they not been maintained by magic, would have been blown out. The sound of the great wing feathers clashing against one another was like steel against bronze.. affair with Song. Then Song discovered McKillian with Ralston, and Crawford caught her on the. "Look, I've never had one, and never planned to. I'm thirty-four years old and never, never felt the lack. I've always wanted to go places, and you can't with a baby. But I never planned to become a colonist on Mars, either. I... things have changed, don't you see? I've been depressed." She looked around, and Song and Ralston were nodding sympathetically. Relieved to see that she was not the only one feeling the oppression, she went on, more strongly. "I think if I go another day like yesterday and the day before? and today? I'll end up screaming. It seems so pointless, collecting all that information, for what?". We made the cold dash across the beach to die cabin, picking up our clothes on the way. Inside we huddled together wishing for a fire and toweled ourselves dry while the polycarpet ran rainbows of browns and electric blues around our feet. In the course of it I got my arms around Selene. I pulled her against me. She met my mouth hungrily, but when I started pulling her toward the fake animal pelt in front of the fireplace, she rammed me with a sharp hipbone and wiggled loose.. The crawler skidded to a stop, nearly rolling over, beside the deflated dome. Two pressure-suited figures got out. They started for the dome, hesitantly, in fits and starts. One grabbed the other's arm and pointed to the lander. The two of them changed course and scrambled up the rope ladder hanging over the side.. Amos. Ike picketed with me, having arranged it with the Organizer to change places with Ben. With my old buddy to talk to, time went by fast.. "Can I have a while to think it over?". You only had to take one look at his hands to know he'd never done a lick of work in his life.. "It was one of the fruit," she said, gasping for breath and coughing. Like all flying machines since the days of the windsock and open cockpit, this one was a mad confusion of dials, switches, and lights designed to awe anyone who knew nothing about it. He sat in the copilot's chair and listened to her..He moved out into the clearing, more boldly now. Then suddenly he stopped. He saw a strange shape hanging by the cottage door. It was a deerskin, a fine buck's hide, hung by the antlers jand the legs dangling down.. "The girl-Nina?\*" Crawford called down to Lang, who raised her head enough to mumble something.. "Ashes?" I say, unsure how to respond. Humor her. "Sure.\*\*.Herndon's room for a few days? until someone claims her things." So I made one..They ended up with a long cylindrical home, divided into two small sleeping rooms, a community room, and a laboratory-storehouse-workshop in the old fuel tank. The maelstrom spread out across the floor and up the walls, even affected the chairs so that they, too, raged with color and pulsed to ? the time of Amanda's breathing..Bat there are other reasons. Critical judgments are so complex (and take place in such a complicated context), the vocabulary of praise and blame available in English is so vague, so fluid, and so constantly shifting, and the physical space allowed is so small that critics welcome any way of expressing judgments that will be both precise and compact. If vivid be added thereunto, fine?what else is good style? Hence critics, whenever possible, express their judgments in figurative language.
