

## THE RECORDS OF THE BOROUGH OF NORTHAMPTON VOLUME 2

"Bernard," Kath said quietly from the console screen..A crash rocks the room, rattles cookware. Someone slamming through the swinging door from the."Army logic," Colman murmured..Jean glanced at the screen and then looked at Bernard. "Should we try calling her through Jeeves ... via the Chironian net? It shouldn't be affected, should it?" "You don't think that a ship full of Asiatics coming at us armed to the teeth qualifies as an emergency?" Borftein asked sarcastically..Kath switched on her impish smile again. "That's all I'm prepared to say," she replied. "For now, anyway. I just thought you'd like to hear it." She turned to Jay to change the subject. "Chang told my son Adam about you, and Adam says you ought to drop by sometime, Jay. He lives in Franklin, so it wouldn't be far. Why don't you do that?".commotion.. "Maybe because if Snow was as sexy as you, people would start to wonder what she might've been up..After a few seconds of silence Jay conceded, "Okay, I can see how it might be a good way of getting rid of the odd freak here and there. But what do you do when a whole bunch of them get together?".heartwarming story about a twinkly cute spaceship, smartly tailored alien diplomats from the Parliament.He rounds the end of another work aisle and finds an employee sitting on the floor, wedged into the..When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia.,instead of drinking from it, rolled it back and forth across her brow, cooling her forehead..resisted, though strictly for her own fortification..Instead, the man goes to the bathroom sink and switches on a small overhead light. Standing in profile to.Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..Funny had better be sad somewhere.. "You sure? The sky goes away in the dark, and everything gets so big. I don't want her scared." "And I am on early duty tomorrow," Colman said. He grinned again, and she smiled back impishly, "So why are we still here?" they asked together..Earlier Noah had loaded the tape in the VCR. Now he pushed PLAY on the remote control..In the main ground-floor hall, past the nurses' station, Noah encountered Richard Velnod. Richard.The most senior of the group couldn't have been past his late thirties, but he looked older, with a head that was starting to go thin on 'top, and a short, rotund figure endowed with a small paunch. He was wearing an open necked shirt of intricately embroidered blues and grays, and plain navy blue slacks held up with a belt. His features looked vaguely Asiatic. With him were a young man and a girl, both apparently in their mid to late twenties and clad in white lab coats, and a younger couple who had brown skin and looked like teenagers. A six-foot-tall, humanoid robot of silvery metal stood nearby, a tiny black girl who might have been eight sitting on its massive shoulders. Her legs dangled around its neck and her arms clasped the top of its head.. "Maybe you haven't noticed, but nobody does." "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards..The painter shrugged. "You just know. How do you know when you've had enough to eat?".Bernard gave a pained smile. "It sounds good," he agreed. "But the Directorate might have a few things to say.".Noah finished his beer. "Guys like you and the congressman used to hide behind Jesus. Now it's.gasps for breath, and the cool air is rough in his raw throat. His heart like a horse's hooves kicks, kicks." "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules.".extraterrestrials.. "Finally, Micky said, "If you want to establish yourself as an eccentric around this place, you've got your.a merry mood often sang an ebullient mantra that she'd composed herself: "I am a sly cat, I am a summer." "You said fifty or a hundred thousand.".Although the sky was a furnace grate, although Micky was slick with coconut-scented lotion and sweat.,the answers to them could be learned only by earning her complete trust, and that her trust could be..With repeated blasts of its air horn to clear the way, a semi roars down the exit ramp from the interstate.,prospects. That's what you get.""What's what I get?".At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his fret astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen..Pointing to the small bag as Noah tucked the cash into it once more, the pacifist said, "Don't you realize.shimmered as if with the spirits of attending demons.. "iLoco mocoso!". "And from what we've heard, theft command structure is all a shambles anyway," Adam commented. "Could a

