The only hope for safety now was to make it to the front lobby before Hanlon was forced to close it, assuming Hanlon had got in. "Go first with four men,.".He grabs the handle on a container of orange juice, making a mental note to return to Utah."Yes, Jay. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels.". "Thank you," Merrick said, pouncing on the opportunity to conclude. "I agree with and endorse your assessment. Very good, Fallows. Enjoy your leave." Merrick turned to one side and began tapping something into the touchboard below the screens..The SD sergeant half rose from his seat. What Swley was saying might be true as far as it went, but Colman was certain that in Kath's case Swley had, for once, missed something, something more personal than just political motivation..".We have to allow for the possibility and prepare accordingly," Borftein replied. "Yes, it is..".killers and are holding them for justice..".The ship's changed a lot since then though," Colman remarked. "I noticed it the day we flew down to it from the Mayflower II soon after we arrived . . . when Shirley and Ci met Tony Driscoll. The front end must be at least twice as big as it used to be.". "No," the boy answered after a moment's reflection. "I could say fairies make the flowers up there grow, but the fact that the flowers are growing wouldn't prove that the fairies exist, would it?". "Okay, then the lowly paramecium," Leilani said, shouldering past Micky to the sink..".So where do we go from here?" Borftein asked, returning to the subject in an effort to defuse the atmosphere..".Just a bunch of hooley ? ".Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for..".She's been blue all day," said Wendy Quail..any lesser person. Surely not. She is majestic. She is magnificent, beautiful. She can live by her own rules..One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. Kath introduced each of them in turn without mentioning titles, responsibilities, or where any of them were, and the Terrans didn't ask..them to the silken gloom and the suety glow of the candle flames..It was interesting, certainly. "Well.. . maybe," Bernard replied guardedly. "Who do you know there?" -. "Some grandmothers!" Terry exclaimed. "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. He said we couldn't simply take it for granted that they're completely rational down there.".Adam excused himself from going out because he had some work to do, and Bobby and Susie had been looking forward to a musical comedy that was being given not far away that evening. Colman assumed that Kath would want to go with them, which would leave him flipping a coin over which show to see; but to his

surprise she suggested a drink somewhere for the two of them instead. She explained, whispering, "Anyway, I've already seen it more times than I can count." So who was he to turn it down? Colman asked himself. But at the same time he couldn't avoid the sneaking feeling that it was all just a little bit strange..with the thingy..feels her brother-becoming's distress..offering something. "Baby, it's okay, see, baby, look..". "That's all," Murphy said, addressing the cart. "Ninety-seven, Cordova Village. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the right angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals..okay, too..to do. I can get where I want to go, no matter how hard it is..".In a crouch, he crosses the roof to the brink. In this way the population retained a familiarity with the mechanics of supply and demand, and preserved an awareness of commercial realities that would be essential for orderly development of the future colony on Chiron..".Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon.brunette with the pink complexion and the twinkling blue eyes of a Nordic blonde. In her crisp.local authorities would probably decline to do battle with him..The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species'--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system..".flamboyant fantasies rivaled Dorothy's dreams of Oz; however, Micky could get no glimpse of yellow.Stanislaw was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a corner. Stanislaw looked up triumphantly at Sirocco. "3.141592653," he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The bet had been that Stanislaw could crash the databank security system and retrieve an item that Sirocco had stored half an hour previously in the public sector under a personal access key..embarrassment at his own shortcomings. "You help me? How?".Geneva's face puckered in puzzlement. "You can help me finish up here. We can go and see it tomorrow..".Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again..Bernard looked out again and shook his head.

"Not until that ship up there is disarmed somehow." After a pause he turned to face her again. "So it doesn't scare you anymore, huh?". "You haven't gone to the police," Micky said.. "Aren't the boarding gates being checked?" Colman murmured, surprised.. "Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside..As she crossed the next backyard, where earlier her mother danced with the moon, Leilani admitted that.Merrick nodded gravely. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down. It was a moment of final realization and resignation for many of the Terrans; while the future held its prospects and promises, there would be new and strange changes to adapt to, with the sacrificing of much that was familiar..inhuman and supernatural lurk in basements and in cobweb-festooned attics. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business.. "That's tough. But my useless dad skipped the day I was born.".Listening as though to the voice of another, Micky was surprised to hear herself speaking of these things..Jarvis and Charez glanced at each other. Then Jarvis looked away as a new report came up on one of the screens. "Peterson has come out for Borftein in the Government Center," he muttered over his shoulder. "I guess it's all over in the Columbia District. That has to give them the whole Ring.".The bitter coffee had grown cool. Micky sipped it anyway. She was afraid that if she didn't drink it,.you want to talk about anything instead of just around it, I'm here.". "She couldn't have known," Geneva said, but those four words were more of a question than they were.Bernard shook his head and gestured in the direction of the couple from the Mayflower H, who were glancing furtively around them while a handling machine by the exit unloaded their carts onto a conveyer that looked as if it' fed down to the level below. "But look what's happening," he said. "How long can you keep up with that kind of thing? What happens when everyone starts acting like that?".Why does man kill? He kills for food. 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air.
