Another flash of stars and they were in Idaho, one of the two fixed modules that carried the main support arms to the Spindle. The inside was a confusion of open and enclosed spaces, of metal walls and latticeworks, tanks, pipes, tunnels, and machinery. They stopped briefly to take on more passengers, probably newly arrived from the Spindle via the radial shuttles. Then the capsule moved away again..Anyway, when the doctors learned Sinsemilla was the wife of that Preston Claudius Maddoc, the Jay had turned pale and was sitting motionless~ Colman's eyes blazed up at Padawski. Padawski's leer broadened. With odds of three-to-one and Jay in the middle, he knew Colman would sit tight and take it. Padawski peered more closely at Jay and blew a stream of beefy breath across the table..weary in body, mind, and spirit. And her emotional unsteadiness scared her..jeans. He smooths the bills and sorts them. Not much to sort. He counts his treasury. Not much to count.. "Don't look directly. The old Chevy across the street." .one would come here in search of love or chivalrous adventure.."Two of your officers are heading this way. I thought you ought to know." .Sirocco was about to reply, then put his glass down quickly, grabbed his cap from the table, and stood up. "Time I wasn't here," he muttered. "I'll be up in Rockefeller's if anyone wants to join me there." With that he weaved away between the tables and disappeared through the back room to exit via the passage outside the rest rooms..Stanislaw took a long draught from his glass and made a what-the-hell? gesture. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family." ."Yes--some kind of industrial complex, wasn't it?" "It's a centralized, fusion-based facility, that provides gen-.Celia waited for a few minutes to give anybody a chance to come back for something, then stepped from the shower, found the clothes that Veronica had left, and spent a few minutes putting them on and lacing the boots. She was..Instead, each time Noah saw this boy?twenty-six but to some degree a boy forever?he was pierced.While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company.."There's only one. Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?" .Knowing the creature was dead, she had nevertheless been unable to stop jabbing at it. Out of control..Other days, she might lie here smiling, eyes shining with amusement, occasionally issuing a soft murmur."Oh, Jay, don't be silly. Come on now--tell me where all this came from." .tip?" .overheating vehicles..Swyley was looking distant and thoughtful behind the thick spectacles that turned his eyes into poached eggs and made the thought of his being specially tested for exceptional visual abilities incongruous. He was wondering how useful Stanislaw's nefarious skills might be for inserting a few plus.-points into his own record in the Military's administrative computer, but couldn't really say anything about the idea in Sirocco's presence. There was such a thing as being too presumptuous. He would talk to Stanislaw privately, he decided..resisted, though strictly for her own fortification..The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's.."Why is it the way it is? How does what you and I do in. Jersey have anything to do with my dad's job? It doesn't make any

sense." Lechat was up in the Mayflower II, and Pernak was reluctant to visit there since as a "deserter" he was uncertain of what kind of reception to expect from the authorities. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. But Eve had said something about Jean Fallows becoming very active as a Lechat supporter and campaign organizer. . . That would be a good place to begin..Merrick's pained expression deepened into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days." Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swley on spinach and fish..Kalens looked disdainfully down his nose. "My staff contacted him through the Chironian communications system. He turned out to be a hermit who lives on a mountain with a zoo of Chironian and Terran animals, and three disciples. They're all quite insane."..A gleam of hope had come into Lechat's eyes. "Do you really think they might be able to pull something off?".. "I know all the bemuses. "Well, hello, Jeeves. How about all that? I guess ,you'd better stay who you are for the time being. How about giving us a rundown on this place for a start? For instance, how do you..."..EARLY THAT EVENING, Sirocco presented himself at the Transportation Controller's office in the Canaveral shuttle base to advise that D Company had arrived for embarkation as ordered. Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. Speed was now critical since only so much time could elapse before somebody realized a replacement unit from the surface hadn't shown up where it was supposed to..At any moment, however, one of them might retreat here to the bedroom. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. Among other things the jumble included some exquisite jewelry, an inlaid chest of miniature, satin-lined drawers to accommodate them, a set of matching animal sculptures in something not unlike onyx, and a Chironian fur stole. "Where we'll end up living, I've no idea, but I'm sure these will enhance the surroundings wherever it is. Don't you think the silver is delightful? I'd never have thought that such