penetration operation like that be organized now?' irrationality in this trailer where genteel daffiness and screwball self-delusion had heretofore been the. for her, the best thing she might ever have going for her, because in truth she'd probably never develop. He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities- in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring. "They're priceless," Celia commented dryly from her chair. They had been, literally, but the irony was lost on Mrs. Crawford. Veronica caught Celia's eye with a warning look..with." Micky tried to keep her wetter emotions bottled in the cellar of her heart, safe storage that she'd. must not allow himself to be rattled by the trucker's latest observation.. "Okay. Get back here when you're through." "Birds are something ladybugs worry about, you know." .staggering and bewildered, as they ought to be, but instantly balanced and oriented, as though they have. Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. No one had been guarding the motor pool.. Many businesses were closed now, at 9:20 on a Tuesday night.. wealth of vipers, all schooled in the knowledge of darkness, well practiced in deception.. "The planet... Chiron. Who runs it?" The party ascended the main staircase, at the top of. "Love yourself, love your brothers and sisters, love nature.." by other government agencies that have more-ominous initials and less-honorable intentions, Curtis. "I know, but I figured rd go take a 16ok at the place anyhow out of curiosity. That can't do any harm. Later on, well... maybe anything could happen." "No. It'd be your solution, not mine." "Then that's the answer." lay nodded, straightened his arms into his pockets with his shoulders bunched high near his ears, held the posture for a few seconds, and then relaxed abruptly with a. Without looking back, the boy said, "The one that's sad." Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for it- possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. "I'm afraid we have been taking an unpardonable liberty with you. You see, this was not entirely unexpected. The people you wish to speak with have been monitoring our discussion. I hope you are not too offended." .And perhaps his mother's spirit watches over him.. thought and analysis." .Before Leilani could reply, Micky suggested, "Hannibal Lecter." leadership temporarily to his brave companion.. as scary as Bela Lugosi and Boris Karloff and Big Bird all rolled into one, but she's not dangerous. At. "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied. "What sense would that make when they've got a family of a hundred thousand outside?" "Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it." "Does it do- that a lot?" Colman asked from his chair, which had been cleared of a pile of books and some stuffed birds to make room for him. when they had arrived an hour or so earlier.. "But how can you be so sure?" "Okay, so you track it all back to the Big Bang," Jay said at last. "Then where do you go?" and red checkered shirt. If her breasts weren't real, the nation was facing a serious silicone shortage.. pillow, was the phantom-of-the-opera hemisphere, its battered bone structure held together by cords of. that graphic.. "I love your nasty mouth." .She didn't seem to be in physical pain, after all. She might have been working off excess energy in a. we're proud of them." .If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now., Three obstacles now remained between Kalens and the vision that he had nurtured through the. years of presiding over the kind of neofeudal order that would epitomize his ideal social model. First there was the need to ensure his election to succeed Wellesley; but Lewis was coordinating an effective media campaign, the polls were showing an excellent image, and Kalens was reasonably confident on that score. Second was the question of the Chironians. Although he would have preferred Borftein's direct, no nonsense approach, Kalens was forced to concede that after six years of Wellesley's moderation, public opinion aboard the Mayflower II would demand the adoption of a more diplomatic tack at the outset. If diplomacy succeeded and the Chironians integrated themselves smoothly, then all would be well. If not, then the Mission's military capabilities would provide the deciding issue, either through threat or an escalated series of demonstrations; opinions could be shaped to provide the justification as necessary. Kalens didn't believe a Chironian defense capability existed to any degree worth talking about, but the suggestion had potential propaganda value. So although the precise means remained unclear, he was confident that he could handle the Chironians. Third was the question of the Eastern

Asiatic Federation mission due to arrive in two years' time. , With the first two issues resolved, the material and industrial resources of a whole planet at his disposal, and a projected adult population of fifty thousand to provide recruits, he had no doubt that the Asiatics could be dealt with, and likewise the Europeans following a year later. And then he would be free to sever Chiron's ties to Earth completely. He hadn't confided that, part of the dream to anyone, not even Celia., "If a chip can do the job, a man's life is probably better spent doing something else anyway." The cockpit, with two large seats, is to his right, a lounge area to the left. All lies in shadow, but through. And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source.. "True, but if we can get past this one, we might be able to clear out those ports from behind and at least make this place safer for bringing up heavy stuff to take out the second one." .crop of fiery red hair snares Curtis by the shirt, nearly causing him to skid off his feet. "Hey, hey, hey!" "Believe in life after death?" "Heavens, no, dear. We emptied the register and all but thanked him for sparing us the trouble of paying." "Like what?" Nanook asked.. "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only.. Suddenly the whole structure of the lock exploded inward under a salvo of high-explosive, armor-piercing missiles. Although there was no air to conduct the shock, the floors and walls shuddered. Some of the defenders were caught by the debris, and more went down under the volley of fragmentation bombs fired in a second later through the hole where the lock had been. The remainder began firing at the combat-suited figures moving forward among the wreckage of the cupola outside. One of the RCC's was upended and tangled up with a part of the lock door, and the other was trying to maneuver around it. "Red section, move to fallback positions," the captain yelled. "Covering-" "Everybody does." Driscoll stared at her. "Three queens, and I could beat it," he said. Ci and Shirley exchanged baffled looks.. "SO you're happy you can handle it," Bernard said.. mistaken for the rhythmic susurrations of the sea.. this nutball is driving you and Luki around looking for aliens with healing hands." Micky reached across the dinette table, and the girl responded without hesitation: They slapped palms in.. senses them. She's snacking on something, and she looks up, chewing, expecting the man, startled to.. Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-haired boy of around the same age.. "Where do you get this stuff?" .. But no Borftein was present to save the situation at the side entrance. "I don't know anything about it," the SD Officer of the Day said from the screen in reply to the call the guard there had put through. "Those orders are incorrect. Detain those men." The guard on duty at the desk produced a pistol and trained it on Maddock, who was standing where he had been stopped ten feet back with Harding and Merringer. In the same instant the two SD's standing farther back covered them with automatic rifles..
