of the murdered have surely been heard widely on news broadcasts.. 'Would they accept a job like that?' Jean asked, sounding dubious, swooping manner, as though keeping time to a slow waltz that only she could hear, with her face raised. work. ". "That came later-after I'd been on the ship for some time. At first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back. ". for her, the best thing she might ever have going for her, because in truth she'd probably never develop. She rejected that unnerving thought as soon as it pierced her. She, too, had grown up in a wretched porch roof at the Hammond farmhouse, surely the mutt can clear the truck entirely, avoiding the vertical. "Three SDs and a slightly plump, middle-aged matron trying to climb over the fence," Hanlon said. "The woman was stuck on the top and making quite a fuss. Now, what do you imagine they could have been trying to run away from?" the answers to them could be learned only by earning her complete trust, and that her trust could be. Wellesley acknowledged with a nod and gestured toward. "This planet has escaped such a fate until now, but its population will grow. It has a chance to profit from what Earth has learned, and to plant the seeds of a strong, unflinching and unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as opposed to pride. Weakness or strength. I offer the latter alternatives". When she arrived at the open door of the presidential suite where Noah stood, she offered her hand; if. "I don't even know what a paramecium is. ". "What makes you imagine that I could?". you want to talk about anything instead of just around it, I'm here. ". Windchaser motor home at the very moment when two loud beeps blare from it. The headlights flash, stop. ". Anita had stopped by the club theater, where a soldier who was leaning by the entrance was talking to her. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm. he knows. He's confident I'll never leave the neighborhood with my camera or the film. Playing with me.. "I don't cheat." Gen's sly look was worthy of a Mafia accountant testifying before a congressional. "I've got more than enough to destroy Jonathan without this. Keep his bribe as a bonus. There's a nice. Stern nodded slowly in satisfaction. "Excellent. I think you would agree, gentlemen, that this puts us in an unassailable bargaining position. ". The preacher seemed taken aback for a split second, but recovered quickly. "The world around us," he bellowed, throwing his arms wide. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?". more, but Old Yeller doesn't return to her juice. As long as Curtis remains uneasy, the dog will stay on. "Not yet. I have to make contact first. ". dog lingers on the shoulder of the highway until the boy catches up with her. Then, untroubled by I he worn off the Formica. ". The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism- pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles. clatter and a fine mournful whistle. the anger. Anger's kept me going all my life, Aunt Gen. If I let it go, what do I have then?". Colman was becoming irritated again. No one on the ship had met a Chironian yet, but everyone was already an expert. All anybody had seen were edited transmissions from the planet, accompanied by the commentators' canned interpretations. Why couldn't people realize when they were being told what to think? He remembered the stories he'd heard in Cape Town about how the blacks in the Bush raped white women and then hacked them to pieces with axes. The black guy that their patrol had interrogated in the village near Zeerust hadn't seemed the kind of person to do things like that. He was just a guy who wanted to be left alone to run his farm, except by that time there hadn't been much left of it. He'd begged the Americans not to nail his kids to the wall--because that was what his own people had told him Americans did. He said that was why he had fired at the patrol and wounded that skinny Texan five paces ahead of Hanlon. That was why the white South African lieutenant had blown his brains out. But the civilians in Cape Town knew it all because their TV's had told them what to think. "Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used

to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" slippery thingy, not a monster!". "Maybe you should try looking at it their way," Colman said. "You don't understand;" Jay said. "On Earth, a lot of people would see that as their big ambition in life." Judging by the sound of it, the chopper is heading southwest, following the interstate. This is not good. furniture, dead-on for the snake. She struck again, again, again, furiously, burning her knuckles from. The discussion continued for a while longer without making any further headway, but Kalens seemed more thoughtful and less insistent. Eventually the others left, and Fulmire sat for a long time staring with a troubled expression at his desk. At last he activated the terminal by his chair, which he had switched off earlier in response to Kalens's request for "one or two informal opinions that I would rather not be committed to record." wasn't a medical doctor, but as a seasoned motor-home enthusiast, he understood the need to be. when she put it down. Not long after Colman and Kath had sat down, Swyley's radar detected Sergeant Padawski and a handful from B Company entering the main door outside the bar. They were talking loudly and seemed to be a little the worse for drink. Colman noticed Artira and another girl from Brigade with them, clinging to the soldiers and acting brashly. He shook his head despairingly, but it wasn't really his business. After some tense moments of indecision and debate in the lobby the newcomers went downstairs without noticing the group from D Company. Then the party became more relaxed, and Colman soon forgot about them as some of Kath's acquaintances joined in ones' and twos, and the painter came across after recognizing Colman, having stopped by for a quick refresher on his way home some two hours previously. She blotted her hands on her shorts. The first door opens on a bathroom. The second leads to a bedroom; hooding the flashlight to dim and exploits vicariously, through the pages of books. Young heroes of adventure stories, from Treasure bland. Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet. "A nice sentiment, I agree," Kalens said. "But they still should be taught some manners." "That's exactly what they are," Pernak said. "In the material sense, anyway. That's why possessions don't have any status value to them--they don't say anything. That's why you won't find any absolute leaders down there either." "How come?" Lechat asked, puzzled. Pernak remained unsmiling, "What about that ship sitting twenty thousand miles out in space?" he said. The dog looms at the open window, forepaws on the sill, as if it will abandon its master in favor of this. "It's what he does. Like the postman delivers the mail. Like a baker makes bread." Leilani shrugged. bunch? traditionally employed. Smothering her with a pillow or administering a lethal injection prior to. Kath watched in silence for a second or two but for some reason seemed to find the situation amusing. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny." "And Gaultitz, presumably," Celia said, referring to one of the Mission's senior scientists. Better move. "So where do we go from here?" Borftein asked, returning to the subject in an effort to defuse the atmosphere. She had spoken to Geneva of things she'd never expected to speak of to anyone, and she'd found relief. levitation beams that suck you right out of your shoes and up into the mother ship, little gray men with big. A few seconds later Lurch, the household robot--apparently an indispensable part of any environment on Chiron that included children--appeared in the doorway. "It slipped," it announced. "Sorry about that, boss. I've wired off an order for a replacement." witnesses. PERCHED HAPPILY ON HIS STOOL at the lunch counter, poor dumb Burt Hooper knows that he. petroleum deposits in particular, as put forth locally in everything from textbooks to the Internet. Yet even. Celia didn't seem to hear. Her mind was still back where the conversation had been before Kath's call. After a short silence she said without moving her head, "It wasn't a warning from the Chironians." Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?" ward against their will she's a danger to herself and others." arm, its fangs bared on the back of his hand, its eyes bright with hatred. "But you ought to realize that." "What do you do best?" Ci asked him. "I mean . . . apart from holding people's walls up for them. That can't be much of a life." The hunter has a handsome, potentially genial face. If he were to smile instead of glower, put on a mask. hasn't acquired Curtis's dread of this human monster. She seems to have an opinion of her own, to which. Finally, he starts up toward the second floor. The stairs softly protest. As he ascends, he stays close to. "Then is there any difference?" convinced that the moment the slippery little reptile was out of her sight, it slithered toward her, coming at. "Well, that was up to you. Leilani, but he better stay on his side of the fence." when they retired for the night. Celia sank back into her seat and closed her eyes with a nod and a sigh of relief. One of the figures in the darkness wanted to know how come somebody called Stanislaw knew how to fly something like this; Another voice replied that his father used to steal them from the government. down an aisle of parked cars and other civilian vehicles, he catches up with Old Yeller and comes upon a. as a purely passive observer; there was no reason why she should change that role now. pyrotechnics. Curves of scales dimly reflected the crimson glow, glimmered faintly like clouded rhinestones. JEAN FALLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower Ii, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she

understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth..revealing that it wasn't locked. No spell had been cast on the mechanism, after all. Curtis's failure to open.Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians."."It's an idea," Bernard said, looking up at Lechat. "But it needs more of what Kath said-impact."ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The voice continued. "The words are appropriate, for we are indeed about to meet ones whom we must recognize and accept as children in spirit, if not in all cases in body and mind ..".had three and only three possible permutations. It explained why leptons were "white" and did not react to the strong force: There was only one possible permutation of UUU or EEE. And it explained why the electrical charges on quarks and leptons were equal: They were carried by the same tweedles. Also, further studies of "tweedledynamics" enabled the first speculations about what had put the match to the Big Bang..filtered cacophony into a muted clump-and-crackle..was neither. She looked at Bernard expectantly in a way that would have melted the Mayflower II's reaction dish..A round container, rather like a hatbox, stood on the bed; its red lid lay to one side..sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured.windshield imploded..please don't forget the large bills under the drawer.' ".maybe they finished their dinner before the hullabaloo. One of them is likely to hit the John soon after they..At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence.
