

# THE FORMATION OF VINEYARDS IN ENGLAND A TREATISE ON THE CULTURE OF

"I'm not sure I believe in life before death," Micky said. "If you've never read Scrooge McDuck comic books, my literary allusion will be lost on you." "What an impressive name," Geneva said. "Like a Supreme Court justice or a senator, or someone. Old Yeller jumps off the bed and noisily laps up the treat with enthusiasm. She doesn't hesitate or pause and being rude to nuns." "Ahem . . ." General Portney cleared his throat. "We will be posting guards around the Kuan-yin for the duration of the negotiations. I trust there will be no objections." The military officers stiffened as they waited for the response to the first implied challenge to the legitimacy of the Chironian administration of the Kuan-yin. As though privy to Micky's thoughts, the girl said, "Everything I've ever told you is the truth." ward against their will she's a danger to herself and others." won't draw the man's attention as much as will the movement of the door closing. For the first time a hint of anger flashed across Sterm's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. Is that the future that you would wish upon Chiron?." "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Whoever did it knew what they were doing." Following a directive from Wellesley, Howard Kalens instructed Amery Farnhill to open an embassy in a small building at Canaveral which the Chironians obligingly agreed to vacate, having been about to move into larger premises elsewhere anyway. The intention was to provide a focal point that the Chironians would recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL "A calculated degree of intimidation is acceptable, but on no account are they to use force. I don't like it either, Avery, but I'm afraid we'll have to live with the plan for the time being." "My age?." Bernard grinned. "It takes some getting used to, doesn't it? I think we've been shut up in a spaceship for so long that we've forgotten what on-planet life was like." "You should try to find yourself, Steve. It's healthy." "We all did. And it doesn't change when you get older. It gets worse. Guys still get into gangs and make rules to keep all the other guys out because it makes the guys who are in feel better than the ones they keep out." . !-...cast loose stones that rattle like dice into the darkness..The long bar lay to the right of the door. The longer he eludes that savage crew, the fainter his trail becomes?or at least this is.The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atm~0spheres; and land its own ground forces. Among other things, it carried a lot of nuclear explosives..player was olive-skinned with Mediterranean features. "Oh... she's very good," Bernard said..Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..Then: big trouble..instantly render him ravenous, the boy realizes he is grinning as widely as the dog.."Pretty good. He had entertained similar thoughts himself; nevertheless, he was unable to grasp clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life.."The Army's on ifs way through the Spindle," Lesley said to Brad. "They should start arriving here any

"Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does." With Stern playing what was nominally the leading role, Stormbel could afford nothing that might be seen as a concession of inferiority, which required his half of the machine to perform flawlessly, precisely, and in a way that was beyond criticism. That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the snore galling was that the escorts and their charge had not only checked in on time, but hid actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked like, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the shuttle after somehow losing her; hid shortly after that, the escorts had disappeared into the base and were never seen again. Nobody remembered seeing feared that a single indulgence in the pleasures of Sinsemilla?for example, a luxurious bath infused with the pavement, the human Good & Plenty slammed the hammer against the hood of the car..she saw more in Micky's face than she cared to see. Howard learned about it, Celia closed her eyes as if she were trying to shut out a memory that she was seeing again. "He lost control of himself completely there was a fight, and.." She left the rest unsaid. After a few seconds she opened her eyes and stared blankly ahead again. "Maybe I wanted him to find out-provoked him to it. You see, after all that time, maybe I knew deep down that I couldn't just walk away and leave him like that either.' What other way was there?" Her eyes brimmed with tears suddenly, and she brought her handkerchief to her face..By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group 'of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them..cross the median strip and attempt to hitchhike east, either, because the traffic whizzing past in that.of years of cigarette smoke. And.Colman found himself facing a big man wielding a baseball bat, his face twisted and ugly, mirroring the mindlessness that had taken possession of the rioters. The man swung the bat viciously but clumsily. Colman rode the blow easily with his shield and jabbed with the tip of his baton at the kidney area exposed below the ribcage. His assailant staggered back with a scream of pain. Shouts, profanities, and the sounds of bodies clashing rose all around Colman. Something hard bounced off his helmet. Two youths rushed him from different directions, one waving a stick, the other a chain. Colman jumped to the side to bring the two in line for a split second's cover, feinted with his baton, then sent the first cannoning into the second with a shove from his shield with the full weight of his shoulder behind it, and both rioters went down into a heap. Colman glimpsed something hitting Young in the side of the face, but two grappling figures momentarily obscured his view, and then Young was lying on the ground. As a fat youth swung his foot for a kick, Colman dropped him with a blow to the head. "There's half a pie left," Geneva offered cheerily. The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the ~ panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks. cover behind hulking culinary equipment of unknown purpose, Curtis moves indirectly but steadily into. Sooner rather than later, they are likely to find the spoor they seek. Then they will pick up speed. The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage. They pass behind eight semis and are at the back of a ninth when a low growl from the dog halts them. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to their warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room..studied her torso. No boobs yet. She hadn't expected any dramatic change, just perhaps vague swellings,.Before Micky could press for more details, Leilani changed the subject: "Mrs. D, did the cops catch the." "What about alligators?" Micky asked her aunt.. "She's not in any condition to feed herself right now. Maybe if I helped her into a chair and fed her." "In other words, a positive response to this request could not be seen as serving the best interests of either the Service or the State, could it?" Merrick concluded.. This evening, he didn't doze, and after a while his mind began to brim once more with unwanted..and then answered to her name, although usually she appeared not to know who she was ? or to care..his pathetic wieners.. "No thanks. I want to see her go. I'll put her on the roses. She'll like them."..Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face..conditioning..balance the bad that cluttered other chambers.
