What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead. "I know Crayford and his wife. One of the crew got me through. That can wait. It's about Celia." "Does it do-that a lot?" The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared. "Sweetie, you're a victim, you've nothing to be ashamed about." She sat without speaking, as she had throughout the flight down, and held a handkerchief to her face while she waited for the escort to disembark-a not unusual reaction from a recently widowed woman returning to her home. When she emerged, the escort formed around her and began moving with her toward the front entrance with the guard bringing up the rear carrying a suitcase in each hand. Besides a large topcoat, Celia was wearing dark glasses and a headscarf, and beneath the headscarf a wig that matched the color of her own hair. convention of Christian road warriors. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She

produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room. Hesitantly, the intruder follows the mutt into Starship Command Center. The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak~ that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! F.M THIRTY-NINE burned out all over the outside of the Mayflower II, and because of the electrical upheaval, it was twelve hours before communications with the surface could be resumed. Leilani wasn't able to act on her own good advice. Fear and anger prevented mind and body from being. "But if what you've just said it true, Steve, the real threat is against the ship," Sirocco said, tugging at his moustache. "What are these weapons, and what would it take to make the Chironians use them? I've got to have more information." motorists scatter before it. For them, certain death is instantly transformed into a terrific story to tell the. Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject. "I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier. "Not me. I'm a pacifist." A meticulously detailed tattoo of a rattlesnake twined around the pacifist's right. She was rationalizing or hiding something from herself, she knew. Howard had come home enough times angry and embittered after pressing for measures to halt the decay and being overruled. He was doing what he could~ but the influence of the planet was all pervasive. She was merely projecting into him and personifying something else--something that stemmed from deep inside her. Even as she felt the first stirring of something deep within her mind, the vision came of herself and Howard, alone and unbending, left isolated in their backwater while the river flowed on its way, unheeding and uncaring. After twenty years, nothing lay ahead but emptiness and oblivion. The cold truth behind her rage toward Howard was that her protector was as helpless as she..another what's-happening-what's-up-what's-this-all-about. Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others. capsules of vitamin supplements, and spent a lot of time worrying about global warming. Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." Curtis is "not quite right," as Burt Hooper put it, and Old Yeller is neither yellow nor male, nor heat isn't blistering. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." seed, you don't scare me!". large pointed horn to make the comparison perfect.. Bernard's jaw dropped. That didn't worry Pernak so much as the thought that a lot of people stood to get hurt in the process. Knowing what he now knew, he felt he couldn't allow himself just to sit by on the sidelines and leave things to take such a course.. "Absolutely. I don't have enough of it anymore.". Sirocco resumed twiddling his moustache. "Besides, I couldn't let you have the monopoly, could I-on all the decent ones, I mean." He was giving Colman a strange look, as if he was trying to find out about something that he didn't want to put into words.. transport.. Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory.. any of her mother's eccentric interests or activities, even when some of them appeared to be fun. Jarvis and Chazurez glanced at each other. Then Jarvis looked away as a new report came up on one of the screens.
