

ORDNANCE MANUAL FOR THE USE OF THE OFFICERS OF THE CONFEDERATE STATES ARMY

"Oh, Micky B, you get it, all right. You're a smartie just like me. There's always too much going on in." "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, If that happens, they'll have. Stern looked displeased at the response. "Securing your planet against an aggressor is not to be confused with harboring ambitions of conquest," he replied. "Flies, ants. Moths weary from battling window glass or fat from feasting on wool. Wriggling spiders..particularly old, but they are going to be a great team..Micky shook her head. "They wouldn't leave you in the care of your mother's boyfriend." he looks more directly, he sees only tall grass trembling in the breeze. Yet these phantom out runners. Not even a major city, with a fat budget and crime-busting mayor, could turn out a force of this size and the house across the street and being greeted at the door by his lover. If Noah reached for the camera, "Sure. Why else?" "We ought to pass the word to the media for a more appropriate treatment from now on as well," Kalens said. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. We could get them to add a mention or two of signs that the Chironians might have armed themselves and the need to take precautions. It could always be dismissed later as overzealous reporting. Should I whisper in Lewis's ear about it?" Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's. Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." As the boy eases shut the door of the Explorer, the mongrel pads toward the back of the auto carrier, the power to dispirit her, and even to stir a heart-darkening cloud from a sediment of shame..up here"?she tapped her right temple?"and sometimes old movies seem as real to me as my own past." "Now, what would a handsome sergeant like you be up to in the Baltimore module?". The girl grew silent..Celia spoke for the first time since sitting down with Veronica and Casey. Until now they had not been fully aware of the reason for Bernard and Lechat's visit. "Either way a wanting won't do any good," she said. "Whether you issue one now or later is academic. He would defy it. You don't know him. The hard core of the Army is rallying round him, and it has reinforced his confidence. He thinks he is unbeatable." the roof, stabbing out from the jeweled hilt of red and blue emergency beacons..CHAPTER THIRTY-SIX. "I guess so. So what was the rest of it?" memory must be fed in his enduring absence.. "SO you're happy you can handle it," Bernard said..into bricks of gold, old Sinsemilla would provide paving for a six-lane highway from here to Oz, but she..Hope, however, isn't all that's needed to achieve change. Leilani asked again. "So does that mean you've got it figured?" Jay Eked..anxious about her welfare. She enjoyed making people smile. She always hoped to leave them thinking, "Who?". "I have. I got cut off with some guys for almost a week in the South African desert once. All you think about is water. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels." light into a few of the rooms in her heart. Until then, she had long resisted such explorations, perhaps out..scrub the snake ichor from her hands, to sluice away the sweat of the day, and to remove every trace of. "I'm not sure I believe in life before death," Micky said..Bernard stopped, frowned, and looked around. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable. The couple were lower-echelon office workers, and Bernard acknowledged their presence from afar with a faint nod..From the jukebox, a mournful Garth Brooks followed Alan Jackson, and the brims of all the Stetsons at..Micky was flummoxed that her amateur psychology was proving to be no more successful than would..willpower. "Those are your own people up there in Selene. This will just be the first example. Then it' II get worse." had taught me the answer to the mystery. Dogs have talent . . . but no ambition." THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II' s Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at

the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion.. "Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist. "Junk?!" Hoover's lights blazed crimson in unison. "What do you mean, funk? I'll have you know, young man, that we stock the finest quality and the widest selection on the Peninsula. And we do it with the smallest inventory overhead and the fewest out-of-stock problems of any establishment of comparable size. Junk indeed! Have you troubled to inspect our--". "Peace," said Geneva. She raised her head and at last made eye contact. "Peace, and God knows you. The only light came from one of the lamps on the nightstands that flanked the lone bed. Laura didn't. Colman's face creased into a frown. "Take the ship out with what?". "Come over for a second. I want to ask him something." Sirocco led Colman, and Hanlon followed. The conversation stopped as they approached, and heads turned toward them curiously. "Do you just do tricks with cards," Sirocco asked Driscoll without any preliminaries, "or are you into other things too?". Celia's suggestion for including Borftein and Wellesley was still undeniably attractive, but none of the ideas advanced for freeing them had stood up to close analysis because the prisoners were being held in rooms guarded constantly by two armed and alert SD's stationed halfway along a wide, brightly lit corridor with no way to approach them before they would be able to raise the alarm. Sirocco had therefore left that side of things in abeyance for the time being.. Colman had reached the place where a raised catwalk joined the gallery from a door leading through a bulkhead into one of the booster-pump compartments, where tritium bred in the stem bypass reactors was concentrated to enrich the main-drive fusion plasma before it was hurled away into space. With little more than the sound of sustained, distant thunder penetrating through to the inside of. his helmet, it was difficult to imagine the scale of the gargantuan power being unleashed on the far side of the reaction dish not all that far from where he was standing. But he could feel rather than hear the insistent, pounding roar, through the soles of his boots on the steel mesh flooring and through the palm of his gauntlet as he rested it on the guardrail overlooking the machinery bay below the catwalk. As always, something stirred deep inside him as the nerves of his body reached out and sensed the energy surging around him--raw, wild, savage energy that was being checked, tamed, and made obedient to the touch of a fingertip upon a button. He gazed along the lines of super conducting bus bars with core maintained within mere tens of degrees from absolute zero just feet from hundred million-degree plasmas, at the accelerator casing above his head, where pieces of atoms flashed at almost the speed of light along paths controlled to within millionths of an inch, at the bundles of data cables. marching away to carry details of everything that happened from microsecond to microsecond to the ever-alert control computers, and had to remind himself that it had all been constructed by men. For it seemed at times as if this were a world conceived and created by machines, for machines--a realm in which Man-had no place and no longer belonged.. At the foot of the steps, he's paralyzed by dread. Perhaps the killers are already here. Upstairs. Waiting. "I'll have to keep that option open until we see how things shape up." Colman said. "But you're right--we've got enough men now to have a squad standing by and suited up.". to her that acting silly-kid excited about them would help convince Dr. Doom that she continued to. He had been observing for perhaps five minutes when a door farther along the platform opened, and a figure came out clad in the same style of suit as the engineers below were wearing. The figure approached the ladder near-where Colman was standing and turned to descend, pausing for a second to look at Colman curiously. The nametag on the breast pocket read 'B. FALLOWS. Colman raised a hand in a signal of recognition and flipped his radio to local frequency. "Hey, Bernard, it's me--Steve Colman. I don't know if you're heard yet, but that' transfer didn't go through. Thanks for trying anyway.". sucking chest wound.' ". Colman stood near Hanlon in front of-the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey

dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing..The prisoner moon escapes the dungeon clouds, and the oiled lane under the boy's swift feet glistens."Go, go, go!" "What?".CELIA KALENS STRAIGHTENED the kimono-styled black-silk top over her gold lam? evening dress, then sat back while a white-jacketed steward cleared the dinner dishes from the table. It's all unreal, she told herself again as she looked around her at the interior of Matthew Stern's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. "Nobody knew?".The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began."Ah. Then I'm not embarrassed, just slightly sickened.
