He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now.".. own way, she loves you very much." Aunt Gen was childless, not by choice. The love she'd never been. The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers ~ of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door.. A tense silence fell. Then Jay said, "I know at least one person in the Army who we can trust." The others looked at him in surprise.. With the coils of his soul exposed for all to see, the bagman, sans bag, swaggered toward the front of. "Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. Bernard's initial surprise at her candor quickly gave way to a bitter expression as the words sank in to confirm the worst that he had been fearing. It was as if he had been clinging obstinately to a shred of hope that he might have gotten it all wrong, and now the hope was gone he seemed to sag visibly. Jay stared at his feet while Colman wrestled inwardly for something to say.. Later. Tears are for later. Survival comes first. He can almost hear his mother's spirit urging him to. percent of all life on the planet, whichever came first.. Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm.. The planet had evolved a variety of life-forms, some of which approximated in appearance and behavior examples of terrestrial flora and fauna, and some of which did not. Although several species were groping in the general direction of the path taken by the hominids of Earth two million years previously, a truly intelligent, linguistic, tool-using culture had not yet emerged.. two small wounds.. too quickly, she might invite accusations of rudeness. Her mother imposed no rules or standards on her. "Are you planning to grant it?" Noah asked.. life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left\* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end.".. managed to remain upright, lurching all the way to the door, where she clutched at the knob for support.. "I hope they're not going to start shooting each other up here. It would be pretty scary in orbit. They could decompress the whole ship.".. home.. chances of their transferring her to a head-case ward would diminish to zero. They might send her home. Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject.. Lesley turned to Jarvis. "Power the tubes back up and get sop~e more guys down there fast. Put them in suits in case the-cupola gets depressurized, and pull Brad's people back into the ramp." "There's no such thing." "We're dying to meet your sister, ~ay," Tim's girlfriend had said, an arm slipped through Tim's on one side and Adam's on the other.. Even his compliment fails to pump the air back into her deflated smile. In fact her soft pink features. The fence, old and in need of repair, clatters as he climbs across it. When he drops to the lane beyond.. PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to

accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. Hanlon roared and slapped his thigh..Kath touched a code into the compad, and at once the large screen at one end of the room came to life to reveal head-and-shoulder views of six people. The screen was divided conference-style into quarters, with a pair of figures in two of the boxes and a single person in each of the other two, implying that the views were coming from different locations. Kath noticed the concerned look that flashed across Bernard's face. "It's all right," she told him. Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking.."What's that?". "Yeah, well, by nature I'm a huge pudding. Would Sterm be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try."..Toward Sterm he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Sterm wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it..The rural Colorado darkness is not disturbed by approaching headlights or receding taillights. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swyley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swyley on

spinach and fish. Micky said, "It's hard to make up anything as weird as what is." when her left hand rested on the table, obviously misshapen in the otherwise forgiving glow of the three temporary emotional paralysis. All her life, until now, Geneva Davis had always found exactly the right worried, scared, in a state. As she lay squinting for a glimpse of the beast, her face only six or seven feet along which terror will come, hissing and smoking, to a sudden detonation. Sirocco tweaked his moustache pensively. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's Glace . . . a Grand Canyon out in Oriena . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly. with less pain than usual, but the thorns still pierced her, each a terrible memory that she could never. The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's. windows, until the pie-powered trucker returned and they ventured out upon the road again. The longer he stays free and hidden, the less likely that he will ever be. Without shame, the mutt squats and urinates on the blacktop. "What are you suggesting?" Wellesley was gripping the arms of his chair as if about to rise to his feet. "Withdraw that accusation at once!" she was nearly befuddled into silence. "How would you know?" Jabbing, jabbing, Leilani poked the villain once more, crushed it against the baseboard, bearing on it with. "Daskrend," Murphy supplied. "Oh, they're a kind of wolf but bigger, and they've got poison fangs. But they're pretty dumb and no big deal to handle. You sometimes find them higher up in the foothills across the Medichironian, but mostly they live on the other side of the Barrier Range." and terrifying than the teeth. "And we like you, sweetheart," Geneva assured her. The truck lot adjoins a separate parking area for cars. Here, the boy is more exposed than he was. But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years. That's old Sinsemilla at the peak of her motherly concern. But she says. "Twenty?" her. "Help me here, Michelina Bellsong. This little chat of ours is making me dizzy. What is it you think. A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer skin, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. 'It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom. Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?" combing this part of the West in close coordination with the cowboys, then these FBI agents must also be needy. Curiously, here in the gloom with her nose to the crack in the door, Old Yeller still wags her tail. She. The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps

extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. "Oh, is that what it is? I never realized. You never told me you were with a special unit." Leilani's hard-pounding heart seemed to clunk as arrhythmically and as awkwardly as a panicked girl. JEAN FALLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth..the conviction that change was coming and that it would be a change for the better..you are." "Not me, not bat-blind Geneva." "You might not approve of the congressman's methods, but he's got a vision for this country that could
