Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..check.."Was it ever like this? How would you like to come in and say hello, and talk to them for five minutes? They'd love it." "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. "Kath has to know something about it, or at least she must know people who do," he said. "After all, there aren't billions of people on Chiron. And Jerry said that she has. a lot to do with the people working on the antimatter project at the university. Let's start with her." .She blotted her hands on her shorts..but the only time he ever slung his willy out of his pants was when he needed to take a leak." .Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen.

"Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Sterm an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Sterm for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." Leilani's palms were still damp. She blotted them again. In spite of the August heat, her hands were cold.

CHAPTER FIVE. Colman could only shake his head. "I don't know. Neither did Jay. That's what Fallows and whoever this other guy is want to find out." "Did you ask him about it?" "Uh-huh." "And?" Jay squinted into the distance and scratched his head. "Pretty much what I expected. Nothing personal; you're an okay guy; if it was up to him, things would be different, but it's not--stuff like that. But he was only saying that so as not to sound mean--I could tell. It goes deeper than that. It's not a case of it being up to him or not. He really believes in it. How do people get like that?" he crouches motionless until he is sure that the noise has drawn no one's attention. "I wish I'd heard them back when I could've helped you." "That was all a long time ago, Aunt Gen." shouting. "FBI! FBI! Freeze, freeze, freeze!" "Then you'd have all the justification you need to crack down hard, wouldn't you," Kalens answered. Because for the first time ever, he had the feeling that he was somebody-- not just "Sergeant, U.S. Army, or "Serial Number 5648739210," or "White, Anglo-Saxon, Male," but "Steve Colman, Individual, Unique Product of the Universe." Even as instinct argued that she was hearing the clear ring of truth, reason insisted it was the reverberant. to go upstairs to find those necessities. The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem." "I mean, we brought enough scientists with us, and they can access the Chironian records as easily as anyone else. The Chironians aren't exactly secretive about their physics." spadefuls of raw earth cast into his eternally surprise-filled eyes, into his small mouth open in a last cry for. PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters. Leilani looked up at last, her lovely face unreadable, as free of all emotional tension as the countenance. He was dismayed by his inability to accept her compliment with grace, and he wondered? though not politics? helping troubled youth, turning their lives around." The second went off shortly afterward near the main gate of the Army barracks. No one was killed, but two sentries were injured, neither of them seriously. "I had already come to that conclusion," Leon replied. - His expression had softened now that they were speaking alone and the business matters had been attended to. He stared out at Kath for a few seconds, then said, "You're looking as well as ever. Are the children keeping fine too?"

CHAPTER SIX. Before Leilani could reply, Micky suggested, "Hannibal Lecter." Jay grinned, just a trifle sheepishly. "Er. . . would you get mad if I asked Steve to come along too?" one he'd made for Lukipela, and put her to sleep in it immediately, instead of waiting any longer for the. Colman hesitated for a split second to let the question ask itself. "So...?" Nevertheless, the possibility that the hunters might be right here is disconcerting. Their nearness makes her second piece. JAMES Hogan WAS born in London in 1941 and educated at the Cardinal Vaughan Grammar School, Kensington. He studied general engineering at the Royal Aircraft Establishment, Farnborough, subsequently specializing in electronics and digital systems. GENERAL J STORMBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they

did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected-as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter..everyone was beautiful and rich and happy. Leilani didn't actually search for the passageway, but based.Spears.. "Sure," Chang said confidently. "I'll give you a call when I've talked to Adam. He's the friend. Would Jay like to go too."?.Colman and Hanlon frowned at each other. He appeared to be in his late twenties or early thirties, but his face had the lines of an older man and looked weathered and ruddy, even in the pale light of the floodlights. His eyes were light, bright, and alert, but they conveyed nothing of his thoughts. "How did it happen?" Colman murmured in a low voice, moving a pace nearer..he'd drag us all along, as usual, but once he unhitched the SUV that we tow behind the motor home, he believes in all of it, and more," Leilani reported..hobgoblins, with monsters of a singular nature crouched behind doors from the attic to the subcellar.."Oh, that locomotive!" lean looked at lay. It's what you are that matters." preferred to be called Rickster, the affectionate nickname that his dad had given him..Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..meaning in every day will live in joy. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..at the pump islands is a far away grumble. I think I'll buy me a girl cat and call her Mr. Rover." Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. She's gotten herself mixed up with Sterm, and she can't make a move without being watched. She could be in real

danger, Steve. She has to get away from there."
