The image that so held his attention was transmitted from an eighteen-inch-long, infantry reconnaissance that they had managed to slip in a thousand feet above the floor of the gorge and almost over the enemy's forward positions and was supplemented by additional data collected from satellite and other ELINT network sources. The display showed the target command bunker at the bottom of the gorge, known enemy weapons emplacements as computed from backplots of radar-tracked shell trajectories, and the locations of observation and fire command posts from source analysis triangulations of stray reflections from control lasers. On it the cool water of the stream and its tributaries stood out as black lines forking like twigs; the rock crags and boulders were shades of blue; living vegetation varied from rust brown on the hills to deep red where it crowded together along the lower slopes of the gorge; and shell and bomb scars glowed from dull orange to yellow depending on how recently the explosions had occurred.. It was not Columbine who let him in, but her understudy, Lida Mullens, Lida informed Barry that Columbine had joined her husband in Wilmington, Delaware, and there was no knowing when, if ever, she might return to her post as Miss Georgia. She had not left the promised sticker, and Lida seriously doubted whether she had any left, having heard, through the grapevine, that she'd sold all three of them to an introduction service on the day they came in the mail. With his last gasp of self-confidence Barry asked Lida Mullens whether she would consider giving him an endorsement. He promised to pay her back in kind the moment he was issued his own license. Lida informed him airily that she didn't have a license. Their entire conversation had been illegal.

No sane attacking force would contemplate taking an objective like that by a direct frontal assault in the center--the lowermost stretch of the trail was too well covered by overlooking slopes, and there would be no way back if the attack bogged down. That was what the enemy commander would have thought anyone would have thought. So what would be the point of tying up lots of men to defend a point that would never be attacked? According to the book, the correct way to attack the bunker would be along the stream from above or by crossing the stream below and coming down from the spur on the far side. So the other side was concentrating at points above both of the obvious assault routes and setting themselves up to ambush whichever attack should materialize.
