Yet in one specialized way cloning can take place in even the most advanced animals—even in the human being..baby in her belly?".open window.. He said if I would work for him and carry his trunk, he..Tm not disturbing you, am I? I heard the typewriter." The room was indeed identical to mine, though..Billy Belay put his head down on the table and began to cry..At first he'd assumed that he'd failed. A reasonable assumption, since he had struck out his first time to bat, with a shameful 43. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. Barry couldn't get a toehold anywhere on the smooth facade of the man's compulsive natter. He got the feeling..This seems a terrible disadvantage. Organisms that can clone, reproducing themselves asexually..)"Thank you very much," said Amos and hurried off to the wheel-house. When he found the second.."No ideas. If other people have ideas, I can bounce off them well enough, but all by itself my mind's a..One of the transporters approached the bunker with a steadily rising whine, then hovered motionless for a second almost immediately over him before descending smoothly. Its rear door slid open to reveal the lean, swarthy figure of Captain Sirocco in helmet and battledress, still wearing his flak-vest. He jumped out nimbly while the transporter was still six feet above the ground, and ambled up to Colman. Behind his ample black moustache, the easy-going lines of his face betrayed as little as ever, but his eyes were twinkling. "Pretty good, Steve," he said without preamble as he turned with his hands on his hips to survey the indignant scowls from the captured "enemy" officers standing sullenly by the bunker. "I don't think we'll get any Brownie points for it though. We broke just about every rule in the book." Colman grunted. He hadn't expected much else. Sirocco raised his eyebrows and inclined his head in a way that could have meant anything. "Frontal assault on a strongpoint, exposed flanks, no practical means of retreat, no contingency plan, inadequate ground suppression, and no counter battery cover," he recited matter-of-factly, at the same time sounding unperturbed..)"Yes. What do I tell Amanda when she asks how I always know when something is broken? You..That it?" She washed the wound with water. The cut was long but it was not deep. Some scratch got in the woods perhaps. She knew it would heal before morning. "I suppose I have to put it in writing that I authorized the assault on my own initiative and without any substantiating data." He cocked his head at Colman. The landlady hadn't refunded his money, but she gave him an alibi for the knifing of an old man in the park on the 16th and the suicide of a girl in the same rooming house on the 19th. He'd been in the pink of health when he moved in, sick on the 16th, healthy the 17th, and sick again the 19th.."He left about half an hour before they found Maurice. His eyes became marbles brimming.We have to have children." She looked back and forth from Lang to Crawford, her face expressing."Of course we don't know if we would have made it without the assist from the Martians," Mary Laog was saying, from her perch on an orange thing that might have been a toadstool. When he resumed speaking, his tone had lightened slightly. "In the area that concerns all of us here in our day-to-day lives, the accelerating pace of the space program has brought a lot of excitement in the last two decades. Some inspiring achievements have helped offset the less encouraging news from other quarters: We have established permanent bases on the Moon and Mars; colonies are being built in space; a manned mission has reached the moons of Jupiter; and robots are out exploring the farthest reaches of the Solar System and beyond. But" --he extended his arms in an animated sigh---"these operations have been national, not international. Despite the hopes and the words of years gone by, militarization has followed everywhere close on the heels of exploration, and we are led to the inescapable conclusion that a war, if it comes, would soon spread beyond the confines of the surface and jeopardize our species everywhere. We must face up to the fact that the danger now threatening us in the years ahead is nothing less than that."."Hi," said the girl in a tone intended to convey a worldly-wise satiety but achieved no more than blank anomie. "What's up?".Hinda ran over to him and would have bathed him with her tears, but the jangling noise called out again, close and insistent. She ran to the window to see..A sponge, or a freshwater hydra, or a flatworm, or a starfish can, any of them, be torn into parts and these parts, if kept in then* usual environment, will each grow into a complete organism. The new organisms are clones.."I refuse to accept that as a final answer," he said. "But in the meantime we should explore the possibilities if what Mary says is true."Barry popped the tops
