Wizards trained at the school went to other islands of the Archipelago to work against warlords, pirates, and feuding nobles, preventing raids and forays, imposing penalties and settlements, enforcing boundaries, and protecting individuals, farms, towns, cities, and shipping, until social order was re-established. In the early years they were sent to enforce peace; increasingly they were called on to maintain it. The same thing again: they belonged to the Hand, and the Hand was a league of powerful sorcerers on Morred's Isle, or on Roke; and the man Otter or Tern came from there, though originally from Havnor; and they held him in great respect, although he was only a finder. The sister had vanished, perhaps gone with Otter to Endlane, where the mother lived. Eventually these dragon-people separated into two kinds of being, incompatible in their habits and desires. Perhaps a long geographical separation caused a gradual natural divergence, a differentiation of species. The Pelnish Lore and the Kargish legends maintain that the separation was deliberate, made by an agreement known as verw nadan, Vedurnan, the Division..As old as Gont Island.".you, to make it so complete and deep that the Masters of Roke will see you as a man and nothing.building by a conveyor belt set against the wall. Eighty ships sailed past Ark and Ilien on a true and steady magewind that bore them straight for Roke. Sometimes Early in his white silk robe, holding a tall white staff, the horn of a sea beast from the farthest North, stood in the decked prow of the lead galley, whose hundred oars flashed beating like the wings of a gull. Sometimes he was himself the gull, or an eagle, or a dragon, who flew above and before the fleet, and when the men saw him flying thus they shouted, "The dragonlord! the dragonlord!".her hand on it.
