"What a delightful surprise."Of the feminine sex.At first he'd assumed that he'd failed. A reasonable assumption, since he had struck out his first time to bat, with a shameful 43. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. Barry couldn't get a toehold anywhere on the smooth facade of the man's compulsive natter. He got the feeling,..adapted to these longer cycles. "Insignificant seismic above threshold at eight hundred yards. Downwind ratio less than five points up at four hundred. Negative corroboration from acoustics-background swamping." The computers were unable to identify vibration patterns correlating with human activity in the data coming in from the sensing devices quietly scattered around the gorge by low-flying, remote piloted "bees" on and off throughout the night; the chemical sensors located to the leeward of the suspected decoys were detecting little of the odor molecules characteristic of human bodies; the microphones had yielded nothing in the way of coherent sound patterns, but this was doubtless because of the white-noise background being generated in the vicinity of the stream. Although the evidence was only partial and negative at that, it supported Swyley's assertion that the main road down to the objective was, incredibly, virtually undefended for the time being..place it right. At first he thought she was one of the company people?somebody's wife, daughter, sister. That afternoon, when he returned to the bungalow, he caught her staring at him again at the edge of the clearing. So he asked Moises who she was, and Moises didn't know. Apparently she'd just arrived a day or two before, paddling a crude catamaran downriver from somewhere out of the denser jungle stretching a thousand miles beyond. She had no English, and according to Moises, she didn't speak Spanish or Portuguese either. Not that she'd.after my time ever since her mother died. Before puberty you watch other people having sex, but even then your curiosity is easily satisfied; after an older cousin initiates you at fourteen, you are much more interested in doing it yourself. The co-op teacher monitors your studies, sometimes makes suggestions, but more and more, as you grow older, leaves you to your own devices. You are intensely interested in African prehistory, in the European theater, and in the ant-civilization of Epsilon Eridani IV. Soon you will have to choose..Robert F. Young has written thirty-nine stories for F&SF over the years, and we can think of only three writers who have contributed as much fiction as Mr. Young (Poul Andersen, A warn Davidson, and Ron Goulart). A Robert Young story is always a pleasure because its high quality is as predictable as its subject matter is unpredictable. Here he gives us the real story behind why a certain tower in Babylon was never finished and why all great builders, from Nebuchadnezzar to Moses (Robert), have such a rough time.. "Matt?" she yawned. "What's. . . what is it? Is something-".happened. Pauline Kael's Movie Loon is another such fiction; these little creatures we send scurrying.reaction due to economic depression. So does Robin Scott Wilson (who electrified a Modem Language."I'm standing here, trying to be friendly," said Amos. "I was told there was nothing of interest down.Crawford missed most of the interesting work, being more suited for the semiskilled manual labor that never seemed to be finished. So he and Lang had to learn about the new discoveries at the nightly briefings in the shelter. He remembered nothing about any animal life being discovered, and so when

he saw something crawling through the whirligig garden, he dropped everything and started over to it."No, nothing," said Smith. "That's all right, Jack, thank you." He broke the connection. After a moment he turned to the breadboard controls of the device and changed one setting slightly. In the screen, Peg turned and walked backward out of the office. When he turned the knob the other way, she repeated these actions in reverse. Smith tinkered with the other controls until he got a view of the calendar on Jack's desk. Marty thinks there's a chemical metabolism in the upper part of the shell, which I haven't explored yet. But I can't really say if it's alive in the sense we use. I mean, it runs on wheels! It has three wheels, suited for sand, and something that's a cross between a rubber-band drive and a mainspring. Energy is stored in a coiled muscle and released slowly. I don't think it could travel more than a hundred meters. Unless it can recoil the muscle, and I can't tell how that might be done." He sat there in his bulgy sponge of a chair, grateful to be alone and able to take in the sheer size and glamor of the place. Partyland was an endless middle-class living room, a panorama of all that was gracious, tasteful, and posh. At least from here in the second ring it seemed endless. It had a seating capacity, according to its ads, of 780, but tonight wasn't one of its big nights and a lot of the seats were empty..over Amos' wet clothes?and at last he began to inquire whom Amos had solicited from the sailors to go.The doe looked at the hunter for a moment more.