She could have been a unique, thinking person. Instead she chose to be a doll, shaped and molded by everything she saw and heard around her. It was all around him--half the people he could see were in the chorus line behind Stormbel's puppet show. They could be told what to think because they didn't want to think. Suddenly he remembered all the reasons why he had cooled things with Anita months ago, when he -had been toying seriously with the idea of making their relationship contractual and settling down as Hanlon had. He had tried to tune into her wavelength and found nothing but static. She nodded her head to indicate the direction they had come from. "We've got a class of kids back there who are bubbling over with curiosity. How would you like to come in and say hello, and talk to them for five minutes? They'd love it." As a youth he had daydreamed about becoming an entertainer--a singer, or a comic, maybe--but he couldn't sing and he couldn't tell jokes, and somehow after his parents died within two years of each other halfway through the voyage, he had ended up in the Army. So now, though he still couldn't sing a note or tell a joke right, he knew just how to use an M32 to demolish a small building from two thousand yards, could operate a battlefield compack blindfolded, and was an expert at deactivating optically triggered anti-intruder personnel mines..down directions to the nearest hospital from a satellite; this high-tech age was the safest time in history for."Who?".his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out.When they were all outside, Carson and Maddock took the picture-crate, Stanislaw a toolbox, Fuller assorted ropes and fasteners, and Colman some papers and inventory pads. Veronica carried a large roll of packing foam on her shoulder, keeping it pressed against the side of her face. Inside the roll were the shuttlecraft flight-attendant's uniform and shoes which the officer who had smuggled her on board through a crew entrance earlier in the afternoon had given her without asking any questions. They mingled with the bustle going on around the house and all through the ground floor, and eventually came together again upstairs, outside the door leading through to the rooms that bad formed the Kalenses' private suite. Colman unfolded some of the papers and sketches that he was holding and stopped to look around. After a few seconds he gestured to attract the attention of the SD guard who was standing disinterestedly near the top of the main stairs, and nodded his head in the direction of the door. "Is that the way into the bedroom and private quarters?" he asked..Sterm brought his fingers together in front of his face-a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed fiat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." "Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module..Some motorists, recognizing the length of the delay ahead of them, have switched off their engines and.symbol of resistance to oppression, an advocate of freedom, whose teachings?both her philosophy and.slope from the highway. Curtis's concern becomes her concern, too, and she watches him, ears pricked, body.Bernard nodded. "Okay. We'll see you later then. Maybe you'd better leave that stuff here for now, Jay. He takes a moment to thank God for keeping him alive, and he thanks his."And someone wanted the cash," Leilani guessed.."Maybe you haven't noticed, but nobody does."..Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face..The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. "Kids running around wild, breeding like rabbits--It's disgusting. And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left.."I hung it in the hallway," Veronica said, getting up. She walked ahead and out the door while Mrs. Crayford waddled a few feet behind. "Don't bother bringing anything out, Celia," Veronica's voice called back. 'I'll come back in for the things."..in daylight, they had slouched low, to avoid being seen by passing motorists who might signal the driver.family. Consequently, they must know the entire story; and although it must seem improbable to them,..All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise.."No roses."."For now," Stern added. "The rest comes later."."There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards..politics?helping troubled youth, turning their lives around."..Bernard didn't seem as surprised as he might have been. In this case, it just means 'as bad as a.horse as they cross burning desert sands. "Nobody's going to shut that complex down, and you know it," he said. "Save the propaganda. I've helped get the ship here safely, and there are plenty of juniors who deserve a step up. I've done my job. I'm quitting."..Clem waved an arm casually without looking back. "Go ahead," he said. "Can't see as you really need any, though. You're pretty safe up here. We don't get many burglars." Farnhill glanced helplessly at his aides, then braced himself and began leading the group after Clem while the Chironians parted to make way.
